VBMS 805 Introduction to Mechanisms of Disease
Prerequisites: ASCI 240 or equivalent, BIOC/BIOS/CHEM 831, VBMS/BIOS 841, or permission
Description: Offered odd-numbered calendar years. Designed for students of biological, animal, and veterinary sciences. Introduction to general pathology emphasizing etiology, pathogenesis, morphologic features, and fundamental alterations associated with the fundamental changes of disease.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

VBMS 808 Functional Histology
Crosslisted with: BIOS 408, BIOS 808, VBMS 408
Prerequisites: BIOS 101 and 101L or LIFE 120 and 120L or BIOS 112; BIOS 213 or ASCI 240. BIOS 315 recommended.
Description: Microscopic anatomy of the tissues and organs of major vertebrate species, including humans. Normal cellular arrangements of tissues and organs as related to their macroscopic anatomy and function, with reference to sub-cellular characteristics and biochemical processes. Functional relationships among cells, tissues, organs and organ systems, contributory to organismal well being. General introduction to pathological processes and principles underlying some diseases.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC

VBMS 811 Introduction to Veterinary Epidemiology
Prerequisites: Permission
Description: Offered summer semester of odd-numbered years. Introduction to concepts of epidemiology including definition and uses of epidemiology. Casual web theory of causation discussed and compared to the Henle-Koch postulates. Students use sampling methods to define population characteristics, detect disease and test hypotheses. Practical application of confidence, power, and sample size. Use of descriptive epidemiology to discuss population characteristics.
Credit Hours: 2
Max credits per semester: 2
Max credits per degree: 2
Format: LEC

VBMS 820 Molecular Genetics
Crosslisted with: BIOS 420, BIOS 820, Mbio 420
Prerequisites: BIOS 206 and Senior standing.
Description: Molecular basis of genetics. Gene structure and regulation, transposable elements, chromosome structure, DNA replication, and repair mechanisms and recombination.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
Prerequisite for: FDST 908B
VBMS 841L Pathogenic Microbiology Laboratory
Crosslisted with: VBMS 441L
Description: Application of diagnostic microbiological techniques to the isolation, propagation and identification of common pathogens of human beings and animals. Case studies used, in the laboratory setting, to explore and test fundamentals of transmission, epidemiology and pathogenesis of selected infectious agents and to relate these to disease signs, treatments and methods of control.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Format: LAB

VBMS 842 Endocrinology
Crosslisted with: ASCI 442, ASCI 842, BIOS 842
Prerequisites: A course in vertebrate physiology and/or biochemistry.
Description: Mammalian endocrine glands from the standpoint of their structure, their physiological function in relation to the organism, the chemical nature and mechanisms of action of their secretory products, and the nature of anomalies manifested with their dysfunction.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

VBMS 843 Immunology
Crosslisted with: BIOS 443, BIOS 843, MBIO 443
Description: Fundamental consideration of cellular and humoral mechanisms of immunity, the structure and function of immunoglobulins, antigen-antibody interactions; hypersensitivity; transplantation and tumor immunity; immune and autoimmune disorders.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
Prerequisite for: VBMS 910

VBMS 845 Animal Physiology I
Crosslisted with: VMED 645, ASCI 845, BIOS 813
Prerequisites: Undergraduate courses in biochemistry, biology and physiology.
Notes: Primarily for students in animal or biological sciences or veterinary medicine.
Description: Mammalian physiology and cellular mechanisms. Physiology of the cell, embryology, and neuro-sensory, neuromuscular, endocrine, and reproductive systems.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC

VBMS 846 Animal Physiology II
Crosslisted with: VMED 646, ASCI 846, BIOS 814
Prerequisites: ASCI/VBMS 845 or BIOS 813
Notes: ASCI/VBMS 846/BIOS 814/VMED 646 is designed for students in animal or biological sciences or veterinary medicine.
Description: Mammalian physiology and cellular mechanisms. Physiology of the digestive, cardiovascular, respiratory, and renal systems.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC

VBMS 847 Interdisciplinary Concepts in Beef Production
Crosslisted with: ASCI 847
Prerequisites: Degree in veterinary medicine or animal science, or allied agricultural degree, or permission
Notes: Classroom attendance is required during each of the modules. Between modules distance education technologies (laptop computer, Internet access, a computer operating system with a word processor, spreadsheet, and presentation software, email, etc.) are used and required for discussion and assignments.
Description: The contributions and interactions of the major academic disciplines upon the production, performance, health, profitability, and sustainability of beef cow and cattle feeding operations.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 6
Format: LEC

VBMS 847A Interdisciplinary Concepts in Beef Production I
Crosslisted with: ASCI 847A
Description: The contributions and interactions of the major academic disciplines upon the production, performance, health, profitability, and sustainability of beef cow and cattle feeding operations.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

VBMS 847B Interdisciplinary Concepts in Beef Production II
Crosslisted with: ASCI 847B
Prerequisites: VBMS 847A
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

VBMS 848 Introduction to Veterinary Biotechnology
Prerequisites: 12 hours of veterinary and biomedical sciences or DVM degree, or equivalent and permission
Description: Information and assignments for VBMS 848 exchanged in the classroom and via Internet. Theoretical basis for emerging cellular, molecular and reproductive technologies, and their potential applications and impacts in the practice of food animal veterinary medicine.
Credit Hours: 1-2
Min credits per semester: 1
Max credits per semester: 2
Max credits per degree: 2
Format: LEC

VBMS 852 Molecular Virology and Viral Pathogenesis
Prerequisites: BIOS 843
Notes: Offered even-numbered calendar years.
Description: Introduction to virology with emphasis on molecular biology and pathogenesis. Concepts of virus replication strategies, virus-host interactions and virus pathogenesis.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
Prerequisite for: BIOS 950, VBMS 950
VTMS 999 Masters Thesis
Prerequisites: Admission to masters degree program and permission of major adviser
Credit Hours: 1-10
Max credits per semester: 1
Max credits per degree: 99
Format: IND

VTMS 901 Diagnostic Techniques
Description: Application of the principles of pathology to current problems in the diagnostic laboratory.
Credit Hours: 1-10
Max credits per semester: 1
Max credits per degree: 1
Format: LEC

VTMS 908 T Cell Biology: Repertoire and Effector Functions
Prerequisites: BIOS 843 or permission
Notes: Offered even-numbered calendar years.
Description: Analysis of the literature of the cellular and molecular biology of T cell recognition and effector functions. Subject areas: Scientific Methodologies; Antigen Presentation; T Cell Receptor and Coreceptor; Thymic Structure and Self/Nonself Discrimination; T Cell Regulation; Allergy and Autoimmune Diseases; and T-Cell-Mediated Inflammation and Cytokine Network.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

VTMS 909 Seminar
Credit Hours: 1-4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC

VTMS 910 Topics in Immunology
Prerequisites: VBMS 843 or BIOS 843
Description: Basics of immunology; critical analysis of reports taken from scientific literature of immunology.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

VTMS 911 Regulation of Eukaryotic Gene Expression
Prerequisites: 1) BIOC 818 or 820; 2) BIOC 832; and 3) BIOC 838 or BIOS 837 or related laboratory experience
Notes: Offered even-numbered calendar years.
Description: Basic mechanisms regulating gene expression in eukaryotes during various physiological states. Emphasis on understanding specific and unique mechanisms in mammalian systems. Techniques used to study gene regulation.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

VTMS 920 Measurement of Animal Disease and Production
Prerequisites: VBMS 811 or permission
Notes: Offered odd-numbered calendar years.
Description: Measurements of disease and production, the basic tenants of epidemiology, taught in detail including incidence density, risk rates, morbidity, mortality, cause specific rates, and life tables. Methods and implications of measuring disease at the farm, regional, and national levels. Sampling strategies and the impact of these on the standard error of the estimate. Implications and biases of using retrospective production data versus prospective data. Clinical epidemiology which includes definition of tests in veterinary medicine, individual and herd level sensitivity and specificity, receiver operating characteristics curves, positive and negative predictive values, serial and parallel interpretation of tests, Kappa statistics, and issues of precision, validity, and accuracy.
Credit Hours: 2
Max credits per semester: 2
Max credits per degree: 2
Format: LEC

VTMS 921 Analytic Observational Studies in Veterinary Epidemiology
Prerequisites: VBMS 811 and 920, or permission
Notes: Offered odd-numbered calendar years.
Description: Design, implementation, and analysis of cross-sectional, cohort, and case-control studies and field trials. Limitations, biases, implications of the results, and current uses of each. Evaluation of these methods as used in the scientific literature. Analyses includes chi-square tests, Cochrane Chi-square tests, and epidemiologic measures of strength of association, effect, and total effect. Design, implementation, analysis and interpretation of field trials taught specifically as they relate to the practitioner.
Credit Hours: 2
Max credits per semester: 2
Max credits per degree: 2
Format: LEC

VTMS 925 Critical Reading of the Epidemiology Literature
Prerequisites: VBMS 811 or VBMS 920; or permission
Notes: May be repeated for credit.
Description: Analysis of current epidemiology and animal health literature. Critical evaluation of study design, methods of analysis, biases, field applicability, and basis for conclusions.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 4
Format: LEC

VTMS 930 Advanced Food Animal Production Medicine
Prerequisites: Permission
Notes: Offered spring semester of even-numbered calendar years.
Description: Inter-relationships between animal health, disease, and well-being as they relate to the productivity and profitability of food animal production units. Integrates aspects of veterinary medicine, animal science, and agricultural economics. General concepts related to cattle, swine and sheep production systems, followed by specific issues that relate to different species.
Credit Hours: 2
Max credits per semester: 2
Max credits per degree: 2
Format: LEC
VBMS 942 Genetics, Genomics, and Bioinformatics of Prokaryotes
Crosslisted with: BIOS 942
Prerequisites: BIOS 241 and 312, or permission
Description: Prokaryotic gene regulation, DNA exchange, DNA recombination and repair, comparative prokaryotic genomics and computer-based methods of analysis.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

VBMS 944 Immunovirology
Prerequisites: Permission; organic chemistry; biochemistry; immunology and/or concepts in virology and virotopathogenesis
Description: Pathogenic microbiology recommended. Description of virus and immune system interactions, with emphasis on mouse and human models. Mechanism of antigen presentation of viral proteins and relationship to health and disease. Analysis of the hosts immune response to selected viral infections of the major systems: neural, respiratory, gastrointestinal and immune.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

VBMS 948 Concepts in Experimental Immunology
Prerequisites: BIOS 843 or permission
Description: Recent advances in immunological techniques and review of conventional methods.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

VBMS 949 Vaccinology
Prerequisites: VBMS/BIOS 841; BIOS 843; VBMS 843; VBMS/BIOS 852; or permission
Description: Analysis of the theory and mechanisms involved in the development of efficacious vaccines. Microbiological and immunological aspects as well as the manufacturing and regulatory aspects of vaccine development.
Credit Hours: 2
Max credits per semester: 2
Max credits per degree: 2
Format: LEC

VBMS 950 Medical Molecular Virology
Crosslisted with: BIOS 950
Prerequisites: BIOS/CHM/BIOL 431/831 and 432/832; VBMS 852
Notes: Offered odd-numbered calendar years.
Description: Current topics in molecular virology relevant to the natural history and pathogenesis of viral diseases of humans and animals.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

VBMS 951 Advanced Molecular Infectious Diseases
Prerequisites: BIOS 832 or equivalent; 18 hours of biological, biomedical and/or veterinary sciences, including fundamental microbiology and genetics; or permission
Notes: VBMS 824 and 843 or equivalent recommended. Offered spring semester of even-numbered years.
Description: Molecular and cellular aspects of microbial pathogenesis. Key literature, synthesis of scientific problems into research proposals.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

VBMS 964 Signal Transduction
Crosslisted with: BIOS 964
Prerequisites: BIOS 832, BIOS 820 or equivalent, or permission
Description: Molecular basis of genetics in eukaryotes. Gene structure and regulation, transposable elements, chromosome structure, DNA replication and repair mechanisms and recombination.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

VBMS 975 Seminar in Veterinary Histopathology
Prerequisites: VBMS 805, or equivalent and permission
Notes: May be repeated for credit.
Description: Descriptive veterinary histopathology covering diseases of all body systems in animal species including domestic, laboratory, wildlife, birds, fishes, reptiles, and amphibians. Source material is worldwide in scope.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Format: LEC

VBMS 996 Research on Selected Problems in Veterinary Science
Credit Hours: 2-10
Min credits per semester: 2
Max credits per degree: 10
Format: IND

VBMS 998 Special Topics in Veterinary Science
Prerequisites: Permission
Description: The subject will be dependent on student demand and availability of staff. Reviews of specialized subject areas.
Credit Hours: 1-10
Min credits per semester: 1
Max credits per semester: 10
Max credits per degree: 10
Format: LEC
