ENERGY SCIENCE MINOR

Description
Website: http://energysciences.unl.edu

The energy science minor is designed to offer an educational component to University of Nebraska students that will prepare them with the knowledge, expertise, and background to successfully compete for positions with companies that are producing or developing renewable energy sources or conventional fossil fuels sources or with organizations that manage energy use or the environmental impacts of energy use. The minor is for students who desire a broad understanding of energy-related issues and an in-depth knowledge of energy in one or more of four elective thematic areas as well as for those seeking employment in agriculture, business/industry, communication, transportation, and government.

Courses of Instruction (ENSC)
Courses suitable for automatic inclusion in one of the four elective thematic areas have been identified and can be viewed at the website http://energysciences.unl.edu/tracks. Any of the ENSC courses can be taken independently as desired by any student.

A student in consultation with an academic advisor will submit a “College-Degree-Major-Advisor Change Form” (CDMA) declaring their intent to complete the minor before the deadline for submitting the application for graduation. The degree audit system of the University Registrar will evaluate whether the appropriate courses have been taken for completion of the minor. The minor will be recorded on the student's transcript upon graduation.

College Requirements

College Admission
Requirements for admission into the College of Agricultural Sciences and Natural Resources (CASNR) are consistent with general University admission requirements (one unit equals one high school year): 4 units of English, 4 units of mathematics, 3 units of natural sciences, 3 units of social studies, and 2 units of foreign language. Students must also meet performance requirements (ACT composite of 20 or higher OR combined SAT score of 950 or higher OR rank in the top one-half of graduating class; transfer students must have a 2.0 (on a 4.0 scale) cumulative grade point average and 2.0 on the most recent term of attendance. For students entering the PGA Golf Management degree program, a certified golf handicap of 12 or better (e.g., USGA handicap card) or written ability (MS Word file) equivalent to a 12 or better handicap by a PGA professional or high school golf coach is required. For more information, please visit: http://pgm.unl.edu/requirements.

Admission Deficiencies/Removal of Deficiencies
Students who are admitted to CASNR with core course deficiencies must remove these deficiencies within the first 30 credit hours at the University of Nebraska–Lincoln, or within the first calendar year at Nebraska, whichever takes longer, excluding foreign languages. Students have up to 60 credit hours to remove foreign language deficiencies. College-level coursework taken to remove deficiencies may be used to meet degree requirements in CASNR.

Deficiencies in the required entrance subjects can be removed by completion of specified courses in the University or by correspondence.

The Office of Admissions, Alexander Building (south entrance), City Campus, provides information to new students on how deficiencies can be removed.

College Degree Requirements

Curriculum Requirements
The curriculum requirements of the College consist of three areas: ACE (Achievement-Centered Education); College of Agricultural Sciences and Natural Resources Core; and Degree Program requirements and electives. All three areas of the College Curriculum Requirements are incorporated within the description of the Major/Degree Program sections of the catalog. The individual major/degree program listings of classes insures that a student will meet the minimum curriculum requirements of the College.

Foreign Languages/Language Requirement
Two units of a foreign language are required. This requirement is usually met with two years of high school language.

Minimum Hours Required for Graduation
The College grants the bachelors degree in programs associated with agricultural sciences, natural resources and related programs. Students working toward a degree must earn at least 120 semester hours of credit. A minimum cumulative grade point average of C (2.0 on a 4.0 scale) must be maintained throughout the course of studies and is required for graduation. Some degree programs have a higher cumulative grade point average required for graduation. Please check the degree program on its graduation cumulative grade point average.

Grade Rules
Removal of C-, D and F Grades
Only the most recent letter grade received in a given course will be used in computing a student's cumulative grade point average if the student has completed the course more than once and previously received a grade or grades below C in that course.

The previous grade (or grades) will not be used in the computation of the cumulative grade point average, but it will remain a part of the academic record and will appear on any transcript.

A student can remove from his/her cumulative average a course grade of C-, D+, D, D- or F if the student repeats the same course at the University of Nebraska and receives a grade other than P (pass), I (incomplete), N (no pass), W (withdrew), or NR (no report). If a course is no longer being offered, it is not eligible for the revised grade point average computation process.

For complete procedures and regulations, see the Office of the University Registrar website at http://www.unl.edu/regrec/course-repeats.

Pass/No Pass
Students in CASNR may take any course offered on a Pass/No Pass basis within the 24-hour limitation established by the Faculty Senate. However, a department may specify that the Pass/No Pass status of its courses be limited to non-majors or may choose to offer some courses for letter grades only.

GPA Requirements
A minimum cumulative grade point average of C (2.0 on a 4.0 scale) must be maintained throughout the course of studies and is required for graduation. Some degree programs have a higher cumulative grade point
average required for graduation. Please check the degree program on its graduation cumulative grade point average.

Transfer Credit Rules
To be considered for admission, a transfer student, Nebraska resident or nonresident, must have an accumulated average of C (2.0 on a 4.0 scale) and a minimum C average in the last semester of attendance at another college. Transfer students who have completed less than 12 credit hours of college study must submit either ACT or SAT scores.

Ordinarily, credits earned at an accredited college are accepted by the University. The College, however, will evaluate all hours submitted on an application for transfer and reserves the right to accept or reject any of them. Sixty (60) is the maximum number of hours the University will accept on transfer from a two-year college. Ninety (90) is the maximum number of hours the University will accept from a four-year college. Transfer credit in the degree program must be approved by the degree program advisor on a Request for Substitution Form to meet specific course requirements, group requirements, or course level requirements in the major. At least 9 hours in the major field, including the capstone course, must be completed at the University of Nebraska–Lincoln regardless of the number of hours transferred.

The College will accept no more than 10 semester hours of C-, D+, D and D- grades from other schools. The C-, D+, D and D- grades can only be applied to free electives. This policy does not apply to the transfer of grades from UNO or UNK to the University of Nebraska–Lincoln.

Joint Academic Transfer Programs
The College of Agricultural Sciences and Natural Resources has agreements with many institutions to support joint academic programs. The transfer programs include dual degree programs and cooperative degree programs. Dual degree programs offer students the opportunity to receive a degree from a participating institution and also to complete requirements for a bachelor of science degree in CASNR. Cooperative programs result in a single degree from either the University of Nebraska–Lincoln or the cooperating institution.

Dual Degree Programs
A to B Programs
The A to B Program, a joint academic program offered by the CASNR and participating community colleges, allows students to complete the first two years of a degree program at the participating community college and continue their education and study in a degree program leading toward a bachelor of science degree.

The A to B Program provides a basic knowledge plus specialized coursework. Students transfer into CASNR with junior standing.

Depending on the community college, students enrolled in the A to B Program may complete the requirements for an associate of science at the community college, transfer to the University of Nebraska–Lincoln, and work toward a bachelor of science degree.

Participating community colleges include:

- Central Community College
- Metropolitan Community College
- Mid-Plains Community College
- Nebraska College of Technical Agriculture
- Northeast Community College

- Southeast Community College
- Western Nebraska Community College

3+2 Programs
Two specialized degree programs in animal science and veterinary science are offered jointly with an accredited college or school of veterinary medicine. These two programs permit CASNR animal science or veterinary science students to receive a bachelor of science degree from the University of Nebraska—Lincoln with a degree in animal science or veterinary science after successfully completing two years of the professional curriculum in veterinary medicine at an accredited veterinary school. Students who successfully complete the 3+2 Program, must complete the Application for Degree form and provide transcripts to the Credentials Clerk, Office of the University Registrar, 107 Canfield Administration Building. Students should discuss these degree programs with their academic advisor.

Cooperative Degree Programs
Academic credit from the University and a cooperating institution is applied towards a four-year degree from either the University of Nebraska–Lincoln (University degree-granting program) or the cooperating institution (non University degree-granting program). All have approved programs of study.

UNL Degree-Granting Programs
A University of Nebraska–Lincoln degree-granting program is designed to provide students the opportunity to complete a two-year program of study at one of the four-year institutions listed below, transfer to CASNR and complete the requirements for a bachelor of science degree.

Chadron State College. Chadron State College offers a 2+2 program leading to a grassland ecology and management degree program and a transfer program leading to a bachelor of science in agricultural education in the teaching option.

Wayne State College. Wayne State College offers a 3+1 program leading to a bachelor of science in plant biology in the ecology and management option.

University of Nebraska at Keene. Transfer programs are available for students pursuing degree programs leading to a bachelor of science degree.

University of Nebraska at Omaha. The University of Nebraska at Omaha (UNO) cooperates with CASNR in providing four-semester pre-agricultural sciences, pre-natural resources, pre-food science and technology, pre-horticulture and pre-turfgrass and landscape management transfer programs.

A student enrolled in these programs may transfer all satisfactorily completed academic credits identified in the suggested program of study, and enter CASNR to study toward a degree program leading to a bachelor of science degree. The total program would require a minimum of four years or eight semesters (16 credit hours/semester or 120 credit hours).

Nebraska CASNR faculty teach horticulture and food science and technology courses at UNO to assist an urban population in better understanding the food processing, horticulture, and landscape horticulture industries.

For more information, contact the CASNR Dean’s Office, 800-472-8800, ext. 2541.
Non University of Nebraska–Lincoln Degree-Granting Programs
CASNR cooperates with other institutions to provide coursework that is applied towards a degree at the cooperating institution. Pre-professional programs offered by CASNR allow students to complete the first two or three years of a degree program at the University prior to transferring and completing a degree at the cooperating institution.

Chadron State College—Range Science. The 3+1 Program in range science allows Chadron State College students to pursue a range science degree through Chadron State College. Students complete three years of coursework at Chadron State College and one year of specialized range science coursework (32 credit hours) at CASNR.

Dordt College (Iowa)—Agricultural Education: Teaching Option. This program allows students to pursue an Agricultural Education Teaching Option degree leading toward a bachelor of science in agricultural education. Students at Dordt College will complete 90 credit hours in the Agricultural Education: Teaching Option Transfer Program.

Residency
Students must complete at least 30 of the total hours for their degree using University of Nebraska–Lincoln credits. At least 18 of the 30 credit hours must be in courses offered through CASNR1 (>299) including the appropriate ACE 10 degree requirement or an approved ACE 10 substitution offered through another Nebraska college and excluding independent study regardless of the number of hours transferred. Credit earned during education abroad may be used toward the residency requirement if students register through UNL and participate in prior-approved education abroad programs. University of Nebraska–Lincoln open enrollment and summer independent study courses count toward residence. Students may only count 12 hours of independent study toward their degrees and no more than 6 hours can be counted during their last 36 hours earned, excluding senior thesis, internships, and courses taught under an independent study number.

Other College Degree Requirements
Capstone Course Requirement
A capstone course is required for each CASNR degree program. A capstone course is defined as a course in which students are required to integrate diverse bodies of knowledge to solve a problem or formulate a policy of societal importance.

ACE Requirements
All students must fulfill the Achievement Centered Education (ACE) requirements. Information about the ACE program may be viewed at ace.unl.edu (https://ace.unl.edu).

The minimum requirements of CASNR reflect the common core of courses that apply to students pursuing degrees in the college. Students should work with an advisor to satisfy ACE outcomes 1, 2, 3, 4, 6 and 10 with the college requirements.

Catalog Rule
Students must fulfill the requirements stated in the catalog for the academic year in which they were first admitted to Nebraska or when they were first admitted to a Joint Academic Transfer Program. In consultation with advisors, a student may choose to follow a subsequent catalog for any academic year in which they are admitted to and enrolled as a degree-seeking student at Nebraska in the College of Agricultural Sciences and Natural Resources. Students must complete all degree requirements from a single catalog year. The catalog which a student follows for degree requirements may not be more than 10 years old at the time of graduation.

Requirements for Minor Offered by Department
A minor in energy science (ENSC) will include a minimum of 18 credit hours of energy-related courses including four core courses.

Core Courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENSC 110</td>
<td>Energy in Perspective</td>
<td>3</td>
</tr>
<tr>
<td>ENSC 220</td>
<td>Introduction to Energy Systems</td>
<td>3</td>
</tr>
<tr>
<td>ENSC 300</td>
<td>Energy Science Seminar</td>
<td>1</td>
</tr>
</tbody>
</table>

Credit Hours Subtotal: 10
Total Credit Hours 10

The remaining energy-related courses must come from one or more of the following four elective thematic tracks, or be approved by the student’s academic advisor and the minor coordinator.

- Energy and Natural Resources
- Plant and Animal Bioenergy
- Energy Engineering
- Energy Economics, Policy, and Human Dimensions

Additionally, optional courses for elective credit include:
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENSC 499H</td>
<td>Honors Thesis</td>
<td>3-6</td>
</tr>
<tr>
<td>ENSC 496</td>
<td>Independent Study in Energy Science</td>
<td>1-3</td>
</tr>
<tr>
<td>ENSC 311</td>
<td>Energy Science Study Tour</td>
<td>1</td>
</tr>
</tbody>
</table>

At least 6 credit hours must be at the 300 or 400 level and up to 3 hours of energy-related independent study coursework or Honors thesis may be included.

**ENSC 110 Energy in Perspective**
*Description:* Scientific principles and historical interpretation to place energy use in the context of pressing societal, environmental and climate issues.
*Credit Hours:* 3
*Max credits per semester:* 3
*Max credits per degree:* 3
*Format:* LEC
*Prerequisite for:* ENSC 311; ENSC 395; SCIL 300
*ACE:* ACE 9 Global/Diversity

**ENSC 220 Introduction to Energy Systems**
*Description:* Overview of energy systems, sources, transformations, efficiency, and storage. Fossil fuels, biomass, wind, solar, nuclear, and hydrogen. Sustainability and environmental trade-offs of different energy systems.
*Credit Hours:* 3
*Max credits per semester:* 3
*Max credits per degree:* 3
*Format:* LEC
*Prerequisite for:* ENSC 311; SCIL 300

**ENSC 230 Energy and the Environment: Economics and Policy**
*Description:* Introduction to the economics of energy. How the economic system determines production and consumption. The linkages between economic and environmental outcomes. How future energy use can be influenced by economic, environmental, trade, and research policy.
*Credit Hours:* 3
*Max credits per semester:* 3
*Max credits per degree:* 3
*Format:* LEC
*Prerequisite for:* ENSC 311; SCIL 300

**ENSC 300 Energy Science Seminar**
*Description:* Overview and evaluation of existing energy problems and solutions, covering technological, environmental, economic, business, and political issues.
*Credit Hours:* 1
*Max credits per semester:* 1
*Max credits per degree:* 1
*Format:* LEC

**ENSC 311 Energy Science Study Tour**
*Prerequisites:* ENSC 110, ENSC 220, and ENSC 230
*Description:* Identification of energy related enterprises that represent the breath of the industry and prioritizing these as candidates for inclusion in the tour.
*Credit Hours:* 1
*Max credits per semester:* 1
*Max credits per degree:* 1
*Format:* LEC

**ENSC 395 Internship in Energy Science**
*Prerequisites:* Sophomore standing; ENSC 110, and permission.
*Description:* Structured practical experience under the supervision of an energy science professional.
*Credit Hours:* 1-3
*Min credits per semester:* 1
*Max credits per semester:* 3
*Max credits per degree:* 5
*Format:* FLD

**ENSC 496 Independent Study in Energy Science**
*Prerequisites:* Sophomore standing and permission.
*Description:* Individual or group project in research, literature review, or extension of course work.
*Credit Hours:* 1-3
*Min credits per semester:* 1
*Max credits per semester:* 3
*Max credits per degree:* 6
*Format:* IND

**ENSC 499H Honors Thesis**
*Prerequisites:* Good standing in the University Honors Program and permission. AGRI 299H recommended.
*Notes:* Requires conducting a scholarly research project and writing a University Honors Program or undergraduate thesis. Letter Grade Only.
*Credit Hours:* 3-6
*Min credits per semester:* 3
*Max credits per semester:* 6
*Max credits per degree:* 6
*Format:* IND
