MECHANIZED SYSTEMS MANAGEMENT

Description
Website: http://msym.unl.edu

The mechanized systems management (MSYM) major prepares students for delivery, management, and technical support of engineered systems for agriculture, food, energy, and water. Students will develop technical, systems analysis, and management skills. This major is ideal for students interested in working with machinery and equipment systems from a practical perspective. The MSYM program includes hands-on coursework in power and machinery systems, processing and handling equipment, and sensors and controls combined with coursework in business, management, agriculture, and natural sciences that prepares students for a wide range of careers in a variety of industries related to agriculture, food, energy, and water. The program offers four options for specialization: production, technical, business and processing operations.

Students in the MSYM major benefit from small classes and personalized faculty advising. Students have the opportunity to work part-time in the Nebraska Tractor Test Laboratory and numerous departmental research projects. Students are encouraged to participate in student clubs such as the Mechanized Systems Management Club, the Tractor Restoration Club, and the UNL Quarter Scale Tractor Team.

College Requirements

College Admission
Requirements for admission into the College of Agricultural Sciences and Natural Resources (CASNR) are consistent with general University admission requirements (one unit equals one high school year): 4 units of English, 4 units of mathematics, 3 units of natural sciences, 3 units of social studies, and 2 units of foreign language. Students must also meet performance requirements (ACT composite of 20 or higher OR combined SAT score of 950 or higher OR combined SAT score of 850 or higher OR combined ACT/SAT score of 960). Students must also complete two years of high school language.

Admission Deficiencies/Removal of Deficiencies
Students who are admitted to CASNR with core course deficiencies must remove these deficiencies within the first 30 credit hours at UNL, or within the first calendar year at UNL, whichever takes longer, excluding foreign languages. Students have up to 60 credit hours to remove foreign language deficiencies. College-level coursework taken to remove deficiencies may be used to meet degree requirements in CASNR.

Deficiencies in the required entrance subjects can be removed by completion of specified courses in the University or by correspondence.

The Office of Admissions, Alexander Building (south entrance), City Campus, provides information to new students on how deficiencies can be removed.

College Degree Requirements

Curriculum Requirements
The curriculum requirements of the College consist of three areas: ACE (Achievement-Centered Education); College of Agricultural Sciences and Natural Resources Core; and Degree Program requirements and electives. All three areas of the College Curriculum Requirements are incorporated within the description of the Major/Degree Program sections of the catalog. The individual major/degree program listings of classes insures that a student will meet the minimum curriculum requirements of the College.

Foreign Languages/Language Requirement
Two units of a foreign language are required. This requirement is usually met with two years of high school language.

Minimum Hours Required for Graduation
The College grants the bachelor's degree in programs associated with agricultural sciences, natural resources and related programs. Students working toward a degree must earn at least 120 semester hours of credit. A minimum cumulative grade point average of C (2.0 on a 4.0 scale) must be maintained throughout the course of studies and is required for graduation.

Grade Rules
Removal of C-, D and F Grades
Only the most recent letter grade received in a given course will be used in computing a student's cumulative grade point average if the student has completed the course more than once and previously received a grade or grades below C in that course.

The previous grade (or grades) will not be used in the computation of the cumulative grade point average, but it will remain a part of the academic record and will appear on any transcript.

A student can remove from his/her cumulative average a course grade of C-, D+, D, D- or F if the student repeats the same course at the University of Nebraska and receives a grade other than P (pass), I (incomplete), N (no pass), W (withdrew), or NR (no report). If a course is no longer being offered, it is not eligible for the revised grade point average computation process.

For complete procedures and regulations, see the Office of the University Registrar website at http://www.unl.edu/regrec/course-repeats.

Pass/No Pass
Students in CASNR may take any course offered on a Pass/No Pass basis within the 24-hour limitation established by the Faculty Senate. However, a department may specify that the Pass/No Pass status of its courses be limited to non-majors or may choose to offer some courses for letter grades only.

GPA Requirements
A minimum cumulative grade point average of C (2.0 on a 4.0 scale) must be maintained throughout the course of studies and is required for graduation.

Transfer Credit Rules
To be considered for admission, a transfer student, Nebraska resident or nonresident, must have an accumulated average of C (2.0 on a 4.0 scale) and a minimum C average in the last semester of attendance at another college. Transfer students who have completed less than 12 credit hours of college study must submit either ACT or SAT scores.
Ordinarily, credits earned at an accredited college are accepted by the University. The College, however, will evaluate all hours submitted on an application for transfer and reserves the right to accept or reject any of them. Sixty is the maximum number of hours UNL will accept on transfer from a two-year college. Ninety is the maximum number of hours UNL will accept from a four-year college. Transfer credit in the degree program must be approved by the degree program advisor on a Request for Substitution Form to meet specific course requirements, group requirements, or course level requirements in the major. At least 9 hours in the major field, including the capstone course, must be completed at UNL regardless of the number of hours transferred.

The College will accept no more than 10 semester hours of C-, D+, D and D- grades from other schools. The C-, D+, D and D- grades can only be applied to free electives. This policy does not apply to the transfer of grades from UNO or UNK to UNL.

Joint Academic Transfer Programs
The College of Agricultural Sciences and Natural Resources has agreements with many institutions to support joint academic programs. The transfer programs include dual degree programs and cooperative degree programs. Dual degree programs offer students the opportunity to receive a degree from a participating institution and also to complete requirements for a bachelor of science degree in CASNR. Cooperative programs result in a single degree from either UNL or the cooperating institution.

Dual Degree Programs
A to B Programs
The A to B Program, a joint academic program offered by the CASNR and participating community colleges, allows students to complete the first two years of a degree program at the participating community college and continue their education and study in a degree program leading toward a bachelor of science degree.

The A to B Program provides a basic knowledge plus specialized course work. Students transfer into CASNR with junior standing. Depending on the community college, students enrolled in the A to B Program may complete the requirements for an associate of science at the community college, transfer to UNL, and work toward a bachelor of science degree.

Participating community colleges include:
- Central Community College
- Metropolitan Community College
- Mid-Plains Community College
- Nebraska College of Technical Agriculture
- Northeast Community College
- Southeast Community College
- Western Nebraska Community College

3+2 Programs
Two specialized degree programs in animal science and veterinary science are offered jointly with an accredited college or school of veterinary medicine. These two programs permit CASNR animal science or veterinary science students to receive a bachelor of science degree from UNL with a degree in animal science or veterinary science after successfully completing two years of the professional curriculum in veterinary medicine at an accredited veterinary school. Students who successfully complete the 3+2 Program, must complete the “Application for Degree” form and provide transcripts to the Credentials Clerk, Office of the University Registrar, 107 Canfield Administration Building, UNL. Students should discuss these degree programs with their academic advisor.

Cooperative Degree Programs
Academic credit from UNL and a cooperating institution is applied towards a four-year degree from either UNL (UNL degree-granting program) or the cooperating institution (non UNL degree-granting program). All have approved programs of study.

UNL Degree-Granting Programs
A UNL degree-granting program is designed to provide students the opportunity to complete a two-year program of study at one of the four-year institutions listed below, transfer to CASNR and complete the requirements for a bachelor of science degree.

Chadron State College. Chadron State College offers a 2+2 program leading to a grassland ecology and management degree program and a transfer program leading to a Bachelor of Science in Agricultural Education in the teaching option.

Wayne State College. Wayne State College offers a 3+1 program leading to a Bachelor of Science in Plant Biology in the ecology and management option.

University of Nebraska at Kearney. Transfer programs are available for students pursuing degree programs leading to a bachelor of science degree.

University of Nebraska at Omaha. The University of Nebraska at Omaha (UNO) cooperates with CASNR in providing four-semester pre-agricultural sciences, pre-natural resources, pre-food science and technology, pre-horticulture and pre-turfgrass and landscape management transfer programs.

A student enrolled in these programs may transfer all satisfactorily completed academic credits identified in the suggested program of study, and enter CASNR to study toward a degree program leading to a bachelor of science degree. The total program would require a minimum of four years or eight semesters (16 credit hours/semester or 120 credit hours).

UNL CASNR faculty teach horticulture and food science and technology courses at UNO to assist an urban population in better understanding the food processing, horticulture, and landscape horticulture industries.

For more information, contact the CASNR Dean's Office, 800-472-8800, ext. 2541.

Non UNL Degree-Granting Programs
The CASNR cooperates with other institutions to provide course work that is applied towards a degree at the cooperating institution. Preprofessional programs offered by CASNR allow students to complete the first two or three years of a degree program at UNL prior to transferring and completing a degree at the cooperating institution.

Chadron State College–Range Science. The 3+1 Program in range science allows Chadron State College students to pursue a range science degree through Chadron State College. Students complete three years of course work at Chadron State College and one year of specialized range science course work (32 credit hours) at CASNR.

Dordt College (Iowa) – Agricultural Education: Teaching Option. This program allows students to pursue an Agricultural Education Teaching Option degree leading toward a bachelor of science in agricultural science.
education. Students at Dordt College will complete 90 credit hours in the Agricultural Education: Teaching Option Transfer Program.

Residency
Students must complete at least 30 of the total hours for their degree using UNL credits. At least 18 of the 30 credit hours must be in courses offered through CASNR 1 (>299) including the appropriate ACE 10 degree requirement or an approved ACE 10 substitution offered through another UNL college and excluding independent study regardless of the number of hours transferred. Credit earned during education abroad may be used toward the residency requirement if students register through UNL and participate in prior-approved education abroad programs. UNL open enrollment and summer independent study courses count toward residence.

Other College Degree Requirements
Capstone Course Requirement
A capstone course is defined as a course in which students are required to integrate diverse bodies of knowledge to solve a problem or formulate a policy of societal importance.

ACE Requirements
All students must fulfill the Achievement Centered Education (ACE) requirements. Information about the ACE program may be viewed at www.ace.unl.

The minimum requirements of CASNR reflect the common core of courses that apply to students pursuing degrees in the college. Students should work with an advisor to satisfy ACE outcomes 1, 2, 3, 4, 6 and 10 with the college requirements.

Catalog Rule
Students must fulfill the requirements stated in the catalog for the academic year in which they are first admitted to UNL or when they were first admitted to a Joint Academic Transfer Program. In consultation with advisors, a student may choose to follow a subsequent catalog for any academic year in which they are admitted to and enrolled as a degree-seeking student at UNL in the College of Agricultural Sciences and Natural Resources. Students must complete all degree requirements from a single catalog year. The catalog which a student follows for degree requirements may not be more than 10 years old at the time of graduation.

Learning Outcomes
Majors in mechanized systems management will be able to:

1. Apply hands-on technical skills and knowledge from the natural and social sciences, technology, engineering, and mathematics to analyze and manage mechanized systems relevant to agriculture, food, energy, and water.
2. Identify the structure, layout and function of mechanized systems including the relationships between individual components of a system.
3. Evaluate a system critically by defining a problem, assimilating information, conducting an analysis, and making technical and economic recommendations to improve performance of the system while accounting for potential social and environmental impacts.
4. Develop professional written and oral reports to describe a mechanized system and communicate an analysis of the system that includes objectives, methods, results and recommendations.

Major Requirements 1
MSYM 162 Introduction to Mechanized Systems Management
MSYM 232 Power and Machinery Principles
MSYM 245 Electrical Service Systems
MSYM 262 Problem Solving in Mechanized Systems Management
MSYM 354 / SOIL 354 / WATS 354 Soil Conservation and Watershed Management
MSYM 364 Agricultural Products Processing and Handling
MSYM 416 Sensors and Control Systems for Agriculture Industries
BSEN 206 / CONE 206 Engineering Economics
SOIL 153 / AGRO 153 / HORT 153 Soil Resources
Credit Hours Subtotal: 24
Total Credit Hours 24

1 In addition to capstone MSYM 462 Equipment Systems.

Production Option
The production option is for students interested in careers in production agriculture such as farming, ranching, and crop consulting. The option integrates course work in mechanized systems management with agricultural sciences, management, and marketing.

Option Requirements
AGRO 204 Resource-Efficient Crop Management
AECN 201 Farm and Ranch Management
AECN 235 Introduction to Commodity Marketing
ASCI 250 Animal Management

Mechanized Systems Management Electives
Select three of the following: 9
MSYM 342 Animal Housing Systems
MSYM 412 Hydraulic Power Systems
MSYM 431 / AGEN 431 / AGRO 431 Site-specific Crop Management
MSYM 433 Equipment and Tractor Testing
MSYM 452 / AGR 452 / WATS 452 Irrigation Systems Management

Production Agriculture Electives
Select 8-11 credits from specified CASNR courses at 200 level or above 1 8-11

Option Electives
Select 0-3 credits
MSYM 395 Internship in Mechanized Systems Management
Business or agricultural economics course
Credit Hours Subtotal: 30-36
Total Credit Hours 30-36

1 Refer to degree audit or contact adviser for list of classes.

Business Option
The business option is for students interested in business-related careers such as marketing, sales, and management in agriculture and related...
industries. This option integrates course work in mechanized systems management with additional business courses. Students can easily pursue a business minor with this option.

Option Requirements

ACCT 200  Accounting for Business Decisions  3
AGRO 204  Resource-Efficient Crop Management  3
or ASCI 250  Animal Management
MATH 104  Applied Calculus  3

Mechanized Systems Management Electives
Select 9 credits of the following:  9
MSYM 342  Animal Housing Systems
MSYM 395  Internship in Mechanized Systems Management
MSYM 412  Hydraulic Power Systems
MSYM 431  Site-specific Crop Management
AGEN 431  Site-specific Crop Management
AGRO 431  Site-specific Crop Management
MSYM 452  Irrigation Systems Management
AGRO 452  Irrigation Systems Management
WATS 452  Irrigation Systems Management

Business Law Elective
Select one of the following:  3
AECN 256  Legal Aspects in Agriculture
AECN 357  Natural Resource and Environmental Law
NREE 357  Natural Resource and Environmental Law
BLAW 300  Business, Government & Society

Finance Elective
AECN 452  Agricultural Finance  3
or FINA 300  Financial Decision Making

Marketing Elective
Select two of the following:  6-7
AECN 225  Agribusiness Entrepreneurship in Food
EAE 225  Products Marketing
MRKT 225  Agribusiness Management
AECN 235  Introduction to Commodity Marketing
MRKT 300  Contemporary Marketing
MSYM 363  Management Essentials For Contemporary Organizations
FDST 363  Heat and Mass Transfer

Management Electives
Select two of the following:  6
AECN 201  Farm and Ranch Management
AECN 316  Agribusiness Management
MNGT 300  Management Essentials For Contemporary Organizations
MNGT 322  Family Business
MNGT 361  Human Resource Management

Credit Hours Subtotal:  33-34
Total Credit Hours  33-34

Technical Option

The technical option is for students interested in hands-on technical careers such as test engineers, product support specialists, and service managers. This option integrates course work in mechanized systems management with additional course work in engineering. This option will also prepare students for graduate study.

Option Requirements
Select one of the following:  3
AGRO 204  Resource-Efficient Crop Management
ASC 250  Animal Management
ASC 210  Animal Products
MATH 106  Calculus I  5
MSYM 395  Internship in Mechanized Systems Management  1-3
MSYM 400A  Occupational Safety

MSYM 412  Hydraulic Power Systems  3
MSYM 433  Equipment and Tractor Testing  3

Management Electives
Select two of the following:  6
AECN 316  Agribusiness Management
MNGT 300  Management Essentials For Contemporary Organizations
SCMA 331  Operations and Supply Chain Management
MNGT 361  Human Resource Management

Credit Hours Subtotal:  33-35
Total Credit Hours  33-35

Processing Operations Option

The processing operations option is for students interested in careers in operations management for food, feed, and fuel companies. This option integrates course work in mechanized systems management, with business, agricultural sciences, and food sciences. This option will also prepare students for graduate study.

Option Requirements
Select one of the following:  3
AGRO 437  Animal, Food and Industrial Uses of Grain  2
AECN 235  Introduction to Commodity Marketing  3
ASC 210  Animal Products  3
MATH 104  Applied Calculus  3-5
or MATH 106  Calculus I  3-5
MSYM 395  Internship in Mechanized Systems Management  1-3
MSYM 400A  Occupational Safety
SCMA 331  Operations and Supply Chain Management  3
MSYM 363  Heat and Mass Transfer  3
MSYM 412  Hydraulic Power Systems  3
Processing Electives
Select 7-9 credits of the following:

Credit Hours Subtotal: 31-37
Total Credit Hours 31-37

Electives
Students can select 9 credit hours of personal development electives. These electives can be used to foster greater understanding of a topic of interest, to develop an inherent skill, or to pursue a minor.

Requirements for Minor Offered by Department

12-Credit-Hour Mechanized Systems Management Minor
  • A minimum of 12 credit hours of mechanized systems management course work at the 300 level or above.

18-Credit-Hour Mechanized Systems Management Minor
  • A minimum of 18 credit hours of mechanized systems management course work (excluding MSYM 109 Physical Principles in Agriculture and Life Sciences and MSYM 162 Introduction to Mechanized Systems Management) with at least 9 credit hours at the 300 level or above.

MSYM 109 Physical Principles in Agriculture and Life Sciences
Prerequisites: MATH 101 or 103 with a grade of C or better completed within the last 11 months; or, placement in MATH 102 or 104 (or higher) within the last 11 months
Notes: Students cannot receive credit for both MSYM 109 and any one of the following: PHYS 141, 151 or 211.
Description: Fundamental principles of mechanics, heat, electricity, magnetism and electromagnetism and their relationship to energy utilization and conservation. Principles then applied to problem situations in agriculture and life sciences.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC
Prerequisite for: MSYM 109L; MSYM 232; MSYM 262; MSYM 452, MSYM 852, WATS 452, AGRO 452
ACE: ACE 4 Science

MSYM 109L Physical Principles in Agriculture and Life Sciences Laboratory
Prerequisites: MSYM 109 or parallel, or PHYS 151
Description: Laboratory experiments on mechanics, heat, electricity, magnetism and electromagnetism and their relationship to energy utilization and conservation in agriculture and life sciences.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Format: LAB

MSYM 162 Introduction to Mechanized Systems Management
Description: Basic principles of describing and evaluating mechanized systems relevant to agriculture, food, energy, and water. Problem solving using systems-thinking. Exploration of major and career opportunities. Academic success and planning.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Format: LEC

MSYM 232 Power and Machinery Principles
Prerequisites: MSYM 109 or PHYS 141 or PHYS 151 or PHYS 211
Description: Operational characteristics of IC engines, field, materials-handling, and processing machines and their components. Includes analyses, estimations, and objective comparisons of performance; principles for adjustment and calibration of metering systems; and cost-effective sizing of machines. Exercises include using ASABE Standards and available reports of machine performance (tractor test reports, etc.).
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

MSYM 245 Electrical Service Systems
Prerequisites: MSYM 109 or high school physics.
Description: Utilization of electric energy in agricultural production, processing, and residential applications. Wiring installations; selection of safe and adequate circuit devices; service equipment and conductors; and electric motors and their control; and energy management.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

MSYM 262 Problem Solving in Mechanized Systems Management
Prerequisites: MSYM 109 or PHYS 141 or PHYS 151 or PHYS 211.
Notes: Open to MSYM majors only.
Description: Use of computational tools to solve problems relevant to mechanized systems management. Professional communication of technical information. Discussion of current and emerging issues relevant to the major.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Format: LEC
Offered: SPRING
MSYM 299 Career Experiences  
**Prerequisites:** Permission and advanced approval of plan or work.  
**Description:** Student participation in physical systems applications. May include participation in mechanization-related areas of agribusiness, production practices, and processing operations; research in laboratory, greenhouse and field; or preparation of teaching materials.  
**Credit Hours:** 1-5  
**Min credits per semester:** 1  
**Max credits per semester:** 5  
**Max credits per degree:** 12  
**Format:** IND

MSYM 312 Engine Power Systems  
**Prerequisites:** MSYM 109 or general physics.  
**Description:** Internal combustion engine power systems used in agriculture with primary emphasis on power needs for both mobile and fixed operations, characteristics of power sources and energy resources, and selection and use of power units.  
**Credit Hours:** 3  
**Min credits per semester:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Format:** LEC

MSYM 324 Animal Housing Systems  
**Prerequisites:** MSYM 109 or PHYS 141 or PHYS 151 or PHYS 211  
**Description:** Production facilities for livestock and poultry will be developed with emphasis on building and feedlot layout, ventilation, heating and cooling systems; energy utilization; and construction materials and methods.  
**Credit Hours:** 3  
**Min credits per semester:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Format:** LEC  
**Offered:** FALL

MSYM 342 Animal Housing Systems  
**Prerequisites:** MSYM 109 or PHYS 141 or PHYS 151 or PHYS 211  
**Description:** Production facilities for livestock and poultry will be developed with emphasis on building and feedlot layout, ventilation, heating and cooling systems; energy utilization; and construction materials and methods.  
**Credit Hours:** 3  
**Min credits per semester:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Format:** LEC  
**Offered:** FALL

MSYM 354 Soil Conservation and Watershed Management  
**Crosslisted with:** SOIL 354, WATS 354  
**Prerequisites:** AGRO/SOIL 153; and MSYM 109 or PHYS 141 or PHYS 151 or PHYS 211  
**Description:** Watershed hydrology, soil erosion, erosion control, water management, and land surveying and mapping. Includes rainfall-runoff relationships; determination of watershed characteristics; terraces, waterways, vegetative filters, and residue management; ponds, wetlands, non-point source pollution control, and water conservation; profile and topographic surveying.  
**Credit Hours:** 3  
**Min credits per semester:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Format:** LEC

MSYM 364 Agricultural Products Processing and Handling  
**Prerequisites:** MSYM 109 or PHYS 141 or PHYS 151 or PHYS 211  
**Description:** Analysis of processing and handling operations. Chemical and physical characteristics of agricultural products. Application of psychrometrics. Power requirements, capacities, and efficiencies of drying and conveying systems. Discussion of safety issues, logistics, and survey of industry technologies.  
**Credit Hours:** 3  
**Min credits per semester:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Format:** LEC  
**Offered:** SPRING

MSYM 395 Internship in Mechanized Systems Management  
**Prerequisites:** Junior standing.  
**Notes:** Completion of internship approval form is required. The internship proposal is subject to approval by the Department of Biological Systems Engineering. Pass/No Pass only.  
**Description:** Practical experience, directed learning, and career exploration and development in a selected business, industry, agency, or educational institution.  
**Credit Hours:** 1-3  
**Min credits per semester:** 1  
**Max credits per semester:** 3  
**Max credits per degree:** 5  
**Format:** FLD

MSYM 400A Occupational Safety  
**Prerequisites:** Junior standing  
**Description:** Identifies safety and health risks in industrial work environments. Focus on how managers and supervisors meet their responsibilities for providing a safe workplace for their employees. Includes the identification and remediation of workplace hazards. Online course offered by Iowa State University through the AG*IDEA consortium.  
**Credit Hours:** 3  
**Min credits per semester:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Format:** LEC

MSYM 400B Agricultural Safety and Health  
**Prerequisites:** Junior standing  
**Description:** Safety concepts, principles, practices, rules and regulations as they relate to agriculture will be explored. Developing and conducting safety programs, and conducting safety inspections and accident investigations are other aspects of the course. Online course offered by University of Missouri through the AG*IDEA consortium. Contact CASNR Distance Education Consortium Coordinator for course details, prerequisites and registration information.  
**Credit Hours:** 3  
**Min credits per semester:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Format:** LEC
**MSYM 400E Biorenewable Systems Technology**

**Description:** The science, engineering, economics and business of converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, economics, transportation and logistics, and marketing. Online course offered by Iowa State University through the AG*IDEA consortium. Contact CASNR Distance Education Consortium Coordinator for course details, prerequisites and registration information.

**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Format:** LEC

---

**MSYM 400J Machinery Management Using Precision Agriculture Technology**

**Prerequisites:** Junior standing or instructor permission

**Description:** Management of agricultural equipment that is commonly used in conjunction with GPS technology such as planters, combines, fertilizer application equipment, and sprayer application equipment. Online course offered by University of Missouri through the AG*IDEA consortium. Contact CASNR Distance Education Consortium Coordinator for course details, prerequisites and registration information.

**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Format:** LEC

---

**MSYM 400K Chemical Application Systems**

**Description:** Systems, components, operation practices, and safety procedures used in the chemical application industry. Liquid and granular application systems and respective components will be studied along with procedures for equipment sizing and maintenance, minimizing drift, system calibration, and safe handling-transportation-storage-disposal and spill clean-up of agrichemicals. Online course offered by Kansas State University through the AG*IDEA consortium. Contact CASNR Distance Education Consortium Coordinator for course details, prerequisites and registration information.

**Credit Hours:** 2  
**Max credits per semester:** 2  
**Max credits per degree:** 2  
**Format:** LEC

---

**MSYM 412 Hydraulic Power Systems**

**Prerequisites:** MSYM 245

**Description:** Theory and application of fluids under controlled pressure to perform work in mobile and industrial applications. Positive displacement (PD) pumps, linear and rotary hydraulic actuators (hydraulic cylinders and motors), valves, and electric over hydraulic systems will be studied in detail. Fluid power circuit development on both hydraulic benches and computer simulated environments will be performed with emphasis on circuit analysis, and system troubleshooting.

**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Format:** LEC  
**Offered:** SPRING

---

**MSYM 416 Sensors and Control Systems for Agri-Industries**

**Prerequisites:** MSYM 245 or permission.

**Description:** Application of sensors for measurement of process control variables and implementation of microcomputer-based measurement and control systems. Basic electrical and electronic instrumentation plus control of electrically, pneumatically and/or hydraulically powered systems.

**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Format:** LEC

---

**MSYM 431 Site-specific Crop Management**

**Crosslisted with:** AGEN 431, AGRO 431

**Prerequisites:** Senior standing; AGRO/SOIL 153; AGRO 204; or permission.

**Description:** Principles and concepts of site-specific management. Evaluation of geographic information systems for crop production practices. Practical experience with hardware and software necessary for successful application of information affecting crop management.

**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Format:** LEC

---

**MSYM 433 Equipment and Tractor Testing**

**Crosslisted with:** MSYM 833

**Prerequisites:** MSYM 232; and STAT 218 or STAT/MATH 380 or MECH 321

**Notes:** Offered spring semester in even-numbered calendar years.

**Description:** Principles and procedures involved in testing agricultural equipment and tractors. Actual test planned, scheduled, conducted and reported. Test may be based upon procedures used at the Nebraska Tractor Testing Laboratory or involve other equipment being used for research in the department.

**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Format:** LEC  
**Offered:** SPRING

---

**MSYM 452 Irrigation Systems Management**

**Crosslisted with:** MSYM 852, WATS 452, AGRO 452

**Prerequisites:** MSYM 109 or PHYS 141 or PHYS 151 or PHYS 211

**Notes:** AGRO/SOIL 153 recommended.

**Description:** Irrigation management and the selection, evaluation, and improvement of irrigation systems. Includes soil-water measurement, crop water use, irrigation scheduling, irrigation efficiency, measurement of water flow, irrigation systems, groundwater and wells, pumping systems, applying chemicals with irrigation systems, and environmental and water resource considerations.

**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Format:** LEC  
**Offered:** FALL
MSYM 462 Equipment Systems  
Crosslisted with: MSYM 862  
Prerequisites: Senior standing in MYSM or permission  
Notes: Capstone course.  
Description: Team-based activities to evaluate equipment systems, make technical and economic recommendations, develop professional written and oral reports. Topics include equipment system performance and management, project scheduling and planning, cost estimation, reliability analysis, and risk assessment.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Format: LEC  
ACE: ACE 10 Integrated Product

MSYM 465 Food Engineering Unit Operations  
Crosslisted with: FDST 465, FDST 865, MSYM 865  
Prerequisites: FDST/MSYM 363.  
Description: Unit operations and their applications to food processing.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Format: LEC  

MSYM 469 Bio-Atmospheric Instrumentation  
Crosslisted with: AGRO 469, GEOG 469, HORT 407, METR 469, NRES 469, AGRO 869, GEOG 869, HORT 807, METR 869, MSYM 869, NRES 869  
Prerequisites: Junior standing; MATH 106; 4 hrs physics; physical or biological science major.  
Description: Discussion and practical application of principles and practices of measuring meteorological and related variables near the earth’s surface including temperature, humidity, precipitation, pressure, radiation and wind. Performance characteristics of sensors and modern data collection methods are discussed and evaluated.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Format: LEC  

MSYM 475 Water Quality Strategy  
Crosslisted with: NRES 475, NRES 875, SOCI 475, SOCI 875, SOIL 475, WATS 475, AGRO 475, AGRO 875, CIVE 475, CIVE 875, CRPL 475, CRPL 875, GEOL 475, GEOL 875, MSYM 875, POLS 475, POLS 875  
Prerequisites: Senior standing or permission  
Notes: Capstone course.  
Description: Holistic approach to the selection and analysis of planning strategies for protecting water quality from nonpoint sources of contamination. Introduction to the use of methods of analyzing the impact of strategies on whole systems and subsystems; for selecting strategies; and for evaluating present strategies.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Format: LEC  
ACE: ACE 10 Integrated Product  
Groups: American Government & Public Pol

MSYM 492 Special Topics in Mechanized Systems Management  
Crosslisted with: MSYM 892  
Prerequisites: Permission  
Description: Subject matter in emerging areas of Mechanized Systems Management not covered in other courses within the curriculum. Topics, activities, and delivery methods vary.  
Credit Hours: 1-6  
Min credits per semester: 1  
Max credits per semester: 6  
Max credits per degree: 6  
Format: LEC

MSYM 496 Principles and Problems in Mechanized Agriculture  
Crosslisted with: MSYM 896  
Prerequisites: 15 hours in MSYM or closely related area.  
Description: Individual or group projects in research, literature review, or extension of course work under the supervision and evaluation of a departmental faculty member.  
Credit Hours: 1-5  
Min credits per semester: 1  
Max credits per semester: 5  
Max credits per degree: 12  
Format: IND

MSYM 499H Honors Thesis  
Prerequisites: Admission to the University Honors Program and permission, AGRI 299H recommended.  
Description: Conduct a scholarly research project and write a University Honors Program or undergraduate thesis.  
Credit Hours: 3-6  
Min credits per semester: 3  
Max credits per semester: 6  
Max credits per degree: 6  
Format: IND

PLEASE NOTE
This document represents a sample 4-year plan for degree completion with this major. Actual course selection and sequence may vary and should be discussed individually with your college or department academic advisor. Advisors also can help you plan other experiences to enrich your undergraduate education such as internships, education abroad, undergraduate research, learning communities, and service learning and community-based learning.

Mechanized Systems Management - Business

15 HR TERM 1

College Course  
complete SCIL 101  
3hr

SCIL 101 becomes critical to your success in the major if not completed by the second term of enrollment.

ACE 4 Physics

complete MSYM 109, MSYM 109L
MSYM 109 becomes critical to your success in the major if not completed by the second term of enrollment.

**Mathematics**
complete MATH 102

**Mech Systems Mngt Core**
complete AGRO 153, MSYM162

---

### 16 HR TERM 2
**Mech Systems Mngt Core**
complete MSYM 245

**ACE 4 Chemistry**
complete CHEM 109

**ACE 6/8 Economics**
complete either AECN 141 or ECON 212

**ACE1 Written Comm**
complete 1 from ENGL 150, ENGL 151, JGEN 200

**ACE 5 Humanities**
complete 1 from ACE5

---

### 15 HR TERM 3
**ACE 4 Life Science**
complete 2 from AGRO 131, AGRO 132, BIOS 101, BIOS 101L, LIFE 120, LIFE 120L

**ACE 6/8 Economics**
complete ECON 211

**ACE 7 Arts**
complete 1 from ACE7

**Business Option Reqts**
complete ACCT 200, MATH 104

**MSYM Problem Solving**
complete MSYM 262

MSYM 262 becomes critical to your success in the major if not completed by the fourth term of enrollment.

**Electives**
recommend 1 or more courses

---

### 15 HR TERM 4
**ACE 3 Statistics**
complete STAT 218

**ACE 7 Arts**
complete 1 from ACE7

**Business Option Reqts**
complete ACCT 200, MATH 104

**MSYM Problem Solving**
complete MSYM 262

MSYM 262 becomes critical to your success in the major if not completed by the fourth term of enrollment.

**Electives**
recommend 1 or more courses

---

### 15 HR TERM 5
**Mech Systems Mngt Core**
complete MSYM 354
### Mechanized Systems Management
