

AGRONOMY

Description

A degree in Agronomy aims to educate and develop professionals prepared to manage complex plant production, landscape, and soil management systems. Graduates will leverage an appreciation of nature; scientific knowledge and data; and teamwork, communication, and problem-solving skills to become leaders and change makers in agronomic systems in Nebraska and beyond.

The Agronomy major core curriculum provides the foundational and advanced knowledge and skills necessary for success in any career pathway in agronomy, including courses in plant and soil science, pest biology and management, systems thinking, technical communication, and career development. Students will complement their program of study with two additional areas of professional specialization provided through emphases and/or minors. There are no additional admission requirements beyond the University of Nebraska–Lincoln's core course and performance requirements. Students are assigned a faculty advisor after New Student Enrollment.

College Requirements

College Admission

Requirements for admission into the College of Agricultural Sciences and Natural Resources (CASNR) are consistent with general University admission requirements (one unit equals one high school year): 4 units of English, 4 units of mathematics, 3 units of natural sciences, 3 units of social sciences, and 2 units of world language. Students must also meet performance requirements: a 3.0 cumulative high school grade point average OR an ACT composite of 20 or higher, writing portion not required OR a score of 1040 or higher on the SAT Critical Reading and Math sections OR rank in the top one-half of graduating class; transfer students must have a 2.0 (on a 4.0 scale) cumulative grade point average and 2.0 on the most recent term of attendance.

Admission Deficiencies/Removal of Deficiencies

Students who are admitted to CASNR with core course deficiencies must remove these deficiencies within the first 30 credit hours at the University of Nebraska–Lincoln, or within the first calendar year at Nebraska, whichever takes longer. College-level coursework taken to remove deficiencies may be used to meet degree requirements in CASNR.

Deficiencies in the required entrance subjects can be removed by the completion of specified courses in the University or by correspondence.

The Office of Admissions, Alexander Building (south entrance), City Campus, provides information to new students on how deficiencies can be removed.

College Degree Requirements

Curriculum Requirements

The curriculum requirements of the College consist of three areas: ACE (Achievement-Centered Education), College of Agricultural Sciences and Natural Resources Core, and Degree Program requirements and electives. All three areas of the College Curriculum Requirements are incorporated within the description of the Major/Degree Program sections of the catalog. The individual major/degree program listings of classes ensure that a student will meet the minimum curriculum requirements of the College.

World Languages/Language Requirement

Two units of a world language are required. This requirement is usually met with two years of high school language.

Experiential Learning

All undergraduates in the College of Agricultural Sciences and Natural Resources must take an Experiential Learning (EL) designated course. This may include 0-credit courses designed to document co-curricular activities recognized as Experiential Learning.

Minimum Hours Required for Graduation

The College grants the bachelors degree in programs associated with agricultural sciences, natural resources, and related programs. Students working toward a degree must earn at least 120 semester hours of credit. A minimum cumulative grade point average of C (2.0 on a 4.0 scale) must be maintained throughout the course of studies and is required for graduation. Some degree programs have a higher cumulative grade point average required for graduation. Please check the degree program on its graduation cumulative grade point average.

Grade Rules

Removal of C-, D, and F Grades

Only the most recent letter grade received in a given course will be used in computing a student's cumulative grade point average if the student has completed the course more than once and previously received a grade or grades below C in that course.

The previous grade (or grades) will not be used in the computation of the cumulative grade point average, but it will remain a part of the academic record and will appear on any transcript.

A student can remove from their cumulative average a course grade of C-, D+, D, D-, or F if the student repeats the same course at the University of Nebraska and receives a grade other than P (pass), I (incomplete), N (no pass), W (withdrew), or NR (no report). If a course is no longer being offered, it is not eligible for the revised grade point average computation process.

For complete procedures and regulations, see the Office of the University Registrar website at <http://www.unl.edu/regrec/course-repeats> (<http://www.unl.edu/regrec/course-repeats/>).

Pass/No Pass

Students in CASNR may take any course offered on a Pass/No Pass basis within the 24-hour limitation established by the Faculty Senate. However, a department may specify that the Pass/No Pass status of its courses be limited to non-majors or may choose to offer some courses for letter grades only.

GPA Requirements

A minimum cumulative grade point average of C (2.0 on a 4.0 scale) must be maintained throughout the course of studies and is required for graduation. Some degree programs have a higher cumulative grade point average required for graduation. Please check the degree program on its graduation cumulative grade point average.

Transfer Credit Rules

To be considered for admission a transfer student, Nebraska resident or nonresident, must have an accumulated average of C (2.0 on a 4.0 scale) and a minimum C average in the last semester of attendance at another college. Transfer students who have completed less than 12 credit hours of college study must submit either ACT or SAT scores.

Ordinarily, credits earned at an accredited college are accepted by the University. The College, however, will evaluate all hours submitted on an application for transfer and reserves the right to accept or reject any of them. Sixty (60) is the maximum number of hours the University will accept on transfer from a two-year college. Ninety (90) is the maximum number of hours the University will accept from a four-year college. Transfer credit in the degree program must be approved by the degree program advisor on a Request for Substitution Form to meet specific course requirements, group requirements, or course level requirements in the major. At least 9 hours in the major field, including the capstone course, must be completed at the University of Nebraska–Lincoln regardless of the number of hours transferred.

The College will accept no more than 10 semester hours of C-, D+, D, and D- grades from other schools. The C-, D+, D, and D- grades can only be applied to free electives. This policy does not apply to the transfer of grades from UNO or UNK to the University of Nebraska–Lincoln.

Joint Academic Transfer Programs

The College of Agricultural Sciences and Natural Resources has agreements with many institutions to support joint academic programs. The transfer programs include dual degree programs and cooperative degree programs. Dual degree programs offer students the opportunity to receive a degree from a participating institution and also to complete the requirements for a bachelor of science degree in CASNR. Cooperative programs result in a single degree from either the University of Nebraska–Lincoln or the cooperating institution.

Dual Degree Programs

A to B Programs

The A to B Program, a joint academic program offered by the CASNR and participating community colleges, allows students to complete the first two years of a degree program at the participating community college and continue their education and study in a degree program leading toward a bachelor of science degree.

The A to B Program provides a basic knowledge plus specialized coursework. Students transfer into CASNR with junior standing.

Depending on the community college, students enrolled in the A to B Program may complete the requirements for an associate of science at the community college, transfer to the University of Nebraska–Lincoln, and work toward a bachelor of science degree.

Participating community colleges include:

- Central Community College
- Metropolitan Community College
- Mid-Plains Community College
- Nebraska College of Technical Agriculture
- Nebraska Indian Community College
- Northeast Community College
- Southeast Community College
- Western Nebraska Community College

3+2 Programs

Two specialized degree programs in **animal science** and **veterinary science** are offered jointly with an accredited college or school of veterinary medicine. These two programs permit CASNR animal science or veterinary science students to receive a bachelor of science degree from the University of Nebraska–Lincoln with a degree in animal science or veterinary science after successfully completing two years of the

professional curriculum in veterinary medicine at an accredited veterinary school. Students who successfully complete the 3+2 Program, must provide transcripts and complete the Application for Degree form via MyRED. Students without MyRED access may apply for graduation in person at Husker Hub in the Canfield Administration Building, or by mail. Students should discuss these degree programs with their academic advisor.

Cooperative Degree Programs

Academic credit from the University and a cooperating institution are applied towards a four-year degree from either the University of Nebraska–Lincoln (University degree-granting program) or the cooperating institution (non-University degree-granting program). All have approved programs of study.

UNL Degree-Granting Programs

A University of Nebraska–Lincoln degree-granting program is designed to provide students the opportunity to complete a two-year program of study at one of the four-year institutions listed below, transfer to CASNR, and complete the requirements for a bachelor of science degree.

Chadron State College. Chadron State College offers a 2+2 program leading to a grassland ecology and management degree program and a transfer program leading to a bachelor of science in agricultural education in the teaching option.

Wayne State College. Wayne State College offers a 3+1 program leading to a bachelor of science in plant biology in the ecology and management option and a 3+1 program leading to a bachelor of science in Applied Science.

University of Nebraska at Kearney. Transfer programs are available for students pursuing degree programs leading to a bachelor of science degree.

University of Nebraska at Omaha. Transfer programs are available for students pursuing degree programs leading to a bachelor of science degree.

Non University of Nebraska–Lincoln Degree-Granting Programs

CASNR cooperates with other institutions to provide coursework that is applied towards a degree at the cooperating institution. Pre-professional programs offered by CASNR allow students to complete the first two or three years of a degree program at the University prior to transferring and completing a degree at the cooperating institution.

Chadron State College–Range Science. The 3+1 Program in range science allows Chadron State College students to pursue a range science degree through Chadron State College. Students complete three years of coursework at Chadron State College and one year of specialized range science coursework (32 credit hours) at CASNR.

Residency

Students must complete at least 30 of the total hours for their degree using University of Nebraska–Lincoln credits. At least 18 of the 30 credit hours must be in courses offered through CASNR¹ (>299) including the appropriate ACE 10 degree requirement or an approved ACE 10 substitution offered through another Nebraska college and excluding independent study regardless of the number of hours transferred. Credit earned during education abroad may be used toward the residency requirement if students register through the University of Nebraska–Lincoln and participate in prior-approved education abroad programs.

The University of Nebraska–Lincoln open enrollment and summer independent study courses count toward residence.

¹ Includes courses taught by CASNR faculty through interdisciplinary prefixes (e.g., LIFE, MBIO, ENVR, SCIL, EAEP, ENSC) and CASNR crosslisted courses taught by non-CASNR faculty.

Online and Distance Education

There are many opportunities to earn college credit online through the University of Nebraska–Lincoln. Some of these credits may be applicable not only as elective credits but also toward the fulfillment of the College's education requirements. Credits earned online may count toward residency. However, certain offerings may not be counted toward scholarship requirements or academic recognition criteria.

For further information, contact:

Office of Online and Distance Education
 University of Nebraska–Lincoln
 305 Brace Labs
 Lincoln, NE 68588-0109
 402-472-4681
<http://online.unl.edu/>

Independent Study Rules

Students wishing to take part in independent studies must obtain permission; complete and sign a contract form; and furnish copies of the contract to the instructor, advisor, departmental office, and the Dean's Office. The contract should be completed before registration. Forms are available in 103 Agricultural Hall or online at the CASNR website.

Independent study projects include research, literature review or extension of coursework under the supervision and evaluation of a departmental faculty member.

Students may only count 12 hours of independent study toward their degrees and no more than 6 hours can be counted during their last 36 hours earned, excluding senior thesis, internships, and courses taught under an independent study number.

Other College Degree Requirements

Capstone Course Requirement

A capstone course is required for each CASNR degree program. A capstone course is defined as a course in which students are required to integrate diverse bodies of knowledge to solve a problem or formulate a policy of societal importance.

ACE Requirements

All students must fulfill the Achievement Centered Education (ACE) requirements. Information about the ACE program may be viewed at ace.unl.edu (<https://ace.unl.edu/>).

The minimum requirements of CASNR reflect the common core of courses that apply to students pursuing degrees in the college. Students should work with an advisor to satisfy ACE outcomes 1, 2, 3, 4, 6, and 10 with the college requirements.

Catalog Rule

Students must fulfill the requirements stated in the catalog for the academic year in which they are first admitted to the University of Nebraska–Lincoln or when they were first admitted to a Joint Academic Transfer Program. Students transferring from a community college, but without admission to a Joint Academic Transfer Program, may

be eligible to fulfill the requirements as stated in the catalog for an academic year in which they were enrolled at the community college prior to attending the University of Nebraska-Lincoln. This decision should be made in consultation with academic advisors, provided the student a) was enrolled in a community college during the catalog year they are utilizing, b) maintained continuous enrollment at the previous institution for 1 academic year or more, and c) continued enrollment at the University of Nebraska-Lincoln within 1 calendar year from their last term at the previous institution. In consultation with advisors, a student may choose to follow a subsequent catalog for any academic year in which they are admitted to and enrolled as a degree-seeking student at the University of Nebraska–Lincoln in the College of Agricultural Sciences and Natural Resources. Students must complete all degree requirements from a single catalog year. The catalog which a student follows for degree requirements may not be more than 10 years old at the time of graduation.

Learning Outcomes

Graduates of agronomy will be able to:

1. Recognize, describe, and assess the value of nature.
2. Manage complex plant and soil systems which provide services for people and the planet.
3. Apply science and technology knowledge to problem solving.
4. Use diverse methods to generate, visualize, and communicate data that reveals truths and guides decision making.
5. Demonstrate effective communication to engage a target audience based on available information.
6. Lead and contribute to teams to amplify success in problem solving

Major Requirements

The following basic courses are required for a bachelor of science degree in agronomy.

College Integrative Course and ACE 8

SCIL 101	Science and Decision-Making for a Complex World	3
----------	---	---

Credit Hours Subtotal: 3

Plant and Landscape Systems Integrative Course

PLAS 100	Plants, Landscapes, & the Environment	3
----------	---------------------------------------	---

Credit Hours Subtotal: 3

Communications

Written Communication (ACE 1)

Select one of the following: 3

ENGL 150	Writing and Inquiry
ENGL 151	Writing for Change
ENGL 254	Writing and Communities
JGEN 120	Basic Business Communication
JGEN 200	Technical Communication I
JGEN 300	Technical Communication II

Oral Communication (ACE 2)

Select one of the following: 3

ALEC 102	Interpersonal Skills for Leadership
COMM 101	Communication in the 21st Century
COMM 209	Public Speaking

COMM 210	Communicating in Small Groups	
COMM 215	Visual Communication	
COMM 283	Interpersonal Communication	
COMM 286	Business and Professional Communication	
JGEN 300	Technical Communication II	
MRKT 257	Sales Communication	
TMFD 121	Visual Communication with Animation	
Credit Hours Subtotal:		6
Mathematics		
Select 5 credits from the following:		5
MATH 102	Trigonometry	
MATH 103	College Algebra and Trigonometry	
MATH 104	Applied Calculus	
MATH 106	Calculus I	
STAT 218	Introduction to Statistics	
Credit Hours Subtotal:		5
Economics (ACE 6)		
Select one of the following: ¹		3
AECN 141	Introduction to the Economics of Agriculture	
ECON 200	Economic Essentials and Issues	
ECON 211	Principles of Macroeconomics	
ECON 212	Principles of Microeconomics	
Credit Hours Subtotal:		3
Technical Data Communication		
PLAS 230	Technical Reporting in Plant and Landscape Systems	3
Credit Hours Subtotal:		3
Natural Sciences		
PLAS 131	Plant Science (ACE 4)	3
PLAS 153	Soil Resources	4
PLAS 278	Botany	4
Credit Hours Subtotal:		11
Career Experience		
PLAS 95	Orientation Seminar	0
PLAS 295	Internship	1-3
Credit Hours Subtotal:		1
Pest Biology		
ENTO 105	Natural History of Arthropods Associated with Plants	2
PLPT 210	Plant Pathogens and Disease	2
Credit Hours Subtotal:		4
ACE Requirement		
Select one course each from ACE outcomes 5, 7, and 9		9
Credit Hours Subtotal:		9
Total Credit Hours		48

¹ For students planning on pursuing AECN 200+ level courses, take AECN 141 or ECON 212.

Agronomy Requirements

Agronomy Requirements		
PLAS 132	Agronomic Plant Science Laboratory	1
PLAS 135	Experiments in Plant Science	1
CHEM 105A & CHEM 105L	Chemistry in Context I and Chemistry in Context I Laboratory	4
or CHEM 109A	General Chemistry I and General Chemistry I Laboratory	
& CHEM 109L		
or CHEM 113A	Fundamental Chemistry I and Fundamental Chemistry I Laboratory	
& CHEM 113L		
AGST 109	Physical Principles in Agriculture and Life Sciences	4
or PHYS 141	Physics for Life Sciences I	
or PHYS 151	Elements of Physics	
PLAS 204	Resource-Efficient Crop Management	3
PLAS 215	Genetics	4
PLAS 240	Forage Crop and Pasture Management	3
PLAS 269	Principles of Soil Management	3
PLAS 325	Introductory Plant Physiology	4
PLAS 366 / SOIL 366	Soil Nutrient Relationships	4
PLAS 395A	Internship in Agronomy	1-3
PLAS 426	Invasive Plants	3
PLAS 431	Site-specific Crop Management	3
Credit Hours Subtotal:		38
Ecology and Ecosystems		
Select 3 credits from the following:		3
PLAS 340	Range Management and Improvement	
PLAS 425	Cover Crops in Agroecosystems	
PLAS 435	Agroecology	
PLAS 440	Great Plains Ecosystem	
Credit Hours Subtotal:		3
Supporting Plant or Soil Management Course		
Select 9 credits of any 300+ level PLAS course		9
Select 9 credits of any 300+ level CASNR course		9
Credit Hours Subtotal:		18
Capstone Course (ACE 10)		
Select one of the following:		3
PLAS 403	Scientific Writing and Communication	
PLAS 405	Crop Management Strategies	
PLAS 435	Agroecology	
PLAS 475	Water Quality Strategy	
PLAS 488	Entrepreneurship and Enterprise Development	
Free Electives		10
Credit Hours Subtotal:		13
Total Credit Hours		72

Requirements for Minors Offered by Department

Agronomy Minor

A minor in agronomy consists of a minimum of 18 credit hours, including at least 6 hours at the 300 level or above. A total of no more than 3 hours of credit in PLAS 395A Internship in Agronomy, PLAS 496 Independent Study, or PLAS 498 Senior Project may be applied to the minor.

Core Courses

PLAS 131 & PLAS 132 or PLAS 278	Plant Science and Agronomic Plant Science Laboratory Botany	4
PLAS 153	Soil Resources	4
Credit Hours Subtotal:		8

Additional Courses

Select 3-4 hours from the following: 3-4

PLAS 204	Resource-Efficient Crop Management	
PLAS 240	Forage Crop and Pasture Management	
PLAS 245	Introduction to Grassland Ecology and Management	
PLAS 269	Principles of Soil Management	
PLAS 278	Botany ²	
	or PLAS 325 Introductory Plant Physiology	

Select 6-7 credits, 6 credits of which must be at the 300-level or above. It is recommended, but not required, to select courses within one focus area. 6-7

Agronomic Crop Production

PLAS 340	Range Management and Improvement	
PLAS 366	Soil Nutrient Relationships	
PLAS 405	Crop Management Strategies	
PLAS 425	Cover Crops in Agroecosystems	
PLAS 426	Invasive Plants	
PLAS 431	Site-specific Crop Management	

Plant Breeding and Genetics

PLAS 409A	Case studies in plant breeding: Breeding for Disease Resistance	
PLAS 409B	Case Studies in plant breeding: Transgenic strategies for disease resistance	
PLAS 411	Crop Genetic Engineering	
PLAS 412	Crop and Weed Genetics	
PLAS 420	Bioinformatics Applications in Agriculture	

Agroecology

PLAS 425	Cover Crops in Agroecosystems	
PLAS 435	Agroecology	
PLAS 440	Great Plains Ecosystem	
PLAS 444	Ecosystem Monitoring and Assessment	

Soil Science

PLAS 361	Soils, Environment and Water Quality	
PLAS 366	Soil Nutrient Relationships	
PLAS 455	Soil Chemistry and Mineralogy	
PLAS 460	Soil Microbial Ecology	
PLAS 472	Applied Soil Physics	
PLAS 477	Great Plains Field Pedology	

Credit Hours Subtotal:	10
Total Credit Hours	18

¹ If PLAS 133 or PLAS 134 has already been taken, PLAS 132 is not required. However, 18 credit hours are still required for the minor. Students may replace the 1 credit from PLAS 132 with any of the courses listed in the minor.

² Only one of these courses may be used toward the agronomy minor.

PLAS 92 Plant Biology Portfolio and Assessment

Crosslisted with: NRES 92

Prerequisites: Junior standing in Plant Biology degree program

Notes: Required for graduation. Offered every Fall during the first 5 weeks. Pass/No Pass only.

Description: Development of an experiential portfolio and completion of an online survey as part of assessment activities.

Credit Hours: 0

Max credits per semester:

Max credits per degree:

Grading Option: Pass No Pass

PLAS 95 Orientation Seminar

Prerequisites: First-semester first-year student (<26 credits); Plant and Landscape Systems, Agronomy, or Plant Biology major

Notes: Degree requirement for all first-year students in the Plant and Landscape Systems, Agronomy, and Plant Biology majors. Waived for those joining the majors with >26 credits.

Description: Group and individual activities to help discover career opportunities, improve academic success skills, identify beneficial co-curricular activities, and select appropriate internships.

Credit Hours: 0

Max credits per semester:

Max credits per degree:

Grading Option: Pass No Pass

Offered: FALL

PLAS 100 Plants, Landscapes, & the Environment

Description: Introduction to a diverse range of plant and landscape systems and management strategies for balancing economic and environmental sustainability. Foundational principles of plant biology, landscape ecology, and environmental science explored within the context of these systems.

Credit Hours: 3

Max credits per semester: 3

Max credits per degree: 3

Grading Option: Graded with Option

Offered: FALL/SPR

ACE: ACE 4 Science

PLAS 107 Invasive Plant Species: Impacts on Ecosystems**Crosslisted with:** NRES 107**Notes:** Online only**Description:** The flora of the earth is constantly being re-distributed by natural and human forces. As plant species change locations, they affect ecosystems, but how? In this course, students will learn how invasive plants establish and spread in ecosystems and develop an understanding of their impacts on ecosystems from local to global scales.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded**Offered:** FALL/SPR**ACE:** ACE 9 Global/Diversity**PLAS 127 Survey of Turfgrass and Landscape Management****Description:** Introduction to careers, internships and co-curricular activities in turfgrass and landscape management.**Credit Hours:** 1**Max credits per semester:** 1**Max credits per degree:** 1**Grading Option:** Graded with Option**PLAS 131 Plant Science****Description:** The biology of plants grown for food, feed, fuel, fiber and fun! Starting with natural and managed ecosystems and their interactions, the course then introduces how plants obtain and manage water and nutrients before giving a big picture view of carbon assimilation, metabolism and storage in terms of plant productivity and growth in variable environments. The way plants respond to endogenous and applied growth regulators as well as genetic signals is described, before considering the role of genetics in plant pest interactions and management.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** FALL/SPR**Prerequisite for:** ENTO 308; NRES 220; NRES 302, PLAS 302; NRES 310; PLAS 132; PLAS 133; PLAS 134; PLAS 135; PLAS 204; PLAS 221; PLAS 227; PLAS 240, RNGE 240, GRAS 240; PLAS 278; PLAS 325; PLAS 353; PLAS 355; PLPT 210**ACE:** ACE 4 Science**Course and Laboratory Fee:** \$5**PLAS 132 Agronomic Plant Science Laboratory****Prerequisites:** PLAS 131 or parallel**Description:** Growth, development, morphology and staging of annual and perennial monocot and dicot plants produced for grain, forage and grazing. Evaluation of seed, grain and forage quality for plants of agronomic importance.**Credit Hours:** 1**Max credits per semester:** 1**Max credits per degree:** 1**Grading Option:** Graded with Option**Prerequisite for:** ENTO 308; PLAS 306; PLAS 307**Course and Laboratory Fee:** \$10**PLAS 133 Horticultural Plant Science Laboratory****Prerequisites:** PLAS 131 or parallel**Description:** Horticulture plant morphology, physiology, cell anatomy and plant growth are explored through application of practices used in industry. Emphasis on intensive production systems appropriate to specialty and greenhouse grown horticultural plants**Credit Hours:** 1**Max credits per semester:** 1**Max credits per degree:** 1**Grading Option:** Graded with Option**Offered:** FALL/SPR**Prerequisite for:** PLAS 306; PLAS 307; PLAS 356**PLAS 134 Plant Sciences Laboratory****Prerequisites:** Prior or concurrent enrollment in PLAS 131 required.**Notes:** Open to all majors and minors, except Agronomy or Horticulture.**Description:** An exploration of plant morphology, physiology, and maturation with an emphasis on environmental, biotic, and human interactions within production and landscape systems. Not open to Agronomy or Horticulture majors or minors.**Credit Hours:** 1**Max credits per semester:** 1**Max credits per degree:** 1**Grading Option:** Graded**Prerequisite for:** ENTO 308; PLAS 306; PLAS 307**PLAS 135 Experiments in Plant Science****Prerequisites:** PLAS 131 or concurrent or LIFE 120 or concurrent**Description:** Designing and conducting hypothesis-driven research with plants to measure response to abiotic factors in their growing environment. Experiences include the scientific process from observation of plant growth phenomena, review of relevant peer-reviewed published research, formulation of testable hypotheses, methods planning, data assimilation and analysis, and writing and oral communication of results in the style of research professionals.**Credit Hours:** 1**Max credits per semester:** 1**Max credits per degree:** 1**Grading Option:** Graded with Option**Offered:** FALL**PLAS 153 Soil Resources****Crosslisted with:** SOIL 153**Description:** Investigation into the physical, chemical and biological properties of soils, in relation to their appropriate uses, protection, and vital roles or functions in broader plant-soil systems. Apply exercises such as discussion, evidence-based writing, assessment, planning, problem-solving, and presentations in relation to principles and practices involving all aspects of soils.**Credit Hours:** 4**Max credits per semester:** 4**Max credits per degree:** 4**Grading Option:** Graded with Option**Offered:** FALL/SPR**Prerequisite for:** AGEN 431, PLAS 431, AGST 431; AGST 354, SOIL 354; LARC 487, NRES 487; NRES 245, PLAS 245; NRES 255, PLAS 255, SOIL 255; NRES 319; PLAS 204; PLAS 269, SOIL 269; PLAS 327; PLAS 361, GEOL 361, NRES 361, SOIL 361; PLAS 366, SOIL 366; PLAS 453, LARC 453, SOIL 453; PLAS 455, AGRO 855, NRES 455, NRES 855, SOIL 455; PLAS 472, AGRO 872, NRES 472, NRES 872, SOIL 472**Course and Laboratory Fee:** \$15

PLAS 200 Landscape and Environmental Appreciation**Crosslisted with:** GEOG 200, LARC 200**Description:** Values and processes in human landscapes and natural environments. Concepts and tools to understand the context of local and global environments and significant historical landscapes. Landscape as an indicator of aesthetic quality, design principles and processes as integrators of humans and nature, and the garden as a model for creating sustainable landscapes.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**ACE:** ACE 7 Arts ACE 9 Global/Diversity**PLAS 201 Dendrology: Study and Identification of Trees and Shrubs****Crosslisted with:** NRES 201, LARC 201**Description:** An introduction to the naming, identification, and natural history of woody trees and shrubs in North American with emphasis on trees common to Nebraska. Covers morphology, natural site conditions, wildlife and human uses of woody trees and shrubs.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** FALL**Course and Laboratory Fee:** \$10**PLAS 204 Resource-Efficient Crop Management****Prerequisites:** PLAS 131 and PLAS/SOIL 153**Description:** The integration of crop and soil science, plant breeding, climatology and integrated pest management disciplines to develop and evaluate crop management strategies that make the most efficient use of natural resources such as solar radiation, water, and soil, as well as other external inputs utilized for field crop management.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** SPRING**Prerequisite for:** AGEN 431, PLAS 431, AGST 431; PLAS 405**PLAS 212 Woody Plants for Landscapes: Identification, Management, and Use****Crosslisted with:** NRES 212, LARC 212**Description:** Identification, basic management and design uses of trees and shrubs for sustainable landscapes, with an emphasis on native plants and plants adapted to the Plains states. Emphasis is on live specimens in outdoor environments, supported by online resources.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** FALL**PLAS 213 Cultivars and Varieties of Woody Plants for Landscapes****Crosslisted with:** NRES 213, LARC 213**Description:** Characteristics of commercially available trees and shrubs used in urban landscapes. Compares differences among cultivars, design uses, and management issues using a combination of live specimens in outdoor environments and online resources.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** SPRING**PLAS 214 Herbaceous Landscape Plants****Crosslisted with:** NRES 214**Description:** Identification of herbaceous plants with ornamental value in the landscape including native and introduced annuals, perennials, grasses and cultivars. Typical ecological associations, environmental tolerances and/or intolerance, cultural requirements, and design characteristics.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**PLAS 215 Genetics****Prerequisites:** 3 hrs biological sciences.**Description:** Discovery of the biology of genes and the application of genetics principles to understand the control and inheritance of traits in families and populations. Focus is on animals and plants that are important in medicine, agriculture and nature. Learning emphasis is problem solving via online, instant feedback assessments, group discussion, experimental data analysis and context-based exams.**Credit Hours:** 4**Max credits per semester:** 4**Max credits per degree:** 4**Grading Option:** Graded with Option**Prerequisite for:** AGRO 810, BIOC 810, HORT 810, BIOC 410, PLAS 410; AGRO 815, PLAS 415; ASCI 330; PLPT 418, PLPT 818, MBIO 418**Course and Laboratory Fee:** \$20**PLAS 216 Plant Breeding Principles and Practice****Prerequisites:** High school biology and chemistry.**Notes:** BIOS 101 and 101L or equivalent recommended.**Description:** Plant breeding theory and technique. Application of genetic principles to plant improvement. Experience with breeding agronomic and horticultural plant species to illustrate plant mating systems and breeding principles.**Credit Hours:** 2**Max credits per semester:** 2**Max credits per degree:** 2**Grading Option:** Graded with Option

PLAS 221 Plant Propagation**Prerequisites:** PLAS 131**Notes:** Recommend PLAS 278 taken previously or concurrently**Description:** Practice different methods of plant propagation and explore the effects of environmental management on propagation success using the scientific method.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** SPRING**Prerequisite for:** PLAS 356**Course and Laboratory Fee:** \$35**PLAS 227 Introductory Turfgrass Management****Prerequisites:** PLAS 131 or PLAS 278 or either concurrently.**Description:** Introduction to turfgrasses, their management and use, and to the turfgrass industry.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** FALL**Prerequisite for:** PLAS 327**PLAS 229 Introductory Turfgrass Management Laboratory****Description:** Laboratory covering turfgrass identification and management.**Credit Hours:** 1**Max credits per semester:** 1**Max credits per degree:** 1**Grading Option:** Graded with Option**Offered:** FALL**Course and Laboratory Fee:** \$40**PLAS 230 Technical Reporting in Plant and Landscape Systems****Notes:** This course is intended for first or second year students.**Description:** Learn introductory data science skills necessary to collect, manage, and analyze data. Gain the necessary skills to interpret and effectively communicate information derived from data.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded**Offered:** FALL/SPR**PLAS 240 Forage Crop and Pasture Management****Crosslisted with:** RNGE 240, GRAS 240**Prerequisites:** PLAS 131 or BIOS 101 or LIFE 120**Description:** Principles basic to the establishment, management, and utilization of forage crops and pastures. Plant identification and selection, seeding, fertilization, irrigation, forage quality and utilization, hay and silage preservation, and grazing management. The role of forages and ranges in developing a sustainable agriculture.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** FALL/SPR**Prerequisite for:** PLAS 340, RNGE 340, GRAS 340; PLAS 445, AGRO 845, ASCI 451, ASCI 851, RNGE 445, GRAS 445**PLAS 242 North American Wildland Plants****Crosslisted with:** RNGE 242, GRAS 242**Prerequisites:** Permission.**Notes:** PLAS/RNGE 240 recommended.**Description:** Identification and description of two-hundred important wildland plants of North America. Characteristics of these plants evaluated in terms of management implications.**Credit Hours:** 1**Max credits per semester:** 1**Max credits per degree:** 4**Grading Option:** Graded with Option**Offered:** FALL/SPR**PLAS 245 Introduction to Grassland Ecology and Management****Crosslisted with:** NRES 245**Prerequisites:** PLAS 153**Description:** Grassland ecology and management is relevant to students with education and career goals in managing natural resources in Nebraska and the Great Plains. About 50% of the land area in Nebraska is classified as grassland (or rangeland) and is the land type with the most opportunity for enhancing biodiversity and wildlife habitat. Applying ecological principles and social values to managing rangeland resources, students will develop a knowledge and appreciation for the various grassland management uses and techniques available to resource managers.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Prerequisite for:** PLAS 340, RNGE 340, GRAS 340**PLAS 255 Soil Health and Environment****Crosslisted with:** NRES 255, SOIL 255**Prerequisites:** SOIL 153**Description:** Develop a life-long interest in observing and studying soil health and ecosystems. Provide the necessary academic skills to incorporate soil health principles into real-world applications, including natural resource conservation, evaluation of regenerative practices, and promotion of environmental sustainability. Prepare professionals and advocates of soil ecosystems.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded**Offered:** FALL**Course and Laboratory Fee:** \$50**PLAS 261 Floral Design I****Description:** Principles, interpretation, and emotional responses of floral design. Explored and practical experience in all aspects of flower arranging. Includes floral product identification, care, handling, marketing and critiquing of floral designs.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** FALL/SPR**Prerequisite for:** PLAS 262**ACE:** ACE 7 Arts**Course and Laboratory Fee:** \$125

PLAS 262 Floral Design II**Prerequisites:** PLAS 261**Description:** Advanced styles of floral design, foliage plant care and retail shop layout, as well as practical business knowledge in managing a small business. Topics include personnel, advertising, sales and floral marketing.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** SPRING**Course and Laboratory Fee:** \$125**PLAS 265 Landscape Design Communication****Description:** Introduction to graphic and oral presentation and communication techniques for landscape design, based on design principles and elements. Includes demonstration and discussion of various media and technologies.**Credit Hours:** 1**Max credits per semester:** 1**Max credits per degree:** 1**Grading Option:** Graded with Option**Offered:** SPRING**Prerequisite for:** PLAS 267**Course and Laboratory Fee:** \$10**PLAS 267 Introduction to Landscape Design Studio****Prerequisites:** PLAS 265 or concurrent enrollment in PLAS 265**Notes:** Individual and team projects, in-class exercises and presentations, and site visits to urban landscapes will be a part of the course experience.**Description:** Process and elements used to design sustainable residential and small urban landscapes.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** SPRING**Prerequisite for:** PLAS 300; PLAS 301**Groups:** Techniques**PLAS 269 Principles of Soil Management****Crosslisted with:** SOIL 269**Prerequisites:** PLAS 153**Description:** Current state-of-knowledge of soil and water management; impacts of water and wind erosion on soil productivity, and nutrient dynamics; soil management in response to the increased climate variability; improved management practices such as conservation tillage (i.e., no-till), cropping systems, cover crops, crop residue management, perennial systems, water management and irrigation; nutrient cycling; and soil quality and health.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** FALL**Prerequisite for:** PLAS 405**PLAS 270 Biological Invaders****Crosslisted with:** NRES 270, PLPT 270**Prerequisites:** 3 hrs biological sciences.**Description:** Impact of exotic species and invasive organisms: agricultural and medical emerging disease; predicting biological invasions; biological control; regulatory, monitoring, and control efforts; ecological impact.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**PLAS 275 Agribusiness Entrepreneurial Finance****Crosslisted with:** AECN 275, EAEP 275, ENTR 275**Description:** Overview of financial issues for agribusiness start-ups. Business funding specific to new enterprises. Case studies on financial practices for start-up firms.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**PLAS 278 Botany****Prerequisites:** BIOS 101 or LIFE 120 or PLAS 131**Description:** Introduction to the plant kingdom and to plants as biological organisms; structure and function of cells, tissues, and organs with emphasis on seed plants; the important processes and concepts of life cycles, evolution, and physiology.**Credit Hours:** 4**Max credits per semester:** 4**Max credits per degree:** 4**Grading Option:** Graded with Option**Offered:** SPRING**Prerequisite for:** PLAS 227**Course and Laboratory Fee:** \$40**PLAS 279 Soil Evaluation****Crosslisted with:** NRES 279, SOIL 279**Notes:** PLAS/SOIL 153 recommended, but not required. This course includes an inter-collegiate Soil Judging contest that takes place in the North Central region of the United States during the course of the class, or a course-based undergraduate research experience.**Description:** Apply fundamental knowledge to the description of soils in the field. Application of techniques employed in writing descriptions of soil morphology and in classifying and interpreting soils.**Credit Hours:** 2**Max credits per semester:** 2**Max credits per degree:** 2**Grading Option:** Graded with Option**Offered:** FALL**Prerequisite for:** NRES 379, PLAS 379, SOIL 379**Course and Laboratory Fee:** \$100**Experiential Learning:** Fieldwork**PLAS 291 Special Topics in Plant and Landscape Systems****Prerequisites:** Permission.**Notes:** Requires advanced permission before registering for the course.**Description:** Topics vary.**Credit Hours:** 1-6**Min credits per semester:** 1**Max credits per semester:** 6**Max credits per degree:** 12**Grading Option:** Graded with Option**Offered:** FALL/SPR

PLAS 295 Internship**Crosslisted with:** RNGE 295, SOIL 295**Prerequisites:** Sophomore standing and completion of an internship contract. The internship contract is subject to approval by the department. Internships completed without a signed contract may not qualify for credit.**Notes:** Pass/No Pass only; requires advanced permission before registering for the course.**Description:** Professional experience in a plant, landscape or soil interest area. Experience may be with a business, government agency, organization, or a university research, extension, or teaching program.**Credit Hours:** 1-3**Min credits per semester:** 1**Max credits per semester:** 3**Max credits per degree:** 6**Grading Option:** Pass No Pass**Offered:** FALL/SPR**Experiential Learning:** Internship/Co-op**PLAS 300 Introduction to Landscape Construction****Prerequisites:** PLAS 267 or concurrent**Description:** Materials, systems, and methods for constructing sustainable residential and small urban landscapes. Includes site grading, hardscapes, irrigation, lighting, ponds and water features, using a combination of guest speakers, site visits and online resources.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** SPRING**Course and Laboratory Fee:** \$15**PLAS 301 Introduction to Landscape Contracting****Prerequisites:** PLAS 267 and PLAS 388 or concurrent**Notes:** Offered Spring of even years and alternate with PLAS 300.**Description:** Overview of the landscape contracting business and administration of contracts, cost estimation and bidding.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded**Offered:** SPRING**Groups:** Techniques**PLAS 302 Tree Biology****Crosslisted with:** NRES 302**Prerequisites:** BIOS 101 or LIFE 120 or PLAS 131**Description:** The study of the structure and function of woody plants, with a focus on trees growing in temperate climates. Covers the basics of wood physiology in terms of the biological, physical, and chemical processes utilized by tree to function. The anatomy and morphology of trees with a focus on the impacts of tree maintenance to the structure and function of landscape trees.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** FALL**PLAS 306 Greenhouse Practices and Management****Prerequisites:** PLAS 132 or PLAS 133 or PLAS 134 or LIFE 120**Description:** Principles and practices involved in the development, operation and use of greenhouses and other protected plant growth environments.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** SPRING**PLAS 307 Hydroponics for Growing Populations****Prerequisites:** PLAS 132 or PLAS 134 or PLAS 133 or LIFE 120**Description:** Globally diverse peoples are explored through culture, diets, food production systems, and environment with emphasis on the application of hydroponic plant production systems to address food needs that are culturally conscious. Hydroponic methodologies are investigated and prototypes are designed, built, and tested for proof of concept.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded**Offered:** FALL/SPR**ACE:** ACE 9 Global/Diversity**PLAS 319 Edible Landscapes****Prerequisites:** Junior Standing or permission**Description:** Identification, environmental requirements, and sustainable care and management of herbaceous perennial and woody plants with both edible and aesthetic landscape value. Historical and human cultural ties or ethnobotanical traditions associated with the plants will be utilized for appropriate plant selection and use.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** SPRING**ACE:** ACE 9 Global/Diversity**PLAS 321 Arboriculture: Maintenance & Selection of Landscape Trees****Crosslisted with:** NRES 321**Prerequisites:** Junior standing**Description:** Covers practical application of the science of tree growth, development, and management in human dominated landscapes. Tree selection for varying landscapes and objectives, proper planting and pruning, identification and correction of tree defects, and working with tree pest issues.**Credit Hours:** 4**Max credits per semester:** 4**Max credits per degree:** 4**Grading Option:** Graded with Option**Offered:** SPRING**Groups:** Laboratory and Field Training**Course and Laboratory Fee:** \$65

PLAS 325 Introductory Plant Physiology**Prerequisites:** PLAS 131 or LIFE 120**Description:** Introduction to physiological and developmental processes in plants. Topics include plant-water relations, photosynthesis, carbon metabolism and source-sink translocation, light responses, hormonal regulation during growth, development and environmental stresses such as drought, heat, salinity, flooding stress among others. Emphasizes the development of a broader knowledge of how crops respond to abiotic factors associated with changing climate through conceptual integration of physiological and molecular processes. Science communication skills and teamwork experience are developed through oral presentations and poster sessions.**Credit Hours:** 4**Max credits per semester:** 4**Max credits per degree:** 4**Grading Option:** Graded with Option**Offered:** SPRING**Prerequisite for:** PLAS 441, AGRO 841, HORT 841, RNGE 441, GRAS 441**PLAS 326 Landscape Management Solutions****Notes:** The course will include site visits, guest speakers and collaborations.**Description:** Use a problem-solving approach to identify and analyze landscape management situations in commercial, public, and residential landscapes. Focus will be on environmental assessment, human intent and function, seasonal and materials-specific best management practices applied to plants, hardscapes, pests and diseases to produce recommendations.**Credit Hours:** 4**Max credits per semester:** 4**Max credits per degree:** 4**Grading Option:** Graded with Option**Offered:** FALL**PLAS 327 Turfgrass Science and Management****Prerequisites:** PLAS/SOIL 153; CHEM 105A and 105L or CHEM 109A and 109L; and PLAS 227**Description:** Scientific principles of turf species adaptation, turf and/or soil relationships, establishment, fertility, mowing, irrigation, and pest control of turf species.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**PLAS 330 Pruning Ornamentals****Description:** Why, when and how to prune ornamental landscape plants. Demonstrations and field opportunities on how to choose and how to use pruning tools correctly.**Credit Hours:** 1**Max credits per semester:** 1**Max credits per degree:** 1**Grading Option:** Graded with Option**PLAS 340 Range Management and Improvement****Crosslisted with:** RNGE 340, GRAS 340**Prerequisites:** PLAS 240 or NRES 245**Description:** The principles of range management within the ecosystem framework. Range improvement practices and grazing systems; plant control using biological, chemical and mechanical factors; prescribed burning; range seeding; range fertilization; and the integration of range with other forage resources.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** SPRING**Prerequisite for:** PLAS 445, AGRO 845, ASCI 451, ASCI 851, RNGE 445, GRAS 445**PLAS 353 Vegetable Crop Production Laboratory****Prerequisites:** PLAS 131**Notes:** PLAS 133, PLAS 221, and PLAS 352 recommended.**Description:** Vegetable crop production principles and practices, both locally and from a global perspective. Experience with seeding, transplant production, and growing of vegetables in field and greenhouse.**Credit Hours:** 2**Max credits per semester:** 2**Max credits per degree:** 2**Grading Option:** Graded with Option**Offered:** FALL**Course and Laboratory Fee:** \$40**PLAS 355 Perennial, Pot and Bedding Plant Production Laboratory****Prerequisites:** PLAS 131**Notes:** PLAS 133, PLAS 221, and PLAS 352 recommended.**Description:** Growing conditions of specific perennial, annual, pot plants, cut flowers. How to schedule and cost account plant production. Care of post-production plants. Experience propagating and growing perennial, pot and bedding plants and cut flowers in the greenhouse.**Credit Hours:** 2**Max credits per semester:** 2**Max credits per degree:** 2**Grading Option:** Graded with Option**Offered:** FALL**Course and Laboratory Fee:** \$30**PLAS 356 Seasonal Plant Production****Prerequisites:** PLAS 133, 221**Description:** Methodology of plant production for seasonal ornamental and vegetable plants to meet the needs of the consumer horticulture industry. Supply procurement, product selection, asexual & seed propagation, young plant liners, plant culture & manipulation to meet qualities and market demand are explored. Crops are grown and marketed.**Credit Hours:** 2**Max credits per semester:** 2**Max credits per degree:** 2**Grading Option:** Graded**Offered:** SPRING

PLAS 361 Soils, Environment and Water Quality**Crosslisted with:** GEOL 361, NRES 361, SOIL 361**Prerequisites:** PLAS/SOIL 153; MATH 102 or 103; two semesters chemistry (CHEM 105A and 105L, CHEM 106A and 106L, CHEM 109A and 109L, CHEM 110A and 110L) and WATS/GEOG/NRES 281**Description:** Chemical and physical processes that influence the fate and transport of contaminants (inorganic, organic, microbial) in soil-water environments. Extent, fate, mitigation and impact of various sources of pollution. Remedial technologies used for environmental restoration of contaminated environments.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Prerequisite for:** PLAS 458, AGRO 858, NRES 458, NRES 858, SOIL 458**PLAS 366 Soil Nutrient Relationships****Crosslisted with:** SOIL 366**Prerequisites:** PLAS 153**Description:** Explores nutrient behaviors in soil and factors affecting nutrient management. Students work on developing fertilizer plans for complex plant production systems that follow the right place, right amount, right source, right time philosophy and ensure production of healthy and nutritious plants, improve profits and enterprise sustainability, fulfill legal requirements, and protect soil and water quality.**Credit Hours:** 4**Max credits per semester:** 4**Max credits per degree:** 4**Grading Option:** Graded with Option**Offered:** SPRING**Prerequisite for:** PLAS 405**PLAS 375 Innovations for Agriculture****Crosslisted with:** AGRI 375, EAEP 375**Prerequisites:** Junior or Senior class standing.**Description:** Explore sustainability challenges in plant and animal agricultural systems, assess current solutions, and identify opportunities for innovation. Research, develop, prototype, test, and pitch an innovative product, service, or technology for agriculture.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded**Offered:** FALL**PLAS 379 Advanced Soil Evaluation****Crosslisted with:** NRES 379, SOIL 379**Prerequisites:** PLAS/NRES/SOIL 279**Notes:** This course includes a national- or regional-level inter-collegiate Soil Judging contest that takes place during the course of the class.**Description:** Apply fundamental knowledge and improve field techniques to the description and interpretation of soils in the field. Application of techniques employed in writing descriptions of soil morphology and in classifying and interpreting soils.**Credit Hours:** 1**Max credits per semester:** 1**Max credits per degree:** 7**Grading Option:** Graded with Option**Offered:** FALL/SPR**Course and Laboratory Fee:** \$150**Experiential Learning:** Fieldwork**PLAS 388 Business Systems in Entrepreneurship****Crosslisted with:** ENTR 388, EAEP 388, ABUS 388**Description:** Introductory models for a startup business. Ideation, customer segments, value proposition, minimal viable product and market fit.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** FALL/SPR**Prerequisite for:** PLAS 301**PLAS 391A Special Topics in Agronomy****Prerequisites:** Permission.**Notes:** Requires advanced permission before registering for the course.**Description:** Topics vary.**Credit Hours:** 1-6**Min credits per semester:** 1**Max credits per semester:** 6**Max credits per degree:** 12**Grading Option:** Graded with Option**Offered:** FALL/SPR**PLAS 391B Special Topics in Horticulture****Prerequisites:** Permission.**Notes:** Requires advanced permission before registering for the course.**Description:** Topics vary.**Credit Hours:** 1-6**Min credits per semester:** 1**Max credits per semester:** 6**Max credits per degree:** 12**Grading Option:** Graded with Option**Offered:** FALL/SPR**PLAS 391L Special Topics in Landscape Design and Management****Prerequisites:** Permission.**Notes:** Requires advanced permission before registering for the course**Description:** Topics vary.**Credit Hours:** 1-6**Min credits per semester:** 1**Max credits per semester:** 6**Max credits per degree:** 12**Grading Option:** Graded with Option**Offered:** FALL/SPR**PLAS 391T Special Topics in Turfgrass Science and Management****Prerequisites:** Permission**Notes:** Requires advanced permission before registering for the course**Description:** Topics vary.**Credit Hours:** 1-6**Min credits per semester:** 1**Max credits per semester:** 6**Max credits per degree:** 12**Grading Option:** Graded with Option**Offered:** FALL/SPR

PLAS 395A Internship in Agronomy

Prerequisites: Junior standing or higher. Permission.

Notes: A contract with the instructor is required before the start of the internship for course credit. Two or more courses in Agronomy above the 200 level are strongly recommended.

Description: Advanced internship in an agronomic enterprise. Must be a business, government agency, organization, or university research, teaching, or extension program in which the student does not have previous internship credit.

Credit Hours: 1-3

Min credits per semester: 1

Max credits per semester: 3

Max credits per degree: 6

Grading Option: Pass No Pass

Offered: FALL/SPR

Experiential Learning: Internship/Co-op

PLAS 395B Internship in Horticulture

Prerequisites: Junior standing or higher. Permission.

Notes: A contract with the instructor is required before the start of the internship for course credit. Two or more courses in Horticulture above the 200 level are strongly recommended.

Description: Advanced internship experience in a horticulture enterprise. Must be a business, government agency, organization or university research, teaching, or extension program in which the student does not have previous internship credit.

Credit Hours: 1-3

Min credits per semester: 1

Max credits per semester: 3

Max credits per degree: 6

Grading Option: Pass No Pass

Offered: FALL/SPR

Experiential Learning: Internship/Co-op

PLAS 395M Internship in Landscape Design and Management

Prerequisites: Junior standing or higher. Permission.

Notes: A contract with the instructor is required before the start of the internship for course credit. Two or more courses in Landscape Design and Management above the 200 level are strongly recommended.

Description: Advanced professional experience in a landscape design and/or management enterprise. Experience must be with a business, government agency, organization, or a university research, extension, or teaching program in which the student does not have previous internship credit.

Credit Hours: 1-3

Min credits per semester: 1

Max credits per semester: 3

Max credits per degree: 6

Grading Option: Pass No Pass

Offered: FALL/SPR

Experiential Learning: Internship/Co-op

PLAS 395T Internship in Turfgrass Science and Management

Prerequisites: Junior standing or higher. Permission.

Notes: Pass/No Pass only; requires advanced permission before registering for the course.

Description: Advanced internship in a turfgrass science and management enterprise. Must be a business, government agency, organization, university research, teaching, or extension program in which the student does not have previous internship credit.

Credit Hours: 1-3

Min credits per semester: 1

Max credits per semester: 3

Max credits per degree: 6

Grading Option: Pass No Pass

Offered: FALL/SPR

Experiential Learning: Internship/Co-op

PLAS 398R Research Experiences in Grasslands

Crosslisted with: GRAS 398R, NRES 398R

Description: Scientific and research training and necessary soft skills for researchers, using grasslands as a study system. Provides individualized opportunities for engagement with scientific methods, which include experiential learning, acquisition and refinement of skills that enhance higher-learning opportunities, and increased marketability for future employment or postgraduate degrees.

Credit Hours: 1-3

Min credits per semester: 1

Max credits per semester: 3

Max credits per degree: 5

Grading Option: Graded

Offered: FALL

Experiential Learning: Research

PLAS 399 Independent Study

Prerequisites: Junior standing; 12 hrs plant science; and permission.

Notes: Requires advance approval of plan of work and is to be under the supervision and evaluation of a Horticulture departmental faculty member. Oral and written reports are mandatory at the completion of this Independent Study.

Description: Individual or group projects in research, literature review, or extension of course work.

Credit Hours: 1-5

Min credits per semester: 1

Max credits per semester: 5

Max credits per degree: 12

Grading Option: Graded with Option

PLAS 403 Scientific Writing and Communication

Crosslisted with: AGRO 803, HORT 803

Prerequisites: Senior standing or higher, an ACE 1 written communication course, an ACE 2 oral communication course, and permission of instructor.

Description: Reading and critiquing, writing, and presenting scientific information. Use research data to compose a manuscript in standard scientific format, and prepare and present a poster to a general audience. Ethical issues in research and writing.

Credit Hours: 3

Max credits per semester: 3

Max credits per degree: 3

Grading Option: Graded

ACE: ACE 10 Integrated Product

PLAS 405 Crop Management Strategies

Prerequisites: Senior standing; PLAS 204, PLAS/SOIL 269 or PLAS/SOIL 366; and permission.

Notes: JGEN 200 and/or JGEN 300, and AECN 201 recommended; a pre-semester trip is required.

Description: Application, expansion, and integration of principles from agricultural, economic and social sciences into systems-level the development and management of cropping systems.

Credit Hours: 3

Max credits per semester: 3

Max credits per degree: 3

Grading Option: Graded with Option

Offered: FALL

ACE: ACE 10 Integrated Product

Course and Laboratory Fee: \$60

PLAS 406 Plant Ecophysiology: Theory and Practice

Crosslisted with: AGRO 806, HORT 806, NRES 406, NRES 806

Prerequisites: Junior standing; 4 hrs ecology; and 4 hrs botany or plant physiology.

Description: Principles of plant physiology which underlie the relationship between plants and their physical, chemical and biotic environments. An introduction to the ecological niche, limiting factors and adaptation. An overview of the seed germination and ecology, plant and soil water relations, nutrients, plant energy budgets, photosynthesis, carbon balance and plant-animal interactions. An introduction to various field equipment used in ecophysiological studies.

Credit Hours: 4

Max credits per semester: 4

Max credits per degree: 4

Grading Option: Graded with Option

PLAS 407 Bio-Atmospheric Instrumentation

Crosslisted with: GEOG 469, METR 469, AGST 469, NRES 469, AGRO 869, GEOG 869, HORT 807, METR 869, AGST 869, NRES 869

Prerequisites: Junior standing; MATH 106; 4 hrs physics; physical or biological science major.

Description: Discussion and practical application of principles and practices of measuring meteorological and related variables near the earth's surface including temperature, humidity, precipitation, pressure, radiation and wind. Performance characteristics of sensors and modern data collection methods are discussed and evaluated.

Credit Hours: 3

Max credits per semester: 3

Max credits per degree: 3

Grading Option: Graded with Option

PLAS 408 Microclimate: The Biological Environment

Crosslisted with: GEOG 408, METR 408, NRES 408, AGRO 808, GEOG 808, HORT 808, METR 808, NRES 808

Prerequisites: Junior standing, MATH 106 or equivalent, 5 hrs physics, major in any of the physical or biological sciences or engineering.

Description: Physical factors that create the biological environment.

Radiation and energy balances of earth's surfaces, terrestrial and marine. Temperature, humidity, and wind regimes near the surface. Control of the physical environment through irrigation, windbreaks, frost protection, manipulation of light, and radiation. Applications to air pollution research. Instruments for measuring environmental conditions and remote sensing of the environment.

Credit Hours: 3

Max credits per semester: 3

Max credits per degree: 3

Grading Option: Graded with Option

Prerequisite for: BSEN 954, NRES 954

PLAS 409A Case studies in plant breeding: Breeding for Disease Resistance

Crosslisted with: AGRO 809A, HORT 809A

Notes: A previous class in genetics is highly recommended.

Description: The application of fundamental genetics principles in inheritance, gene mapping and DNA analysis to decision making by plant breeders with the goal of improving disease resistance in crop cultivars. Learning is structured by the genetics discovery story told in published research articles and the thinking process of plant breeders who will use these discoveries in their work.

Credit Hours: 1

Max credits per semester: 1

Max credits per degree: 1

Grading Option: Graded with Option

Offered: FALL/SPR

PLAS 409B Case Studies in plant breeding: Transgenic strategies for disease resistance

Crosslisted with: AGRO 809B, HORT 809B

Description: The application of basic science and technology by plant genetic engineering experts with the goal of teaming with plant breeders to improve disease resistance in crop cultivars. Learning is structured by the genetics discovery story told in published research articles and the thinking process of genetic engineers and plant breeders who will use these discoveries in their work.

Credit Hours: 1

Max credits per semester: 1

Max credits per degree: 1

Grading Option: Graded with Option

Offered: FALL/SPR

PLAS 410 Plant Molecular Biology

Crosslisted with: AGRO 810, BIOC 810, HORT 810, BIOC 410

Prerequisites: BIOS 201 or PLAS 215

Notes: LIFE 120 and BIOC 401 are suggested

Description: This course covers the molecular genetic basis of biological function in plants. Emphasis is on genetics (genome organization, gene structure and function, regulation of gene expression and genetic engineering) and molecular biology of the plant cell (cell compartments, cell reproduction, energy flow, reproductive development). The course uses published research articles in plant biology as primary learning resources.

Credit Hours: 3

Max credits per semester: 3

Max credits per degree: 3

Grading Option: Graded with Option

Offered: SPRING

PLAS 411 Crop Genetic Engineering

Crosslisted with: AGRO 811

Notes: A previous class in genetics is highly recommended.

Description: Basic steps required to produce genetically engineered crops, genetic engineering procedures used to develop current crops and innovations that will lead to future products, genetic engineering process and predicting how changes in different steps of the process influence the final crop, and application of genetic engineering technology to plan the development of new genetically engineered crops.

Credit Hours: 2

Max credits per semester: 2

Max credits per degree: 2

Grading Option: Graded with Option

Offered: FALL

PLAS 412 Crop and Weed Genetics

Crosslisted with: AGRO 812

Notes: A previous class in Genetics is highly recommended.

Description: Application of classical and molecular genetic principles to the explanation of variation observed in plant families and populations. Interpretation of information gathered from whole plant trait observation and from molecular analysis. Relationships between crops and weeds. Examples from genetic studies on both crop and weed species are the basis of course.

Credit Hours: 2

Max credits per semester: 2

Max credits per degree: 2

Grading Option: Graded with Option

Offered: SPRING

PLAS 414 Turfgrass Disease Management

Crosslisted with: AGRO 814, HORT 814, PLPT 414, PLPT 814, TLMT 814

Prerequisites: BIOS/PLPT 369 or one semester of introductory plant pathology.

Description: Pathogens, epidemiology, and control of diseases specific to turfgrass.

Credit Hours: 1

Max credits per semester: 1

Max credits per degree: 1

Grading Option: Graded with Option

PLAS 415 Applied Plant Breeding and Genetics

Crosslisted with: AGRO 815

Prerequisites: PLAS 215 or BIOS 201

Notes: For AGRO 815, a previous genetics course is highly recommended.

Description: The goals for plant improvement, the theories plant breeders apply to make genetic improvement and the tools and methods that can be used to develop a plant breeding pipeline.

Credit Hours: 3

Max credits per semester: 3

Max credits per degree: 3

Grading Option: Graded with Option

Offered: SPRING

Course and Laboratory Fee: \$40

PLAS 418 Agroforestry Systems in Sustainable Agriculture

Crosslisted with: HORT 818, NRES 417, NRES 817

Prerequisites: 12 hours biological or agricultural sciences.

Description: The roles of woody plants in sustainable agricultural systems of temperate regions. Emphasis on the ecological and economic benefits of trees and shrubs in the agricultural landscape. Topics include: habitat diversity and biological control; shelterbelts structure, function, benefits and design; intercropping systems; silvopastoral systems; riparian systems; and production of timber and specialty crops. Comparison of temperate agroforestry systems to those of tropical areas.

Credit Hours: 3

Max credits per semester: 3

Max credits per degree: 3

Grading Option: Graded with Option

PLAS 419 Applications of Remote Sensing in Agriculture and Natural Resources

Crosslisted with: GEOG 419, GEOL 419, NRES 420, AGRO 819, GEOG 819, GEOL 819, NRES 820

Prerequisites: Junior standing

Description: Introduction to the basic methods and practical applications of remote sensing to map, monitor and assess agricultural and natural resources and other environmental changes

Credit Hours: 4

Max credits per semester: 4

Max credits per degree: 4

Grading Option: Graded with Option

Course and Laboratory Fee: \$35

PLAS 420 Bioinformatics Applications in Agriculture

Crosslisted with: AGRO 820

Prerequisites: PLAS 215 or equivalent. Undergraduate students must be at the senior class level standing.

Description: Introduction to applied computational methods to analyze biological data, efficiently manipulate large data sets, and automate workflows. Learn strategies for assembling and analyzing data generated by modern high throughput sequencing platforms.

Credit Hours: 3

Max credits per semester: 3

Max credits per degree: 3

Grading Option: Graded with Option

Offered: FALL

PLAS 425 Cover Crops in Agroecosystems**Crosslisted with:** AGRO 825**Prerequisites:** PLAS 131 or PLAS 278 ; PLAS/SOIL 153 (or equivalent)**Description:** Explore the management, environmental, economic, and social considerations of cover crops across a diversity of agricultural production systems and regions. Grow cover crops, measure benefits and tradeoffs, and apply knowledge to make management and policy recommendations.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded**Offered:** FALL**PLAS 426 Invasive Plants****Crosslisted with:** AGRO 826, HORT 826, NRES 426, NRES 826**Prerequisites:** PLAS/SOIL 153; PLAS 131**Description:** Identification, biology and ecology of weedy and invasive plants. Principles of invasive plant management by preventative, cultural, biological, mechanical and chemical means using an adaptive management framework. Herbicide terminology and classification, plant-herbicide and soil-herbicide interactions, equipment calibration and dosage calculations.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** SPRING**PLAS 427 Turfgrass Systems Management****Crosslisted with:** AGRO 827, HORT 827, TLMT 827**Prerequisites:** PLAS 227 and PLAS 327**Description:** Critical evaluation of turfgrass settings to create economical and environmentally friendly management systems for professionally managed turf areas.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**ACE:** ACE 10 Integrated Product**Course and Laboratory Fee:** \$50**PLAS 429 Plant Biotechnology Applications****Crosslisted with:** AGRO 829**Prerequisites:** Faculty Permission**Description:** Application of plant biotechnology to answer biological questions. Development of writing and thinking skills with a working knowledge of plant biology and biotechnology. Learning in a lab focused setting to solidify skills used in molecular biology, biochemistry, cell biology, and computational biology.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded**Offered:** SPRING**Course and Laboratory Fee:** \$40**PLAS 429A Food Security: A Global Perspective****Crosslisted with:** AGRO 829A, HORT 829A, NRES 429A, NRES 829A, NUTR 429A, NUTR 829A**Prerequisites:** Junior standing**Description:** Overview of the technical and sociocultural dimensions of global food insecurity.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**PLAS 430 Introduction to Plant Diagnostics****Crosslisted with:** AGRO 830, HORT 830, PLPT 830**Prerequisites:** PLAS 131 or LIFE 121 and ENTO 105 or ENTO 115 and PLPT 210**Description:** Presents a broad view of the various challenges to plant health including abiotic and biotic disease, insects, and weeds. Learn a systematic approach to the diagnosis of plant disorders through hands-on exercises and case studies with application to agronomic and specialty crops and gain experience in presenting their findings to various audiences.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**PLAS 431 Site-specific Crop Management****Crosslisted with:** AGEN 431, AGST 431**Prerequisites:** Senior standing; PLAS/SOIL 153; PLAS 204.**Description:** Principles and concepts of site-specific management. Evaluation of geographic information systems for crop production practices. Practical experience with hardware and software necessary for successful application of information affecting crop management.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**PLAS 433 Permaculture: Sustainable Living****Crosslisted with:** HORT 833**Notes:** This is a Great Plains IDEA course. Restricted to upper level undergraduate, graduate, or matriculated continuing education students.**Description:** Permaculture means "permanent culture," and "...is the conscious design and maintenance of cultivated ecosystems that have the diversity, stability, and resilience of a natural ecosystem." [Bill Mollison] This course will explore a design/thinking methodology that seeks to provide our essential physical needs, food, water, shelter, energy, etc., while doing so in an environmentally friendly, sustainable manner.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option

PLAS 434 Plant Biochemistry

Crosslisted with: BIOC 434, BIOS 434, CHEM 434, AGRO 834, BIOC 834, BIOS 834, CHEM 834

Prerequisites: BIOC/BIOS/CHEM 431/831.

Description: Biochemical metabolism unique to plants. Relationships of topics previously acquired in general biochemistry to biochemical processes unique to plants. Biochemical mechanisms behind physiological processes discussed in plant or crop physiology.

Credit Hours: 3

Max credits per semester: 3

Max credits per degree: 3

Grading Option: Graded with Option

PLAS 435 Agroecology

Crosslisted with: AGRO 835, NRES 435, NRES 835

Prerequisites: For PLAS/NRES 435: Senior standing. For AGRO/NRES 835: 12 hrs biological or agricultural sciences.

Description: Integration of principles of ecology, plant and animal sciences, crop protection, and rural landscape planning and management for sustainable agriculture. Includes natural and cultivated ecosystems, population and community ecology, nutrient cycling, pest management, hydrologic cycles, cropping and grazing systems, landscape ecology, biodiversity, and socioeconomic evaluation of systems.

Credit Hours: 3

Max credits per semester: 3

Max credits per degree: 3

Grading Option: Graded with Option

ACE: ACE 10 Integrated Product

PLAS 436 Agroecosystems Analysis

Crosslisted with: AGRO 836, HORT 836

Prerequisites: Senior standing.

Notes: Cost of travel required. Summer travel course with multi-state faculty. Farm visits to Iowa, Minnesota and Nebraska.

Description: Analysis of production, economics, environmental impacts, and social integration aspects of farms and farming systems

Credit Hours: 3

Max credits per semester: 3

Max credits per degree: 3

Grading Option: Graded with Option

PLAS 437 Animal, Food and Industrial Uses of Grain

Crosslisted with: AGRO 837

Prerequisites: CHEM 105A and CHEM 105L or CHEM 109A and 109L, and one of the following: PLAS 204 or ASCI 250.

Description: Identification and comparison of grain quality characteristics desired by livestock feeders, human food processors and industrial users, and methods used to measure these characteristics.

Credit Hours: 2

Max credits per semester: 2

Max credits per degree: 2

Grading Option: Graded with Option

PLAS 438 Producing Grain for Animal, Food and Industrial Uses

Crosslisted with: AGRO 838

Prerequisites: CHEM 109A and 109L and one of the following: PLAS 204 or ASCI 250.

Notes: PLAS 215 and PLAS 437/837 recommended.

Description: Genetic development, production practices, and grain handling and storage procedures to deliver quality grain to livestock feeders, human food processors and industrial uses.

Credit Hours: 1

Max credits per semester: 1

Max credits per degree: 1

Grading Option: Graded with Option

PLAS 439 Organic Farming and Food Systems

Crosslisted with: AGRO 839, HORT 839

Prerequisites: 12 credits of agricultural or biological science, economics, or natural resources

Description: History of organic farming and horticultural systems, organic certification, nutrient and pest management in organic systems, planning organic enterprises including production and marketing, resilience of organic systems in ecological, economic, and social terms; future issues and potentials of organic food systems.

Credit Hours: 3

Max credits per semester: 3

Max credits per degree: 3

Grading Option: Graded with Option

PLAS 440 Great Plains Ecosystem

Crosslisted with: AGRO 840, NRES 840, RNGE 440, NRES 440, GRAS 440

Prerequisites: Junior standing.

Description: Characteristics of Great Plains ecosystems, interrelationships of ecological factors and processes, and their application in the management of grasslands. Interactions of fire, vegetation, grazing animals and wildlife.

Credit Hours: 3

Max credits per semester: 3

Max credits per degree: 3

Grading Option: Graded with Option

Offered: SPRING

PLAS 441 Perennial Plant Function, Growth, and Development

Crosslisted with: AGRO 841, HORT 841, RNGE 441, GRAS 441

Prerequisites: PLAS 325 or equivalent.

Description: Principles of crop physiology and developmental morphology in relation to function, growth, development, and survival of perennial forage, range, and turf plants. The relationship of physiology and morphological development on plant use and management.

Credit Hours: 3

Max credits per semester: 3

Max credits per degree: 3

Grading Option: Graded with Option

Offered: SPRING

PLAS 442 Wildland Plants**Crosslisted with:** AGRO 842, NRES 842, RNGE 442, NRES 442, GRAS 442**Prerequisites:** Junior standing.**Notes:** PLAS 131 or LIFE 121 and 121L or equivalent recommended**Description:** Wildland plants that are important to grassland and shrubland ecosystem management and production. Distribution, utilization, classification, identification (including identification by vegetative parts), uses by Native Americans, and recognition of grasses, forbs, shrubs, exotic and wetland plants.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** FALL**PLAS 444 Ecosystem Monitoring and Assessment****Crosslisted with:** AGRO 844, NRES 844, RNGE 444, NRES 444, GRAS 444**Prerequisites:** Junior standing.**Notes:** NRES 220 or equivalent, recommended.**Description:** Measurement and monitoring of the important vegetation and environmental factors used to develop management guidelines in grasslands, savannas, woodlands, and wetlands. Emphasis on using ecosystem monitoring protocols for assessment of wildlife habitat, fuels management for wild-land fire, livestock production, and watershed function. Requires field sampling and travel to local field sites.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** FALL**PLAS 445 Livestock Management on Range and Pasture****Crosslisted with:** AGRO 845, ASCI 451, ASCI 851, RNGE 445, GRAS 445**Prerequisites:** ASCI 250 and PLAS 240 or PLAS 340**Notes:** AECN 201 recommended. Capstone course. All students required to participate in a one-week field trip in central or western Nebraska prior to beginning of fall semester. Therefore, students must notify instructor at time of early registration (Dates are given in class schedule.)**Description:** Analyzing the plant and animal resources and economic aspects of pasturage. Management of pasture and range for continued high production emphasized.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** FALL**ACE:** ACE 10 Integrated Product**Course and Laboratory Fee:** \$300**PLAS 450 Climate and Society****Crosslisted with:** GEOG 450, METR 450, NRES 452, AGRO 850, GEOG 850, METR 850, NRES 852**Prerequisites:** Junior standing or above.**Notes:** Offered spring semester of even-numbered calendar years.**Description:** Impact of climate and extreme climatic events on society and societal responses to those events. Global in scope and interdisciplinary.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** SPRING**PLAS 452 Irrigation Systems Management****Crosslisted with:** AGST 452, AGST 852**Prerequisites:** AGST 109 or PHYS 141 or PHYS 151 or PHYS 211**Notes:** PLAS/SOIL 153 recommended.**Description:** Irrigation management and the selection, evaluation, and improvement of irrigation systems. Includes soil-water measurement, crop water use, irrigation scheduling, irrigation efficiency, measurement of water flow, irrigation systems, groundwater and wells, pumping systems, applying chemicals with irrigation systems, and environmental and water resource considerations.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** FALL**Prerequisite for:** AGEN 854, AGST 854; AGST 855**PLAS 453 Urban Soil Properties and Management****Crosslisted with:** LARC 453, SOIL 453**Prerequisites:** PLAS/SOIL 153**Description:** Characteristics of soils in urban settings. Evaluation of soils intended for intensive human uses and strategies for their use. Identification of specific issues related to urban soils. Manipulation or remediation of soils subject to construction and other stresses.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** SPRING**PLAS 454 Specialty Crop Innovations****Crosslisted with:** AGRO 854, HORT 854**Prerequisites:** Junior standing; PLAS 100, 131, 153**Description:** Learn state-of-the-art, scale-appropriate methods for growing and marketing specialty crops like fruits, vegetables, and cut flowers in field and high-tunnel production systems. Test innovative products and systems of your own design to gain a competitive advantage in local markets.**Credit Hours:** 4**Max credits per semester:** 4**Max credits per degree:** 4**Grading Option:** Graded**Offered:** SPRING**PLAS 455 Soil Chemistry and Mineralogy****Crosslisted with:** AGRO 855, NRES 455, NRES 855, SOIL 455**Prerequisites:** PLAS/SOIL 153 or GEOL 101; CHEM 109A/L and CHEM 110A/L; CHEM 221 or CHEM 221A & CHEM 221L or 251.**Description:** Chemical and mineralogical properties of soil components. Inorganic colloidal fraction. Structures of soil minerals as a means of understanding properties, such as ion exchange and equilibria; release and supply of nutrient and toxic materials; and soil acidity and alkalinity. Forms and functions of organic matter in soil.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** SPRING

PLAS 457 Green Space and Urban Forestry Management

Crosslisted with: NRES 457, NRES 857

Prerequisites: Junior or senior standing, Graduate student or permission

Description: A focus on the management of trees, parks, and green infrastructure in rural and urban communities. Perspectives from community planning, landscape architecture, urban forestry, natural resources, horticulture, and environmental policy. Development and implementation of green space and forest management plans encompassing societal needs and biological limitations in rural and urban communities.

Credit Hours: 3

Max credits per semester: 3

Max credits per degree: 3

Grading Option: Graded with Option

Offered: SPRING

ACE: ACE 10 Integrated Product

PLAS 458 Soil Physical Determinations

Crosslisted with: AGRO 858, NRES 458, NRES 858, SOIL 458

Prerequisites: SOIL/PLAS/GEOL/WATS 361; PHYS 141 or equivalent; MATH 102 or 103.

Description: Survey of measurement techniques and principles used in characterizing the physical properties of soils. Includes analysis of experimental design and sources of experimental error. Techniques include: particle size analysis, soil water content, pore size analysis, field sampling techniques, soil strength, and saturated hydraulic conductivity.

Credit Hours: 2

Max credits per semester: 2

Max credits per degree: 2

Grading Option: Graded with Option

PLAS 460 Soil Microbial Ecology

Crosslisted with: BIOS 460, NRES 460, SOIL 460, AGRO 860, BIOS 860, NRES 860

Prerequisites: Senior standing.

Notes: Recommend having a strong science background, including courses from the agronomic, environmental, microbiology, engineering or medicine disciplines.

Description: Soil from a microbe's perspective-growth, activity and survival strategies; principles governing methods to study microorganisms and biochemical processes in soil; mechanisms controlling organic matter cycling and stabilization with reference to C, N, S, and P; microbial interactions with plants and animals; and agronomic and environmental applications of soil microorganisms.

Credit Hours: 3

Max credits per semester: 3

Max credits per degree: 3

Grading Option: Graded with Option

Offered: SPRING

PLAS 461 Soil Physics

Crosslisted with: NRES 461, SOIL 461, AGRO 861, NRES 861

Prerequisites: PLAS/SOIL 153; PHYS 141 or equivalent, one semester of calculus.

Description: Principles of soil physics. Movement of water, air, heat, and solutes in soils. Water retention and movement, including infiltration and field water regime. Movement of chemicals in soils.

Credit Hours: 3

Max credits per semester: 3

Max credits per degree: 3

Grading Option: Graded with Option

PLAS 462 Cannabis Growth, Production and Breeding Basics

Crosslisted with: AGRO 862, HORT 862

Prerequisites: PLAS 131 or LIFE 121; PLAS 215 or BIOS 201

Notes: PLAS 221 recommended

Description: History, breeding and production of cannabis for medicinal marijuana and hemp for fiber use when grown using a growth room, greenhouse, high tunnel and/or field. Clarification between scientific evidence and casual information.

Credit Hours: 2

Max credits per semester: 2

Max credits per degree: 2

Grading Option: Graded

Offered: FALL/SPR

PLAS 467 Planting Design

Crosslisted with: ARCH 467, ARCH 567, ARCH 867, LARC 467

Description: Processes, principles, and elements using plant materials as a key component of landscapes designed for human intent. Focus is on a systems approach, combining environmental attributes with functional needs to create aesthetic, functional, and sustainable landscapes for parks, commercial property, and residences using a combination of site visits and online resources.

Credit Hours: 4

Max credits per semester: 4

Max credits per degree: 4

Grading Option: Graded with Option

Offered: FALL

Course and Laboratory Fee: \$25

PLAS 469 Ecological Landscape Design

Crosslisted with: ARCH 469

Prerequisites: Permission

Description: Integration of ecological and environmental assessment, design process and management considerations to create detailed landscape plans for public, private, and commercial clients. Includes dream landscape project. Individuals and collaborative teams will develop concepts and details, conduct client meetings and studio critiques, and communicate graphically and verbally through presentations.

Credit Hours: 4

Max credits per semester: 4

Max credits per degree: 4

Grading Option: Graded with Option

Offered: SPRING

ACE: ACE 10 Integrated Product

Course and Laboratory Fee: \$25

PLAS 470 Critical Thinking in Landscape Management

Prerequisites: PLAS 228

Description: Use processes and strategies to develop complete landscape management plans for public and/or private clients. Use data to evaluate and compare issues; make practical, science-based recommendations; and prepare cost estimates. Develop and present a complete landscape management plan for a public client.

Credit Hours: 3

Max credits per semester: 3

Max credits per degree: 3

Grading Option: Graded with Option

Offered: SPRING

ACE: ACE 10 Integrated Product

Course and Laboratory Fee: \$25

PLAS 471 Vines, Wines and You**Crosslisted with:** HORT 871, NUTR 471, NUTR 871, HRTM 471, HRTM 871**Prerequisites:** 6 hrs science or equivalent experience; 21 years of age or older**Notes:** Proof of age is required.**Description:** Origin, botany, historical and cultural significance of the grapevine and related species. Principles and practices of vineyard establishment, management and processing of grape products, importance and/or scope of grape and wine industry; global and local significance. Culinary applications, health, environmental and safety-related issues, business and industry relations and experience.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Course and Laboratory Fee:** \$95**PLAS 472 Applied Soil Physics****Crosslisted with:** AGRO 872, NRES 472, NRES 872, SOIL 472**Prerequisites:** PLAS/SOIL 153; MATH 102 or MATH 104 or MATH 106.**Description:** Emphasis on applied soil physics. Discussion of theoretical principles followed by field and laboratory exercises and applications. Fluxes of water, solutes, air, and heat through the soil. Emphasis on water infiltration, water retention, other soil hydraulic properties. Components of soil water balance. Management of soil water.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** FALL**PLAS 475 Water Quality Strategy****Crosslisted with:** NRES 475, NRES 875, SOIL 475, AGRO 875, CIVE 475, CIVE 875, CRPL 475, CRPL 875, GEOL 475, GEOL 875, AGST 475, AGST 875**Prerequisites:** Senior undergraduate or graduate student status.**Notes:** Capstone course.**Description:** Introduces methods to identify, analyze, strategize, justify and develop planning approaches to protect water quality from nonpoint source contamination. Focuses on identifying present water quality issues and situations, investigating adverse impacts on whole systems and subsystems over time, developing effective planning strategies, and assessing strategy effectiveness.**Credit Hours:** 3**Max credits per semester:** 3**Max credits per degree:** 3**Grading Option:** Graded with Option**Offered:** SPRING**ACE:** ACE 10 Integrated Product**PLAS 477 Great Plains Field Pedology****Crosslisted with:** GEOG 467, NRES 477, SOIL 477, GEOG 867, NRES 877**Prerequisites:** PLAS/SOIL 153.**Description:** Spatial relationship of soil properties on various parts of landscape typical of the Plains, causal factors, and predictions of such relationships on other landscapes. Grouping these properties into classes, naming the classes, and the taxonomy that results from this grouping. Application of a taxonomy to a real situation through making a field soil survey in a region representative of the Plains border, predicting land use response of various mapped units as it affects the ecosystem, and evaluating the effectiveness of the taxonomic system used in the region surveyed.**Credit Hours:** 4**Max credits per semester:** 4**Max credits per degree:** 4**Grading Option:** Graded with Option**Course and Laboratory Fee:** \$80**PLAS 478 Plant Anatomy****Crosslisted with:** BIOS 478, BIOS 878, AGRO 878, HORT 878**Prerequisites:** 8 hrs biological sciences**Description:** Development, structure, and function of tissues and organs of the higher plants. Relationships of structure to physiology and ecology of plants.**Credit Hours:** 4**Max credits per semester:** 4**Max credits per degree:** 4**Grading Option:** Graded with Option**PLAS 480 Modified Root Zones****Crosslisted with:** TLMT 880, AGRO 880, HORT 880**Prerequisites:** PLAS 153/SOIL 153**Notes:** Recommend CHEM 105A/CHEM 105L or CHEM 109A/CHEM 109L, PLAS 131, PLAS 227, and PLAS 453 or PLAS 472**Description:** Modified root zones and their applications in the turfgrass and landscape management industry. Correct applications and construction techniques.**Credit Hours:** 1**Max credits per semester:** 1**Max credits per degree:** 1**Grading Option:** Graded with Option**Offered:** SPRING**PLAS 484 Water Resources Seminar****Crosslisted with:** GEOG 484, GEOL 484, NRES 484, NRES 884, AGRO 884, GEOG 884, GEOL 884**Prerequisites:** Junior or above standing**Description:** Seminar on current water resources research and issues in Nebraska and the region.**Credit Hours:** 1**Max credits per semester:** 1**Max credits per degree:** 1**Grading Option:** Graded with Option

PLAS 488 Entrepreneurship and Enterprise Development

Crosslisted with: HORT 888, EAEP 488, ENTR 488, EAEP 888, AGRO 888, ENTR 888, ABUS 488

Description: The process of starting your own enterprise. Competitive environment, risk management, finance for business startups, funding, and business plan writing.

Credit Hours: 3

Max credits per semester: 3

Max credits per degree: 3

Grading Option: Graded with Option

Offered: FALL/SPR

ACE: ACE 10 Integrated Product

PLAS 489 Urbanization of Rural Landscapes

Crosslisted with: AGRO 889, CRPL 489, HORT 889, CRPL 889

Prerequisites: Senior standing or graduate standing.

Description: Development converts rural landscapes into housing, roads, malls, parks, and commercial uses. This process fragments landscapes and changes ecosystem functions, drives up land prices, and pushes agriculture into more marginal areas. This multi-disciplinary, experiential course guides students in learning about the urbanization process, the impacts on landscapes, people, and the community, and the choices that are available to informed citizens.

Credit Hours: 3

Max credits per semester: 3

Max credits per degree: 3

Grading Option: Graded with Option

PLAS 495 Grasslands Seminar

Crosslisted with: ENTO 495, GRAS 495, NRES 495, RNGE 495, SOIL 495

Prerequisites: Junior standing.

Description: Topic varies and deals with different aspects of forage and/or range and/or livestock, turf and/or landscape grasses, natural habitats, and wetlands.

Credit Hours: 1-2

Min credits per semester: 1

Max credits per semester: 2

Max credits per degree: 4

Grading Option: Graded with Option

PLAS 496 Independent Study

Crosslisted with: AGRO 896, RNGE 496, SOIL 496

Credit Hours: 1-6

Min credits per semester: 1

Max credits per semester: 6

Max credits per degree: 12

Grading Option: Graded with Option

Course and Laboratory Fee: \$50

PLAS 498 Senior Project

Crosslisted with: SOIL 498

Prerequisites: Senior standing.

Notes: A two-semester sequence. Students should select one credit hour the first semester and three credits the second semester. The first semester will be used for planning, topic selection, and identifying a project adviser. The second semester will be used to carry out the research project, prepare a written report, and possibly an oral presentation.

Description: Carry out and report on a research project.

Credit Hours: 1-3

Min credits per semester: 1

Max credits per semester: 3

Max credits per degree: 3

Grading Option: Graded with Option

PLAS 499H Honors Thesis

Crosslisted with: RNGE 499H, SOIL 499H

Prerequisites: Admission to the University Honors Program and permission.

Notes: AGRI 299H recommended.

Description: Conduct a scholarly research project and write a University Honors Program or undergraduate thesis.

Credit Hours: 3-6

Min credits per semester: 3

Max credits per semester: 6

Max credits per degree: 6

Grading Option: Graded

Career Information

The following represents a sample of the internships, jobs and graduate school programs that current students and recent graduates have reported.

Jobs of Recent Graduates

- Crop Consultant, Central Valley Ag - Oakland, NE
- Agronomist, Stuart Fertilizer - Stuart, NE
- Sales Agronomist, Vrbka Ag Solutions - Shelby, NE
- Chemical Representative, Dow AgroSciences - Sioux Falls, SD
- Agronomy Sales Representative, CHS Inc. - Dixon, NE
- Fertilizer Sales and Production, Ag Elements - Lubbock, TX
- District Sales Manager, AgReliant - Lincoln, NE
- Farmer, Benes Service - Valparaiso, NE
- Soil Conservationist, NRCS - Grant, NE
- Research Technician, University of Nebraska-Lincoln - Lincoln, NE

Internships

- Crop Consultant, KC Consulting - Enola, NE
- Marketing Intern, Helena Chemical - Lincoln, NE
- Crop Scouting, Scientific Crop Advisory - Geneva, NE
- Marketing/Sales Intern, WinField Solutions - Kearney, NE
- Hybrid Researcher, Hahn Farms - DeWitt, NE
- Research/Sales Intern, Channel Seeds - Scottsbluff, NE
- Greenhouse Technician, University of Nebraska-Lincoln - Lincoln, NE
