PLANT & LANDSCAPE SYSTEMS

Description
A degree in Plant and Landscape Systems aims to educate and develop professionals prepared to design and manage complex plant production, landscape, and soil management systems. Graduates will leverage an appreciation of nature; scientific knowledge and data; and teamwork, communication, and problem-solving skills to become leaders and change makers in agronomic, horticultural, landscape, and turfgrass systems in Nebraska and beyond.

Options
The Plant and Landscape Systems major will include a core to be completed by all students and four options to allow students to specialize in professional areas of interest. The four primary options are:

1. Agronomy
2. Horticulture
3. Landscape Design and Management
4. Turfgrass Science and Management

The core curriculum provides the foundational knowledge and skills necessary for success in any career pathway in Plant and Landscape Systems, including courses in plant and soil science, pest biology, systems thinking, technical communication, and career development. Students build on this foundation to pursue focused expertise through a required option. Additionally, students will complement their program of study with two additional areas of professional specialization provided through emphases and/or minors. There are no additional admission requirements beyond the University of Nebraska–Lincoln’s core course and performance requirements. Students are assigned a faculty advisor after New Student Enrollment.

The Agronomy Option provides specialization in managing field crop systems and includes foundational learning experiences in crop and soil management, plant genetics, and physiology. Graduates with an agronomy option will be well-prepared to pursue careers as agronomists, crop consultants and advisers, farm managers, soil conservationists, crop input suppliers/sales representatives, crop research technicians, and farming systems innovators and entrepreneurs.

The Horticulture Option will prepare students to manage specialty crops in field, landscape, greenhouse, and controlled environment systems. This option includes foundational knowledge in plant propagation and physiology, genetics, plant identification and selection, and specialty crop management. Graduates with a horticulture option will be ready for careers as hydroponic and urban agricultural growers; greenhouse or nursery crop managers; farm managers or consultants for vegetable, fruit, nut, herb, floral, or medicinal plants; research associates in field or greenhouse environments; suppliers and sales associates for specialty crop seeds and inputs; and plant-based innovators and entrepreneurs.

The Landscape Design and Management Option will prepare students to design landscapes and manage landscape plants that provide cultural, ecological, and production functions. Students will learn to identify plants and their functional benefits in the landscape, use those plants to design and communicate plans for transforming the landscape, and the technical knowledge to install and manage landscape plants using systems thinking. Students pursuing an option in landscape design and management may be interested in careers as a landscape designer or contractor; habitat restoration specialist; public gardens manager; landscaping business owner; and horticultural therapist.

The Turfgrass Science and Management Option will prepare students to manage turfgrass landscapes and businesses in the golf course, sports turf, sod, and lawn care industries. Students will apply knowledge of soils, turfgrass physiology and management, and pest management from this option to pursue careers as golf course superintendents, sports turf managers, lawn care specialists, and business owners.

College Requirements

College Admission
Requirements for admission into the College of Agricultural Sciences and Natural Resources (CASNR) are consistent with general University admission requirements (one unit equals one high school year): 4 units of English, 4 units of mathematics, 3 units of natural sciences, 3 units of social sciences, and 2 units of world language. Students must also meet performance requirements: a 3.0 cumulative high school grade point average OR an ACT composite of 20 or higher, writing portion not required OR a score of 1040 or higher on the SAT Critical Reading and Math sections OR rank in the top one-half of graduating class; transfer students must have a 2.0 (on a 4.0 scale) cumulative grade point average and 2.0 on the most recent term of attendance.

Admission Deficiencies/Removal of Deficiencies
Students who are admitted to CASNR with core course deficiencies must remove these deficiencies within the first 30 credit hours at the University of Nebraska–Lincoln, or within the first calendar year at Nebraska, whichever takes longer, excluding foreign languages. Students have up to 60 credit hours to remove world language deficiencies. College-level coursework taken to remove deficiencies may be used to meet degree requirements in CASNR.

Deficiencies in the required entrance subjects can be removed by the completion of specified courses in the University or by correspondence. The Office of Admissions, Alexander Building (south entrance), City Campus, provides information to new students on how deficiencies can be removed.

College Degree Requirements

Curriculum Requirements
The curriculum requirements of the College consist of three areas: ACE (Achievement-Centered Education), College of Agricultural Sciences and Natural Resources Core, and Degree Program requirements and electives. All three areas of the College Curriculum Requirements are incorporated within the description of the Major/Degree Program sections of the catalog. The individual major/degree program listings of classes ensures that a student will meet the minimum curriculum requirements of the College.

World Languages/Language Requirement
Two units of a world language are required. This requirement is usually met with two years of high school language.

Experiential Learning
All undergraduates in the College of Agricultural Sciences and Natural Resources must take an Experiential Learning (EL) designated course.
This may include 0-credit courses designed to document co-curricular activities recognized as Experiential Learning.

**Minimum Hours Required for Graduation**

The College grants the bachelors degree in programs associated with agricultural sciences, natural resources, and related programs. Students working toward a degree must earn at least 120 semester hours of credit. A minimum cumulative grade point average of C (2.0 on a 4.0 scale) must be maintained throughout the course of studies and is required for graduation. Some degree programs have a higher cumulative grade point average required for graduation. Please check the degree program on its graduation cumulative grade point average.

**Grade Rules**

**Removal of C-, D, and F Grades**

Only the most recent letter grade received in a given course will be used in computing a student’s cumulative grade point average if the student has completed the course more than once and previously received a grade or grades below C in that course.

The previous grade (or grades) will not be used in the computation of the cumulative grade point average, but it will remain a part of the academic record and will appear on any transcript.

A student can remove from his/her cumulative average a course grade of C-, D+, D, D-, or F if the student repeats the same course at the University of Nebraska and receives a grade other than P (pass), I (incomplete), N (no pass), W (withdraw), or NR (no report). If a course is no longer being offered, it is not eligible for the revised grade point average computation process.

For complete procedures and regulations, see the Office of the University Registrar website at [http://www.unl.edu/regrec/course-repeats/](http://www.unl.edu/regrec/course-repeats/).

**Pass/No Pass**

Students in CASNR may take any course offered on a Pass/No Pass basis within the 24-hour limitation established by the Faculty Senate. However, a department may specify that the Pass/No Pass status of its courses be limited to non-majors or may choose to offer some courses for letter grades only.

**GPA Requirements**

A minimum cumulative grade point average of C (2.0 on a 4.0 scale) must be maintained throughout the course of studies and is required for graduation. Some degree programs have a higher cumulative grade point average required for graduation. Please check the degree program on its graduation cumulative grade point average.

**Transfer Credit Rules**

To be considered for admission, a transfer student, Nebraska resident or nonresident, must have an accumulated average of C (2.0 on a 4.0 scale) and a minimum C average in the last semester of attendance at another college. Transfer students who have completed less than 12 credit hours of college study must submit either ACT or SAT scores.

Ordinarily, credits earned at an accredited college are accepted by the University. The College, however, will evaluate all hours submitted on an application for transfer and reserves the right to accept or reject any of them. Sixty (60) is the maximum number of hours the University will accept on transfer from a two-year college. Ninety (90) is the maximum number of hours the University will accept from a four-year college. Transfer credit in the degree program must be approved by the degree program advisor on a Request for Substitution Form to meet specific course requirements, group requirements, or course level requirements in the major. At least 9 hours in the major field, including the capstone course, must be completed at the University of Nebraska–Lincoln regardless of the number of hours transferred.

The College will accept no more than 10 semester hours of C, D+, D, and D- grades from other schools. The C, D+, D, and D+ grades can only be applied to free electives. This policy does not apply to the transfer of grades from UNO or UNK to the University of Nebraska–Lincoln.

**Joint Academic Transfer Programs**

The College of Agricultural Sciences and Natural Resources has agreements with many institutions to support joint academic programs. The transfer programs include dual degree programs and cooperative degree programs. Dual degree programs offer students the opportunity to receive a degree from a participating institution and also to complete requirements for a bachelor of science degree in CASNR. Cooperative programs result in a single degree from either the University of Nebraska–Lincoln or the cooperating institution.

**Dual Degree Programs**

**A to B Programs**

The A to B Program, a joint academic program offered by the CASNR and participating community colleges, allows students to complete the first two years of a degree program at the participating community college and continue their education and study in a degree program leading toward a bachelor of science degree.

The A to B Program provides a basic knowledge plus specialized coursework. Students transfer into CASNR with junior standing.

Depending on the community college, students enrolled in the A to B Program may complete the requirements for an associate of science at the community college, transfer to the University of Nebraska–Lincoln, and work toward a bachelor of science degree.

Participating community colleges include:

- Central Community College
- Metropolitan Community College
- Mid-Plains Community College
- Nebraska College of Technical Agriculture
- Nebraska Indian Community College
- Northeast Community College
- Southeast Community College
- Western Nebraska Community College

**3+2 Programs**

Two specialized degree programs in animal science and veterinary science are offered jointly with an accredited college or school of veterinary medicine. These two programs permit CASNR animal science or veterinary science students to receive a bachelor of science degree from the University of Nebraska–Lincoln with a degree in animal science or veterinary science after successfully completing two years of the professional curriculum in veterinary medicine at an accredited veterinary school. Students who successfully complete the 3+2 Program, must provide transcripts and complete the Application for Degree form via MyRED. Students without MyRED access may apply for graduation in person at Husker Hub in the Canfield Administration Building, or by mail. Students should discuss these degree programs with their academic advisor.
Cooperative Degree Programs
Academic credit from the University and a cooperating institution are applied towards a four-year degree from either the University of Nebraska–Lincoln (University degree-granting program) or the cooperating institution (non University degree-granting program). All have approved programs of study.

UNL Degree-Granting Programs
A University of Nebraska–Lincoln degree-granting program is designed to provide students the opportunity to complete a two-year program of study at one of the four-year institutions listed below, transfer to CASNR, and complete the requirements for a bachelor of science degree.

Chadron State College. Chadron State College offers a 2+2 program leading to a grassland ecology and management degree program and a transfer program leading to a bachelor of science in agricultural education in the teaching option.

Wayne State College. Wayne State College offers a 3+1 program leading to a bachelor of science in plant biology in the ecology and management option and a 3+1 program leading to a bachelor of science in Applied Science.

University of Nebraska at Kearney. Transfer programs are available for students pursuing degree programs leading to a bachelor of science degree.

University of Nebraska at Omaha. Transfer programs are available for students pursuing degree programs leading to a bachelor of science degree.

Non University of Nebraska–Lincoln Degree-Granting Programs
CASNR cooperates with other institutions to provide coursework that is applied towards a degree at the cooperating institution. Pre-professional programs offered by CASNR allow students to complete the first two or three years of a degree program at the University prior to transferring and completing a degree at the cooperating institution.

Chadron State College–Range Science. The 3+1 Program in range science allows Chadron State College students to pursue a range science degree through Chadron State College. Students complete three years of coursework at Chadron State College and one year of specialized range science coursework (32 credit hours) at CASNR.

Dordt College (Iowa)–Agricultural Education: Teaching Option. This program allows students to pursue an Agricultural Education Teaching Option degree leading toward a bachelor of science in agricultural education. Students at Dordt College will complete 90 credit hours in the Agricultural Education: Teaching Option Transfer Program.

Residency
Students must complete at least 30 of the total hours for their degree using University of Nebraska–Lincoln credits. At least 18 of the 30 credit hours must be in courses offered through CASNR (e.g., LIFE, MBIO, ENVIR, SCIL, EAEP, HRTM, ENSC) and CASNR crosslisted courses taught by non-CASNR faculty.

Online and Distance Education
There are many opportunities to earn college credit online through the University of Nebraska–Lincoln. Some of these credits may be applicable not only as elective credits but also toward the fulfillment of the College’s education requirements. Credits earned online may count toward residency. However, certain offerings may not be counted toward scholarship requirements or academic recognition criteria.

For further information, contact:
Office of Online and Distance Education
University of Nebraska–Lincoln
305 Brace Labs
Lincoln, NE 68588-0109
402-472-4681
http://online.unl.edu/

Independent Study Rules
Students wishing to take part in independent studies must obtain permission; complete and sign a contract form; and furnish copies of the contract to the instructor, advisor, departmental office, and the Dean’s Office. The contract should be completed before registration. Forms are available in 103 Agricultural Hall or online at the CASNR website.

Independent study projects include research, literature review or extension of coursework under supervision and evaluation of a departmental faculty member.

Students may only count 12 hours of independent study toward their degrees and no more than 6 hours can be counted during their last 36 hours earned, excluding senior thesis, internships, and courses taught under an independent study number.

Other College Degree Requirements
Capstone Course Requirement
A capstone course is required for each CASNR degree program. A capstone course is defined as a course in which students are required to integrate diverse bodies of knowledge to solve a problem or formulate a policy of societal importance.

ACE Requirements
All students must fulfill the Achievement Centered Education (ACE) requirements. Information about the ACE program may be viewed at ace.unl.edu (https://ace.unl.edu/).

The minimum requirements of CASNR reflect the common core of courses that apply to students pursuing degrees in the college. Students should work with an advisor to satisfy ACE outcomes 1, 2, 3, 4, 6, and 10 with the college requirements.

Catalog Rule
Students must fulfill the requirements stated in the catalog for the academic year in which they are first admitted to the University of Nebraska–Lincoln or when they were first admitted to a Joint Academic Transfer Program. Students transferring from a community college, but without admission to a Joint Academic Transfer Program, may be eligible to fulfill the requirements as stated in the catalog for an academic year in which they were enrolled at the community college prior to attending the University of Nebraska-Lincoln. This decision
should be made in consultation with academic advisors, provided the student a) was enrolled in a community college during the catalog year they are utilizing, b) maintained continuous enrollment at the previous institution for 1 academic year or more, and c) continued enrollment at the University of Nebraska-Lincoln within 1 calendar year from their last term at the previous institution. In consultation with advisors, a student may choose to follow a subsequent catalog for any academic year in which they are admitted to and enrolled as a degree-seeking student at the University of Nebraska–Lincoln in the College of Agricultural Sciences and Natural Resources. Students must complete all degree requirements from a single catalog year. The catalog which a student follows for degree requirements may not be more than 10 years old at the time of graduation.

**Learning Outcomes**

Graduates of plant and landscape systems will be able to:

1. Recognize, describe, and assess the value of nature.
2. Manage complex plant and soil systems which provide services for people and the planet.
3. Apply science and technology knowledge to problem solving.
4. Use diverse methods to generate, visualize, and communicate data that reveals truths and guides decision making.
5. Demonstrate effective communication to engage a target audience based on available information.
6. Lead and contribute to teams to amplify success in problem solving.

**Major Requirements**

The following basic courses are required for a bachelor of science degree in plant and landscape systems. In addition, students must select and meet the requirements of one of the options, depending upon their particular interests and vocational goals. Courses with an * indicates that at least one additional course not found in the core or option requirements is required as a prerequisite.

**Crop and Soil Management**

Select 9 hours from the following:

- PLAS 240: Forage Crop and Pasture Management
- PLAS 269: Principles of Soil Management
- PLAS 426: Invasive Plants
- PLAS 431: Site-specific Crop Management

Credit Hours Subtotal: **30**

**Capstone Course (ACE 10)**

Select one of the following:

- PLAS 403: Scientific Writing and Communication
- PLAS 405: Crop Management Strategies
- PLAS 445: Livestock Management on Range and Pasture
- PLAS 475: Water Quality Strategy
- PLAS 488: Entrepreneurship and Enterprise Development

Credit Hours Subtotal: **3**

**Emphases and Minors**

Complete two emphases, one emphasis and one minor, or two minors (minimally one must be in CASNR) for a minimum of 24 credit hours. Completion of a second major will account for 12 credits of this requirement. Courses used in agronomy option cannot be used in an emphasis area.

Students majoring in Plant and Landscape Systems cannot complete minors in agronomy, horticulture, landscape design and management, or turfgrass science and management. Students interested in these areas of study (outside of their option) should pursue relevant emphases.

Free Electives: **14**

### Emphases and Minors

Complete two emphases, one emphasis and one minor, or two minors (minimally one must be in CASNR) for a minimum of 24 credit hours. Completion of a second major will account for 12 credits of this requirement. Courses used in agronomy option cannot be used in an emphasis area. Students majoring in Plant and Landscape Systems cannot complete minors in agronomy, horticulture, landscape design and management, or turfgrass science and management. Students interested in these areas of study (outside of their option) should pursue relevant emphases.

### Free Electives

Credit Hours Subtotal: 16-17

Total Credit Hours 71

### Emphasis Areas

#### Urban Food Systems

The Urban Food Systems emphasis offers a multidisciplinary exploration of urban agriculture and local food systems. Courses in specialty crop production, urban soils, food science and nutrition, and entrepreneurship will prepare students to manage or consult with urban farms and food system stakeholders.

*SOL 455 requires CHEM 110A & CHEM 110L and CHEM 221A & CHEM 221L or CHEM 251.*

#### Urban Food Systems Emphasis Requirements

**Production**

Choose at least 3 credits from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PLAS 306</td>
<td>Greenhouse Practices and Management</td>
<td>3</td>
</tr>
<tr>
<td>PLAS 307</td>
<td>Hydroponics for Growing Populations</td>
<td></td>
</tr>
</tbody>
</table>

*These courses are recommended for students interested in urban agriculture, local food systems, and entrepreneurship.*
PLAS 353 Vegetable Crop Production Laboratory
PLAS 354 Fruit Production Laboratory

Soils
Choose 3 credits from the following:
- SOIL 453 Urban Soil Properties and Management
- SOIL 455 Soil Chemistry and Mineralogy (*)

Food
Choose 2-3 credits from the following:
- FDST 101 Introductory Food Science
- FDST 131 The Science of Food
- NUTR 250 Human Nutrition and Metabolism
- NUTR 372 Food Safety and Sanitation

Marketing, Business, or Entrepreneurship
Choose at least 3 credits from the following:
- AECN 225 Agribusiness Entrepreneurship in Food Products Marketing
- PLAS 388 Business Systems in Entrepreneurship
- PLAS 488 Entrepreneurship and Enterprise Development

Total Credit Hours 12

Natural Resources Conservation
The Natural Resources Conservation emphasis prepares students for careers in soil, water, and landscape conservation. These professionals could be experts in providing technical and conservation planning assistance related to agricultural operations and environmental conservation. Emphasis completion meets the minimum requirements for the current federal occupational requirements in positions in soil and/or natural resources conservation or management. To meet the occupational requirements, the SOIL subject codes on cross-listed courses is required.

* NRES 451 requires SOIL 361. SOIL 361 requires a second semester of chemistry, either CHEM 106A & CHEM 106L or CHEM 110A & CHEM 110L. SOIL 354 requires physics, MSYM 109, PHYS 141 or PHYS 151. SOIL 455 requires CHEM 110A & CHEM 110L and CHEM 221A & CHEM 221L or CHEM 251.

Natural Resources Conservation Emphasis Requirements 1,2
- SOIL 279 Soil Evaluation
- PLAS 245 Introduction to Grassland Ecology and Management
- or PLAS 425 Cover Crops in Agroecosystems
- WATS 281 Introduction to Water Science
Choose 4 credits from the following:
- PLAS 242 North American Wildland Plants
- PLAS 440 Great Plains Ecosystem
- PLAS 442 Wildland Plants
- NRES 451 Soils, Water, and Environmental Chemistry (*)
- SOIL 269 Principles of Soil Management
- SOIL 354 Soil Conservation and Watershed Management (*)
- SOIL 361 Soils, Environment and Water Quality (*)
- SOIL 366 Soil Nutrient Relationships
- SOIL 379 Advanced Soil Evaluation

SOIL 455 Soil Chemistry and Mineralogy (*)
SOIL 460 Soil Microbial Ecology
SOIL 472 Applied Soil Physics
SOIL 477 Great Plains Field Pedology

Credit Hours Subtotal: 12
Total Credit Hours 12

1 Emphasis completion meets the minimum requirements for the current federal occupational requirements in positions in soil and/or natural resources conservation or management.

2 To meet the occupational requirements, the SOIL subject codes on cross-listed courses are required.

Flowers
The Flowers emphasis will prepare students for careers in the floral industry including growing and managing floral crops and designing and marketing floral arrangements and ornamental plants.

Flowers Emphasis Requirements
PLAS 261 Floral Design I (ACE 7, can count in PLAS Core and in the emphasis.) 3

Identification, Production, and Design
Choose 9 credits from the following:
- PLAS 214 Herbaceous Landscape Plants
- PLAS 262 Floral Design II
- PLAS 306 Greenhouse Practices and Management
- PLAS 355 Perennial, Pot and Bedding Plant Production Laboratory
- PLAS 388 Business Systems in Entrepreneurship
- PLAS 488 Entrepreneurship and Enterprise Development

Credit Hours Subtotal: 12
Total Credit Hours 12

Water for Food
The Water for Food emphasis provides an opportunity for specialization in water quality and management leading to careers working in landscapes with high ground water vulnerability and in irrigated plant production systems.

* SOIL 361 requires a second semester of chemistry, either CHEM 106A & CHEM 106L or CHEM 110A & CHEM 110L. PLAS 452 and SOIL 354 require physics, MSYM 109, PHYS 141, or PHYS 151.

Water for Food Emphasis Requirements
Choose 12 hours from the following:
- SCIL 109 Water in Society (ACE 8)
- WATS 281 Introduction to Water Science
- SOIL 361 Soils, Environment and Water Quality
- PLAS 452 Irrigation Systems Management
- SOIL 354 Soil Conservation and Watershed Management (*)
- WATS 475 Water Quality Strategy

Credit Hours Subtotal: 12
Total Credit Hours 12
**Agronomic Crop Production**

For students completing the Agronomy option, the Agronomic Plant Production emphasis provides advanced coursework in crop and soil management and prepares students for careers as agronomists, seed and input sales representatives, crop advisors, and farm managers. Students completing this emphasis from outside of the Agronomy option will benefit from foundational knowledge in agronomic crop and soil fertility management.

PLAS 452 requires physics (MSYM 109, PHYS 141 or PHYS 151).

*indicates that at least one additional course is required as a prerequisite.

**taught only in the summer

**Specialty Crop Production**

For students completing the Horticulture option, the Specialty Crop Production emphasis provides advanced coursework with a focus on pest and fertility management in field and controlled environment specialty crop systems. This emphasis leads to careers in farm management, greenhouse and hydroponic production, seed and input sales, and crop consulting. Students completing this emphasis from outside of the Horticulture option will benefit from foundational knowledge in specialty crop propagation and production.

Total Credit Hours 12

**Soil Science**

The Soil Science emphasis prepares students for careers as a soil scientist, agronomist, or crop advisor. These professionals may enjoy careers as a soil conservationist, in a soil testing laboratory, or consulting with farmers about soil management.
PLAS 455 requires CHEM 110A & CHEM 110L and CHEM 221A & CHEM 221L or CHEM 251. NRES 451 requires SOIL 361. SOIL 361 requires a second semester of chemistry, either CHEM 106A & CHEM 106L or CHEM 110A & CHEM 110L and NRES 281.

**Soil Science Emphasis Requirements**
Choose 12 credits from the following:

- SOIL 269 Principles of Soil Management
- SOIL 279 Soil Evaluation
- SOIL 366 Soil Nutrient Relationships
- SOIL 379 Advanced Soil Evaluation (Soil Judging Team; can be taken multiple semesters.)
- SOIL 453 Urban Soil Properties and Management
- SOIL 455 Soil Chemistry and Mineralogy (*)
- SOIL 460 Soil Microbial Ecology
- SOIL 472 Applied Soil Physics
- SOIL 477 Great Plains Field Pedology
- PLAS 496 Independent Study

NRES 451 requires a second semester of chemistry, either CHEM 106A & CHEM 106L or CHEM 110A & CHEM 110L and NRES 281.

Credit Hours Subtotal: 12
Total Credit Hours 12

**Entrepreneurship**
The Entrepreneurship emphasis focuses on opportunities to create a unique path that fulfills your career purpose. This emphasis will allow you to explore the mindset and process of becoming an entrepreneur. These skills are critical to compete in the 21st century workplace as well as preparing for business ownership.

**Entrepreneurship Emphasis Requirements**

**Entrepreneurship**
Choose 5-6 credits from the following:

- EAEP 101 Introductory Seminar on Opportunities in Entrepreneurship
- EAEP 275 Agribusiness Entrepreneurial Finance
- ENTR 322 Family Business
- PLAS 388 Business Systems in Entrepreneurship
- PLAS 488 Entrepreneurship and Enterprise Development

**Accounting**

- ACCT 200 Accounting for Business Decisions
  or ACCT 201 Introductory Accounting I

**Marketing, Finance, and Supply Chain Management**

Choose 3-6 credits from the following:

- FINA 260 Personal Finance
- MRKT 225 Agribusiness Entrepreneurship in Food Products Marketing
- MRKT 257 Sales Communication (ACE 2, can count in PLAS Core and in the emphasis.)
- MNGT 361 Human Resource Management

Credit Hours Subtotal: 12
Total Credit Hours 12

**Plant Science Research**
The Plant Science Research emphasis is designed for students interested in pursuing M.S. or Ph.D. degrees in agronomy, horticulture, or turfgrass science. Coursework in physics, math, and chemistry provides broad expertise in the life sciences, and fulfills graduate admission requirements at most research universities — including the University of Nebraska–Lincoln.

**Plant Science Research Emphasis Requirements**
Research experience for at least one internship

**Accounting**

- MATH 104 or MATH 106 from Core
- PHYS 141 Elementary General Physics I
  or PHYS 151 Elements of Physics
  or MSYM 109 Physical Principles in Agriculture and Life Sciences
- CHEM 110A General Chemistry II
  & CHEM 110L General Chemistry II Laboratory

Choose 4 credits from the following:

- CHEM 251 Organic Chemistry I
  & CHEM 253 and Organic Chemistry I Laboratory
- MATH 107 Calculus II
- PHYS 142 Elementary General Physics II
- PLAS 325 Introductory Plant Physiology
- PLAS 478 Plant Anatomy

Credit Hours Subtotal: 12
Total Credit Hours 12

**Plant Protection**
The Plant Protection emphasis prepares students for careers in the plant protection industry with advanced coursework in weed science, entomology, plant pathology, and wildlife management. These professionals may enjoy careers as crop scouts and advisors, agronomists and horticulturists, chemical sales representatives, custom applicators, and farm and greenhouse managers.

Sustainable Landscape Management

Students completing the Sustainable Landscape Management emphasis will benefit from foundational knowledge in landscape management. For students in the Landscape Design and Management option who select the design capstone (PLAS 469), you will need to select four of five classes from PLAS 227, PLAS 300, PLAS 319, PLAS 326 and PLAS 470. This emphasis may lead to careers in management of public parks, arboreta and gardens, zoos, city and state properties, corporate landscapes, and private residences.

Sustainable Landscape Management Emphasis Requirements

Choose 3 credits from the following if not already completed in an option:

<table>

Requirements for Minor Offered by Department

Agronomy Minor

Students in the Plant and Landscape Systems major are not eligible for this minor. Instead those students should pursue the agronomy option or the agronomic crop production emphasis within the major. All other students are eligible to pursue this minor.

A minor in agronomy consists of a minimum of 18 credit hours, including at least 6 hours at the 300 level or above. A total of no more than 3 hours of credit in PLAS 395A Internship in Agronomy, PLAS 496 Independent Study, or PLAS 498 Senior Project may be applied to the minor.

Core Courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PLAS 131</td>

</tr>
<tr>
<td>PLAS 132</td>
<td>Agronomic Plant Science Laboratory 1</td>
</tr>
<tr>
<td>or PLAS 278</td>
<td>Botany</td>
</tr>
<tr>
<td>PLAS 153</td>
<td>Soil Resources</td>
</tr>
</tbody>
</table>

Credit Hours Subtotal: 8

Additional Courses

Select 3-4 hours from the following: 2

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PLAS 204</td>
<td>Resource-Efficient Crop Management</td>
</tr>
<tr>
<td>PLAS 278</td>
<td>Botany</td>
</tr>
<tr>
<td>PLAS 240</td>
<td>Forage Crop and Pasture Management</td>
</tr>
<tr>
<td>PLAS 269</td>
<td>Principles of Soil Management</td>
</tr>
</tbody>
</table>

Select 6-7 credits, 6 credits of which must be at the 300-level or above. It is recommended, but not required, to select courses within one focus area.

Agronomic Crop Production

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PLAS 340</td>
<td>Range Management and Improvement</td>
</tr>
</tbody>
</table>

1: Some courses may have prerequisites; check the catalog.
2: Students should consult with an advisor to select courses within the minor.
3: Students may also select courses in agronomy, if not already completed.
Plant Breeding and Genetics

PLAS 409A Case studies in plant breeding: Breeding for Disease Resistance
PLAS 409B Case Studies in plant breeding: Transgenic strategies for disease resistance
PLAS 411 Crop Genetic Engineering
PLAS 412 Crop and Weed Genetics
PLAS 420 Bioinformatics Applications in Agriculture

Agroecology

PLAS 425 Cover Crops in Agroecosystems
PLAS 435 Agroecology
PLAS 436 Agroecosystems Analysis
PLAS 439 Organic Farming and Food Systems
PLAS 440 Great Plains Ecosystem
PLAS 444 Ecosystem Monitoring and Assessment
PLAS 489 Urbanization of Rural Landscapes

Soil Science

PLAS 366 Soil Nutrient Relationships
PLAS 455 Soil Chemistry and Mineralogy
PLAS 460 Soil Microbial Ecology
PLAS 472 Applied Soil Physics
PLAS 361 Soils, Environment and Water Quality
PLAS 477 Great Plains Field Pedology

Total Credit Hours 18

1 If PLAS 133 or PLAS 134 has already been taken, PLAS 132 is not required. However, 18 credit hours are still required for the minor. Students may replace the 1 credit from PLAS 132 with any of the courses listed below.

2 Only one of these courses may be used toward the agronomy minor.

Horticulture Minor

Students in the Plant and Landscape Systems major are not eligible for this minor. Instead those students should pursue the horticulture option or one of the horticulture emphasis areas within the major. All other students are eligible to pursue this minor. A minor in horticulture consists of a minimum of 18 credit hours, including at least 6 hours at the 300 level or above. A total of no more than 3 hours of credit in PLAS 395B Internship in Horticulture, PLAS 391B Special Topics in Horticulture, or PLAS 399 Independent Study may be applied to the minor.

Core Courses

PLAS 131 Plant Science 3
PLAS 133 Horticultural Plant Science Laboratory 1 1

PLAS 212 Woody Plants for Landscapes: Identification, Management, and Use 3
PLAS 221 Plant Propagation 3

Credit Hours Subtotal: 10

Additional Courses

Select 8 hours, 6 of which must be at the 300-level or above. It is recommended, but not required, to select courses within one focus area.

Landscape Design and Management Minor

Students in the Plant and Landscape Systems major are not eligible for this minor. Instead those students should pursue the landscape design and management option or emphasis area within the major. All other students are eligible to pursue this minor. A minor in landscape design and management consists of a minimum of 18 credit hours, including at least 6 hours at the 300 level or above. A total of no more than 3 hours of credit in PLAS 395T Internship in Turfgrass Science and Management may be applied to the minor.

Credit Hours Subtotal: 18

Total Credit Hours: 18
PLAS 127 Survey of Turfgrass and Landscape Management
Description: Introduction to careers, internships and co-curricular activities in turfgrass and landscape management.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Grading Option: Graded with Option

PLAS 131 Plant Science
Description: The biology of plants grown for food, feed, fuel, fiber and fun! Starting with natural and managed ecosystems and their interactions, the course then introduces how plants obtain and manage water and nutrients before giving a big picture view of carbon assimilation, metabolism and storage in terms of plant productivity and growth in variable environments. The way plants respond to endogenous and applied growth regulators as well as genetic signals is described, before considering the role of genetics in plant pest interactions and management.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option
Offered: FALL/SPR
Prerequisite for: BIOS 369, PLPT 369; ENTO 308; NRES 220; NRES 302, PLAS 302; NRES 310; PLAS 132; PLAS 133; PLAS 134; PLAS 204; PLAS 221; PLAS 227; PLAS 228; PLAS 240, RNGE 240, GRAS 240; PLAS 278; PLAS 325; PLAS 352; PLAS 353; PLAS 354; PLAS 355; PLAS 362; PLPT 210
ACE: ACE 4 Science
Course and Laboratory Fee: $5

PLAS 132 Agronomic Plant Science Laboratory
Prerequisites: PLAS 131 or parallel
Description: Growth, development, morphology and staging of annual and perennial monocot and dicot plants produced for grain, forage and grazing. Evaluation of seed, grain and forage quality for plants of agronomic importance.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Grading Option: Graded with Option
Offered: FALL/SPR
Prerequisite for: ENTO 308; PLAS 306; PLAS 307
Course and Laboratory Fee: $10

PLAS 133 Horticultural Plant Science Laboratory
Prerequisites: PLAS 131 or parallel
Description: Horticulture plant morphology, physiology, cell anatomy and plant growth are explored through application of practices used in industry. Emphasis on intensive production systems appropriate to specialty and greenhouse grown horticultural plants
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Grading Option: Graded with Option
Offered: FALL/SPR
Prerequisite for: PLAS 306; PLAS 307

PLAS 134 Plant Sciences Laboratory
Prerequisites: Prior or concurrent enrollment in PLAS 131 required.
Notes: Open to all majors and minors, except Agronomy or Horticulture.
Description: An exploration of plant morphology, physiology, and maturation with an emphasis on environmental, biotic, and human interactions within production and landscape systems. Not open to Agronomy or Horticulture majors or minors.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Grading Option: Graded
Prerequisite for: ENTO 308; PLAS 306; PLAS 307
Course and Laboratory Fee: $5

PLAS 153 Soil Resources
Crosslisted with: SOIL 153
Description: Investigation into the physical, chemical and biological properties of soils, in relation to their appropriate uses, protection, and vital roles or functions in broader plant-soil systems. Apply exercises such as discussion, evidence-based writing, assessment, planning, problem-solving, and presentations in relation to principles and practices involving all aspects of soils.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Grading Option: Graded with Option
Offered: FALL/SPR
Prerequisite for: AGEN 431, PLAS 431, MSYM 431; LARC 487, NRES 487; MSYM 354, SOIL 354, WATS 354; NRES 245, PLAS 245; NRES 319; PLAS 204; PLAS 269, SOIL 269; PLAS 327, PLAS 361, GEOL 361, NRES 361, SOIL 361, WATS 361; PLAS 366, SOIL 366; PLAS 453, LARC 453, SOIL 453; PLAS 455, AGRO 855, NRES 455, NRES 855, SOIL 455; PLAS 472, AGRO 872, NRES 472, NRES 872, SOIL 472, WATS 472
Course and Laboratory Fee: $5

PLAS 170 Residential Landscape Design
Description: Introductory course in home landscaping focusing on basic design elements and processes. Students prepare a program, analyze a dwelling and site, determine a phased budget, conceptualize a layout, and select detailed elements and techniques to implement a design for an actual residence.
Credit Hours: 2
Max credits per semester: 2
Max credits per degree: 2
Grading Option: Graded with Option

PLAS 200 Landscape and Environmental Appreciation
Crosslisted with: GEOG 200, LARC 200
Description: Values and processes in human landscapes and natural environments. Concepts and tools to understand the context of local and global environments and significant historical landscapes. Landscape as an indicator of aesthetic quality, design principles and processes as integrators of humans and nature, and the garden as a model for creating sustainable landscapes.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option
ACE: ACE 7 Arts ACE 9 Global/Diversity
PLAS 201 Dendrology: Study and Identification of Trees and Shrubs  
Crosslisted with: NRES 201, LARC 201  
Description: An introduction to the naming, identification, and natural history of woody trees and shrubs in North America with emphasis on trees common to Nebraska. Covers morphology, natural site conditions, wildlife and human uses of woody trees and shrubs.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Grading Option: Graded with Option  
Offered: FALL  

PLAS 204 Resource-Efficient Crop Management  
Prerequisites: PLAS 131 and PLAS/SOIL 153  
Description: The integration of crop and soil science, plant breeding, climatology and integrated pest management disciplines to develop and evaluate crop management strategies that make the most efficient use of natural resources such as solar radiation, water, and soil, as well as other external inputs utilized for field crop management.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Grading Option: Graded with Option  
Offered: SPRING  
Prerequisite for: AGEN 431, PLAS 431, MSYM 431; PLAS 395A; PLAS 405  

PLAS 212 Woody Plants for Landscapes: Identification, Management, and Use  
Crosslisted with: NRES 212, LARC 212  
Description: Identification, basic management and design uses of trees and shrubs for sustainable landscapes, with an emphasis on native plants and plants adapted to the Plains states. Emphasis is on live specimens in outdoor environments, supported by online resources.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Grading Option: Graded with Option  
Offered: FALL  

PLAS 213 Cultivars and Varieties of Woody Plants for Landscapes  
Crosslisted with: NRES 213, LARC 213  
Description: Characteristics of commercially available trees and shrubs used in urban landscapes. Compares differences among cultivars, design uses, and management issues using a combination of live specimens in outdoor environments and online resources.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Grading Option: Graded with Option  
Offered: SPRING  

PLAS 214 Herbaceous Landscape Plants  
Crosslisted with: NRES 214  
Description: Identification of herbaceous plants with ornamental value in the landscape including native and introduced annuals, perennials, grasses and cultivars. Typical ecological associations, environmental tolerances and/or intolerance, cultural requirements, and design characteristics.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Grading Option: Graded with Option  

PLAS 215 Genetics  
Prerequisites: 3 hrs biological sciences.  
Description: Discovery of the biology of genes and the application of genetics principles to understand the control and inheritance of traits in families and populations. Focus is on animals and plants that are important in medicine, agriculture and nature. Learning emphasis is problem solving via online, instant feedback assessments, group discussion, experimental data analysis and context-based exams.  
Credit Hours: 4  
Max credits per semester: 4  
Max credits per degree: 4  
Grading Option: Graded with Option  
Prerequisite for: ASCI 330; ASCI 486; PLPT 418, PLPT 818, MBIO 418  
Course and Laboratory Fee: $20  

PLAS 216 Plant Breeding Principles and Practice  
Prerequisites: High school biology and chemistry. BIOS 101 and 101L or 102 or equivalent recommended.  
Description: Plant breeding theory and technique. Application of genetic principles to plant improvement. Experience with breeding agronomic and horticultural plant species to illustrate plant mating systems and breeding principles.  
Credit Hours: 2  
Max credits per semester: 2  
Max credits per degree: 2  
Grading Option: Graded with Option  

PLAS 221 Plant Propagation  
Prerequisites: PLAS 131  
Notes: Recommend PLAS 278 taken previously or concurrently  
Description: Practice different methods of plant propagation and explore the effects of environmental management on propagation success using the scientific method.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Grading Option: Graded with Option  
Offered: SPRING  
Prerequisite for: PLAS 395B  

PLAS 222 Introductory Turfgrass Management  
Prerequisites: PLAS 131 or PLAS 278 or either concurrently.  
Description: Introduction to turfgrasses, their management and use, and to the turfgrass industry.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Grading Option: Graded with Option  
Offered: FALL  
Prerequisite for: PLAS 327; PLAS 395T  

PLAS 228 Introduction to Landscape Management  
Prerequisites: PLAS 131 or PLAS 278 or either concurrently.  
Description: An overview of landscape systems for human intent. Includes seasonal and materials-specific BMPs for assessment, soil work, irrigation, plants and hardscapes, pests and diseases, using a combination of site visits, collaborations, and applied case studies.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Grading Option: Graded with Option  
Offered: FALL  
Prerequisite for: PLAS 395L; PLAS 470
PLAS 229 Introductory Turfgrass Management Laboratory  
**Description:** Laboratory covering turfgrass identification and management.  
**Credit Hours:** 1  
**Max credits per semester:** 1  
**Max credits per degree:** 1  
**Grading Option:** Graded with Option  
**Offered:** FALL  
**Course and Laboratory Fee:** $40

PLAS 230 Technical Reporting in Plant and Landscape Systems  
**Notes:** This course is intended for first or second year students.  
**Description:** Learn introductory data science skills necessary to collect, manage, and analyze data. Gain the necessary skills to interpret and effectively communicate information derived from data.  
**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Grading Option:** Graded  
**Offered:** FALL/SPR

PLAS 240 Forage Crop and Pasture Management  
**Crosslisted with:** RNGE 240, GRAS 240  
**Prerequisites:** PLAS 131 or BIOS 101 or LIFE 120  
**Description:** Principles basic to the establishment, management, and utilization of forage crops and pastures. Plant identification and selection, seeding, fertilization, irrigation, forage quality and utilization, hay and silage preservation, and grazing management. The role of forages and ranges in developing a sustainable agriculture.  
**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Grading Option:** Graded with Option  
**Offered:** FALL/SPR  
**Pre requisite for:** PLAS 340, RNGE 340, GRAS 340

PLAS 242 North American Wildland Plants  
**Crosslisted with:** RNGE 242, GRAS 242  
**Prerequisites:** Permission.  
**Notes:** PLAS/RNGE 240 recommended.  
**Description:** Identification and description of two-hundred important wildland plants of North America. Characteristics of these plants evaluated in terms of management implications.  
**Credit Hours:** 1  
**Max credits per semester:** 1  
**Max credits per degree:** 4  
**Grading Option:** Graded with Option  
**Offered:** FALL/SPR

PLAS 245 Introduction to Grassland Ecology and Management  
**Crosslisted with:** NRES 245  
**Prerequisites:** PLAS 153  
**Description:** Grassland ecology and management is relevant to students with education and career goals in managing natural resources in Nebraska and the Great Plains. About 50% of the land area in Nebraska is classified as grassland (or rangeland) and is the land type with the most opportunity for enhancing biodiversity and wildlife habitat. Applying ecological principles and social values to managing rangeland resources, students will develop a knowledge and appreciation for the various grassland management uses and techniques available to resource managers.  
**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Grading Option:** Graded with Option  
**Offered:** FALL/SPR  
**ACE:** ACE 7 Arts

PLAS 247 Introduction to Landscaping  
**Prerequisites:** PLAS 153  
**Description:** Topics include design and planning, materials selection, plant identification and selection, principles of design and color, and practical experience in landscape design.  
**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Grading Option:** Graded  
**Offered:** SPRING  
**ACE:** ACE 7 Arts

PLAS 261 Floral Design I  
**Prerequisites:** PLAS 261  
**Description:** Advanced styles of floral design, foliage plant care and retail shop layout, as well as practical business knowledge in managing a small business. Topics include personnel, advertising, sales and floral marketing.  
**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Grading Option:** Graded with Option  
**Offered:** FALL/SPR  
**Course and Laboratory Fee:** $100

PLAS 265 Visual Communication for Landscape Design  
**Description:** Graphic and oral presentation techniques for landscape design. Introduction to use of various media and technologies, including hand graphics and computer programs.  
**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Grading Option:** Graded with Option  
**Offered:** FALL  
**Pre requisite for:** PLAS 267  
**Course and Laboratory Fee:** $10
PLAS 267 Introduction to Landscape Design Studio
Prerequisites: PLAS 265
Notes: Individual and team projects, in-class exercises and presentations. Includes site visits to urban landscapes.
Description: Process and elements used to design sustainable residential and small urban landscapes.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option
Offered: SPRING
Prerequisite for: PLAS 300; PLAS 301; PLAS 395L
Groups: Techniques
Course and Laboratory Fee: $15

PLAS 269 Principles of Soil Management
Crosslisted with: SOIL 269
Prerequisites: PLAS 153
Description: Current state-of-knowledge of soil and water management; impacts of water and wind erosion on soil productivity, and nutrient dynamics; soil management in response to the increased climate variability; improved management practices such as conservation tillage (i.e., no-till), cropping systems, cover crops, crop residue management, perennial systems, water management and irrigation; nutrient cycling; and soil quality and health.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option
Offered: FALL
Prerequisite for: PLAS 395A; PLAS 405

PLAS 270 Biological Invaders
Crosslisted with: NRES 270, PLPT 270
Prerequisites: 3 hrs biological sciences.
Description: Impact of exotic species and invasive organisms: agricultural and medical emerging disease; predicting biological invasions; biological control; regulatory, monitoring, and control efforts; ecological impact.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option

PLAS 275 Agribusiness Entrepreneurial Finance
Crosslisted with: AECN 275, EAEP 275, ENTR 275
Description: Overview of financial issues for agribusiness start-ups. Business funding specific to new enterprises. Case studies on financial practices for start-up firms.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option

PLAS 278 Botany
Prerequisites: BIOS 101 or LIFE 120 or PLAS 131
Description: Introduction to the plant kingdom and to plants as biological organisms; structure and function of cells, tissues, and organs with emphasis on seed plants; the important processes and concepts of life cycles, evolution, and physiology.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Grading Option: Graded with Option
Offered: SPRING
Prerequisite for: PLAS 227; PLAS 228

PLAS 279 Soil Evaluation
Crosslisted with: NRES 279, SOIL 279
Notes: PLAS/SOIL 153 - Soil Resources recommended, but not required. This course includes an inter-collegiate Soil Judging contest that takes place in the North Central region of the United States during the course of the class, or a course-based undergraduate research experience.
Description: Apply fundamental knowledge to the description of soils in the field. Application of techniques employed in writing descriptions of soil morphology and in classifying and interpreting soils.
Credit Hours: 2
Max credits per semester: 2
Max credits per degree: 2
Grading Option: Graded with Option
Offered: FALL
Prerequisite for: NRES 379, PLAS 379, SOIL 379
Course and Laboratory Fee: $40

PLAS 291 Special Topics in Plant and Landscape Systems
Prerequisites: Permission.
Notes: Requires advanced permission before registering for the course.
Description: Topics vary.
Credit Hours: 1-6
Min credits per semester: 1
Max credits per semester: 6
Max credits per degree: 12
Grading Option: Graded with Option
Offered: FALL/SPR

PLAS 295 Internship
Crosslisted with: RNGE 295, SOIL 295
Prerequisites: Sophomore standing and completion of an internship contract. The internship contract is subject to approval by the department. Internships completed without a signed contract may not qualify for credit.
Notes: Pass/No Pass only; requires advanced permission before registering for the course.
Description: Professional experience in a plant, landscape or soil interest area. Experience may be with a business, government agency, organization, or a university research, extension, or teaching program.
Credit Hours: 1-3
Min credits per semester: 1
Max credits per semester: 3
Max credits per degree: 6
Grading Option: Pass No Pass
Offered: FALL/SPR
PLAS 300 Introduction to Landscape Construction
Prerequisites: PLAS 267 or concurrent
Description: Materials, systems, and methods for constructing sustainable residential and small urban landscapes. Includes site grading, hardscapes, irrigation, lighting, ponds and water features, using a combination of guest speakers, site visits and online resources.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option
Offered: SPRING
Course and Laboratory Fee: $15

PLAS 301 Introduction to Landscape Contracting
Prerequisites: PLAS 267 and PLAS 388 or concurrent
Notes: Offered Spring of even years and alternate with PLAS 300.
Description: Overview of the landscape contracting business and administration of contracts, cost estimation and bidding.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded
Offered: SPRING
Groups: Techniques

PLAS 302 Tree Biology
Crosslisted with: NRES 302
Prerequisites: BIOS 101 or LIFE 120 or PLAS 131
Description: The study of the structure and function of woody plants, with a focus on trees growing in temperate climates. Covers the basics of wood physiology in terms of the biological, physical, and chemical processes utilized by tree to function. The anatomy and morphology of trees with a focus on the impacts of tree maintenance to the structure and function of landscape trees.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option
Offered: FALL

PLAS 306 Greenhouse Practices and Management
Prerequisites: PLAS 132 or PLAS 133 or PLAS 134 or LIFE 120
Description: Principles and practices involved in the development, operation and use of greenhouses and other protected plant growth environments.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option
Offered: SPRING

PLAS 307 Hydroponics for Growing Populations
Prerequisites: PLAS 132 or PLAS 134 or PLAS 133 or LIFE 120
Description: Globally diverse peoples are explored through culture, diets, food production systems, and environment with emphasis on the application of hydroponic plant production systems to address food needs that are culturally conscious. Hydroponic methodologies are investigated and prototypes are designed, built, and tested for proof of concept.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded
Offered: FALL/SPR
ACE: ACE 9 Global/Diversity

PLAS 319 Edible Landscapes
Prerequisites: Junior Standing or permission
Description: Identification, environmental requirements, and sustainable care and management of herbaceous perennial and woody plants with both edible and aesthetic landscape value. Historical and human cultural ties or ethnobotanical traditions associated with the plants will be utilized for appropriate plant selection and use.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option
Offered: SPRING
ACE: ACE 9 Global/Diversity

PLAS 321 Arboriculture: Maintenance & Selection of Landscape Trees
Crosslisted with: NRES 321
Prerequisites: Junior standing
Description: Covers practical application of the science of tree growth, development, and management in human dominated landscapes. Tree selection for varying landscapes and objectives, proper planting and pruning, identification and correction of tree defects, and working with tree pest issues.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Grading Option: Graded with Option
Offered: SPRING
Groups: Laboratory and Field Training

PLAS 325 Introductory Plant Physiology
Prerequisites: PLAS 131 or LIFE 120
Description: Introduction to physiological and developmental processes in plants. Topics include plant-water relations, photosynthesis, carbon metabolism and source-sink translocation, light responses, hormonal regulation during growth, development and environmental stresses such as drought, heat, salinity, flooding stress among others. Emphasizes the development of a broader knowledge of how crops respond to abiotic factors associated with changing climate through conceptual integration of physiological and molecular processes. Science communication skills and teamwork experience are developed through oral presentations and poster sessions.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Grading Option: Graded with Option
Offered: SPRING
Prerequisite for: PLAS 441, AGRO 841, HORT 841, RNGE 441, GRAS 441
PLAS 326 Landscape Solutions
Description: Using processes and problem-solving approach to identify and analyze common landscape management situations in commercial, public, and residential landscapes. Integrate design, environment, function, pest and disease, and existing management practices to produce recommendations.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option
Offered: SPRING
Course and Laboratory Fee: $30

PLAS 327 Turfgrass Science and Management
Prerequisites: PLAS/SOIL 153; CHEM 105A and 105L or CHEM 109A and 109L; and PLAS 227
Description: Scientific principles of turf species adaptation, turf and/or soil relationships, establishment, fertility, mowing, irrigation, and pest control of turf species.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option

PLAS 330 Pruning Ornamentals
Description: Why, when and how to prune ornamental landscape plants. Demonstrations and field opportunities on how to choose and how to use pruning tools correctly.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Grading Option: Graded with Option

PLAS 340 Range Management and Improvement
Crosslisted with: RNGE 340, GRAS 340
Prerequisites: PLAS 240 or NRES 245
Description: The principles of range management within the ecosystem framework. Range improvement practices and grazing systems; plant control using biological, chemical and mechanical factors; prescribed burning; range seeding; range fertilization; and the integration of range with other forage resources.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option
Offered: SPRING
Prerequisite for: PLAS 445, AGRO 845, ASCI 451, ASCI 851, RNGE 445, GRAS 445

PLAS 352 Production and Physiology of Horticultural Crops
Prerequisites: PLAS 131
Notes: PLAS 353 or PLAS 354 or PLAS 355 parallel enrollment suggested
Description: The physiological principles underlying the management and production of floricultural, fruit, vegetable and specialty crops.
Credit Hours: 2
Max credits per semester: 2
Max credits per degree: 2
Grading Option: Graded with Option
Offered: FALL
Prerequisite for: PLAS 395B

PLAS 353 Vegetable Crop Production Laboratory
Prerequisites: PLAS 131
Notes: PLAS 133, PLAS 221, and PLAS 352 recommended.
Description: Vegetable crop production principles and practices, both locally and from a global perspective. Experience with seeding, transplant production, and growing of vegetables in field and greenhouse.
Credit Hours: 2
Max credits per semester: 2
Max credits per degree: 2
Grading Option: Graded with Option
Offered: FALL
Course and Laboratory Fee: $40

PLAS 354 Fruit Production Laboratory
Prerequisites: PLAS 131
Notes: PLAS 133, PLAS 221, and PLAS 352 recommended.
Description: Fruit crop production principles and practices, both locally and from a global perspective. Experience with planting, pruning and layout of orchard, vineyard and small fruit crops, greenhouse propagation, and production practices.
Credit Hours: 2
Max credits per semester: 2
Max credits per degree: 2
Grading Option: Graded with Option
Offered: FALL

PLAS 355 Perennial, Pot and Bedding Plant Production Laboratory
Prerequisites: PLAS 131
Notes: PLAS 133, PLAS 221, and PLAS 352 recommended.
Description: Growing conditions of specific perennial, annual, pot plants, cut flowers. How to schedule and cost account plant production. Care of post-production plants. Experience propagating and growing perennial, pot and bedding plants and cut flowers in the greenhouse.
Credit Hours: 2
Max credits per semester: 2
Max credits per degree: 2
Grading Option: Graded with Option
Offered: FALL

PLAS 361 Soils, Environment and Water Quality
Crosslisted with: GEOL 361, NRES 361, SOIL 361, WATS 361
Prerequisites: PLAS/SOIL 153; MATH 102 or 103; two semesters chemistry (CHEM 105A and 105L, CHEM 106A and 106L, CHEM 109A and 109L, CHEM 110A and 110L) and WATS/GEOG/NRES 281
Description: Chemical and physical processes that influence the fate and transport of contaminants (inorganic, organic, microbial) in soil-water environments. Extent, fate, mitigation and impact of various sources of pollution. Remedial technologies used for environmental restoration of contaminated environments.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option
Prerequisite for: PLAS 458, AGRO 858, NRES 458, NRES 858, SOIL 458
PLAS 362 Nursery Crop Production
**Prerequisites:** PLAS 131
**Notes:** PLAS 133, 221, and PLAS 352 recommended.
**Description:** Principles underlying the production of nursery crops. Propagation, crop scheduling, transplanting, handling, and transportation of nursery crops. Cultural considerations such as media, fertilizers, irrigation, and pest control.
**Credit Hours:** 2
**Max credits per semester:** 2
**Max credits per degree:** 2
**Grading Option:** Graded with Option
**Offered:** SPRING

PLAS 366 Soil Nutrient Relationships
Crosslisted with: SOIL 366
**Prerequisites:** PLAS 153
**Description:** Explores nutrient behaviors in soil and factors affecting nutrient management. Students work on developing fertilizer plans for complex plant production systems that follow the right place, right amount, right source, right time philosophy and ensure production of healthy and nutritious plants, improve profits and enterprise sustainability, fulfill legal requirements, and protect soil and water quality.
**Credit Hours:** 4
**Max credits per semester:** 4
**Max credits per degree:** 4
**Grading Option:** Graded with Option
**Offered:** SPRING
**Prerequisite for:** PLAS 405

PLAS 375 Innovations for Agriculture
Crosslisted with: AGRI 375, EAEP 375
**Prerequisites:** Junior or Senior class standing.
**Description:** Explore sustainability challenges in plant and animal agricultural systems, assess current solutions, and identify opportunities for innovation. Research, develop, prototype, test, and pitch an innovative product, service, or technology for agriculture.
**Credit Hours:** 3
**Max credits per semester:** 3
**Max credits per degree:** 3
**Grading Option:** Graded
**Offered:** FALL

PLAS 379 Advanced Soil Evaluation
Crosslisted with: NRES 379, SOIL 379
**Prerequisites:** PLAS/NRES/SOIL 279
**Notes:** This course includes a national- or regional-level inter-collegiate Soil Judging contest that takes place during the course of the class.
**Description:** Apply fundamental knowledge and improve field techniques to the description and interpretation of soils in the field. Application of techniques employed in writing descriptions of soil morphology and in classifying and interpreting soils.
**Credit Hours:** 1
**Max credits per semester:** 1
**Max credits per degree:** 3
**Grading Option:** Graded with Option
**Offered:** FALL/SPR

PLAS 388 Business Systems in Entrepreneurship
Crosslisted with: ENTR 388, EAEP 388, ABUS 388
**Description:** Introductory models for a startup business. Ideation, customer segments, value proposition, minimal viable product and market fit.
**Credit Hours:** 3
**Max credits per semester:** 3
**Max credits per degree:** 3
**Grading Option:** Graded with Option
**Offered:** FALL/SPR
**Prerequisite for:** PLAS 301

PLAS 391A Special Topics in Agronomy
**Prerequisites:** Permission.
**Notes:** Requires advanced permission before registering for the course.
**Description:** Topics vary.
**Credit Hours:** 1-6
**Min credits per semester:** 1
**Max credits per semester:** 6
**Max credits per degree:** 12
**Grading Option:** Graded with Option
**Offered:** FALL/SPR

PLAS 391B Special Topics in Horticulture
**Prerequisites:** Permission.
**Notes:** Requires advanced permission before registering for the course.
**Description:** Topics vary.
**Credit Hours:** 1-6
**Min credits per semester:** 1
**Max credits per semester:** 6
**Max credits per degree:** 12
**Grading Option:** Graded with Option
**Offered:** FALL/SPR

PLAS 391L Special Topics in Landscape Design and Management
**Prerequisites:** Permission.
**Notes:** Requires advanced permission before registering for the course.
**Description:** Topics vary.
**Credit Hours:** 1-6
**Min credits per semester:** 1
**Max credits per semester:** 6
**Max credits per degree:** 12
**Grading Option:** Graded with Option
**Offered:** FALL/SPR

PLAS 391T Special Topics in Turfgrass Science and Management
**Prerequisites:** Permission.
**Notes:** Requires advanced permission before registering for the course.
**Description:** Topics vary.
**Credit Hours:** 1-6
**Min credits per semester:** 1
**Max credits per semester:** 6
**Max credits per degree:** 12
**Grading Option:** Graded with Option
**Offered:** FALL/SPR
PLAS 395A Internship in Agronomy
Prerequisites: Junior standing; PLAS 204 or 240 or 269; and completion of an internship contract. Internships completed without a signed contract not may qualify for credit.
Notes: Pass/No Pass only; requires advanced permission before registering for the course.
Description: Advanced internship in an agronomic enterprise. Must be a business, government agency, organization or university research, teaching, or extension program in which the student does not have previous internship credit.
Credit Hours: 1-3
Min credits per semester: 1
Max credits per semester: 3
Max credits per degree: 6
Grading Option: Pass No Pass
Offered: FALL/SPR

PLAS 395B Internship in Horticulture
Prerequisites: Junior Standing; PLAS 221 or PLAS 352 and completion of an internship contract. Internships completed without a signed contract may not qualify for credit
Notes: Pass/No Pass only; requires advanced permission before registering for the course.
Description: Advanced internship experience in a horticulture enterprise. Must be a business, government agency, organization or university research, teaching, or extension program in which the student does not have previous internship credit.
Credit Hours: 1-3
Min credits per semester: 1
Max credits per semester: 3
Max credits per degree: 6
Grading Option: Pass No Pass
Offered: FALL/SPR

PLAS 395L Internship in Landscape Design and Management
Prerequisites: Junior standing; PLAS 228 or PLAS 267; and completion of an internship contract. Internships completed without a signed contract not may qualify for credit.
Notes: Pass/No Pass only; requires advanced permission before registering for the course.
Description: Advanced professional experience in a landscape design and/or management enterprise. Experience must be with a business, government agency, organization, or a university research, extension, or teaching program in which the student does not have previous internship credit.
Credit Hours: 1-3
Min credits per semester: 1
Max credits per semester: 3
Max credits per degree: 6
Grading Option: Pass No Pass
Offered: FALL/SPR

PLAS 395T Internship in Turfgrass Science and Management
Prerequisites: Junior standing; PLAS 227 and completion of an internship contract. Internships completed without a signed contract may not qualify for credit.
Notes: Pass/No Pass only; requires advanced permission before registering for the course.
Description: Advanced internship experience in a turfgrass enterprise. Must be a business, government agency, organization, or university research, teaching or extension program in which the student does not have previous internship credit.
Credit Hours: 1-3
Min credits per semester: 1
Max credits per semester: 3
Max credits per degree: 6
Grading Option: Pass No Pass
Offered: FALL/SPR

PLAS 399 Independent Study
Prerequisites: Junior standing; 12 hrs plant science; and permission.
Notes: Requires advance approval of plan of work and is to be under the supervision and evaluation of a Horticulture departmental faculty member. Oral and written reports are mandatory at the completion of this Independent Study.
Description: Individual or group projects in research, literature review, or extension of course work.
Credit Hours: 1-5
Min credits per semester: 1
Max credits per semester: 5
Max credits per degree: 12
Grading Option: Graded with Option

PLAS 403 Scientific Writing and Communication
Crosslisted with: AGRO 803, HORT 803
Prerequisites: Senior standing or higher, an ACE 1 written communication course, an ACE 2 oral communication course, and permission of instructor.
Description: Reading and critiquing, writing, and presenting scientific information. Use research data to compose a manuscript in standard scientific format, and prepare and present a poster to a general audience. Ethical issues in research and writing.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded
ACE: ACE 10 Integrated Product

PLAS 405 Crop Management Strategies
Prerequisites: Senior standing; PLAS 204, PLAS/SOIL 269 or PLAS/SOIL 366; and permission.
Notes: JGEN 200 and/or JGEN 300, and AECN 201 recommended; a pre-semester trip is required.
Description: Application, expansion, and integration of principles from agricultural, economic and social sciences into systems-level the development and management of cropping systems.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option
Offered: FALL
ACE: ACE 10 Integrated Product
Course and Laboratory Fee: $60
PLAS 406 Plant Ecophysiology: Theory and Practice
Crosslisted with: AGRO 806, HORT 806, NRES 406, NRES 806
Prerequisites: Junior standing, 4 hrs ecology, and 4 hrs botany or plant physiology.
Description: Principles of plant physiology which underlie the relationship between plants and their physical, chemical and biotic environments. An introduction to the ecological niche, limiting factors and adaptation. An overview of the seed germination and ecology, plant and soil water relations, nutrients, plant energy budgets, photosynthesis, carbon balance and plant-animal interactions. An introduction to various field equipment used in ecophysiological studies.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Grading Option: Graded with Option

PLAS 407 Bio-Atmospheric Instrumentation
Crosslisted with: GEOG 469, METR 469, MSYM 469, NRES 469, AGRO 869, GEOG 869, HORT 807, METR 869, MSYM 869, NRES 869
Prerequisites: Junior standing; MATH 106; 4 hrs physics; physical or biological science major.
Description: Discussion and practical application of principles and practices of measuring meteorological and related variables near the earth's surface including temperature, humidity, precipitation, pressure, radiation and wind. Performance characteristics of sensors and modern data collection methods are discussed and evaluated.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option

PLAS 408 Microclimate: The Biological Environment
Crosslisted with: GEOG 408, METR 408, NRES 408, WATS 408, AGRO 808, GEOG 808, HORT 808, METR 808, NRES 808
Prerequisites: Junior standing; MATH 106 or equivalent, 5 hrs physics, major in any of the physical or biological sciences or engineering.
Description: Physical factors that create the biological environment. Radiation and energy balances of earth's surfaces, terrestrial and marine. Temperature, humidity, and wind regimes near the surface. Control of the physical environment through irrigation, windbreaks, frost protection, manipulation of light, and radiation. Applications to air pollution research. Instruments for measuring environmental conditions and remote sensing of the environment.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option
Prerequisite for: BSEN 954, NRES 954

PLAS 409A Case studies in plant breeding: Breeding for Disease Resistance
Crosslisted with: AGRO 809A, HORT 809A
Notes: A previous class in genetics is highly recommended.
Description: The application of fundamental genetics principles in inheritance, gene mapping and DNA analysis to decision making by plant breeders with the goal of improving disease resistance in crop cultivars. Learning is structured by the genetics discovery story told in published research articles and the thinking process of plant breeders who will use these discoveries in their work.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Grading Option: Graded with Option
Offered: FALL/SPR

PLAS 411 Crop Genetic Engineering
Crosslisted with: AGRO 811
Notes: A previous class in genetics is highly recommended.
Description: Basic steps required to produce genetically engineered crops, genetic engineering procedures used to develop current crops and innovations that will lead to future products, genetic engineering process and predicting how changes in different steps of the process influence the final crop, and application of genetic engineering technology to plan the development of new genetically engineered crops.
Credit Hours: 2
Max credits per semester: 2
Max credits per degree: 2
Grading Option: Graded with Option
Offered: FALL

PLAS 412 Crop and Weed Genetics
Crosslisted with: AGRO 812
Notes: A previous class in Genetics is highly recommended.
Description: Application of classical and molecular genetic principles to the explanation of variation observed in plant families and populations. Interpretation of information gathered from whole plant trait observation and from molecular analysis. Relationships between crops and weeds. Examples from genetic studies on both crop and weed species are the basis of course.
Credit Hours: 2
Max credits per semester: 2
Max credits per degree: 2
Grading Option: Graded with Option
Offered: SPRING
PLAS 414 Turfgrass Disease Management  
Crosslisted with: AGRO 814, HORT 814, PLPT 414, PLPT 814, TLMT 814  
Prerequisites: BIOS/PLPT 369 or one semester of introductory plant pathology.  
Description: Pathogens, epidemiology, and control of diseases specific to turfgrass.  
Credit Hours: 1  
Max credits per semester: 1  
Max credits per degree: 1  
Grading Option: Graded with Option

PLAS 418 Agroforestry Systems in Sustainable Agriculture  
Crosslisted with: HORT 818, NRES 417, NRES 817  
Prerequisites: 12 hours biological or agricultural sciences.  
Description: The roles of woody plants in sustainable agricultural systems of temperate regions. Emphasis on the ecological and economic benefits of trees and shrubs in the agricultural landscape. Topics include: habitat diversity and biological control; shelterbelts structure, function, benefits and design; intercropping systems; silvopastoral systems; riparian systems; and production of timber and specialty crops. Comparison of temperate agroforestry systems to those of tropical areas.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Grading Option: Graded with Option

PLAS 419 Applications of Remote Sensing in Agriculture and Natural Resources  
Crosslisted with: GEOG 419, GEOL 419, NRES 420, AGRO 819, GEOG 819, GEOL 819, NRES 820  
Notes: GEOG 418/NRES 418 recommended  
Description: Introduction to the practical uses of remote electromagnetic sensing in dealing with agricultural and water-resources issues.  
Credit Hours: 4  
Max credits per semester: 4  
Max credits per degree: 4  
Grading Option: Graded with Option  
Course and Laboratory Fee: $35

PLAS 420 Bioinformatics Applications in Agriculture  
Crosslisted with: AGRO 820  
Prerequisites: PLAS 215 or equivalent. Undergraduate students must be at the senior class level standing.  
Description: Introduction to applied computational methods to analyze biological data, efficiently manipulate large data sets, and automate workflows. Learn strategies for assembling and analyzing data generated by modern high throughput sequencing platforms.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Grading Option: Graded with Option  
Offered: FALL

PLAS 425 Cover Crops in Agroecosystems  
Crosslisted with: AGRO 825  
Prerequisites: PLAS 131 or PLAS 278; PLAS/SOIL 153 (or equivalent)  
Description: Explore the management, environmental, economic, and social considerations of cover crops across a diversity of agricultural production systems and regions. Grow cover crops, measure benefits and tradeoffs, and apply knowledge to make management and policy recommendations.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Grading Option: Graded  
Offered: FALL

PLAS 426 Invasive Plants  
Crosslisted with: AGRO 826, HORT 826, NRES 426, NRES 826  
Prerequisites: PLAS/SOIL 153; PLAS 131  
Description: Identification, biology and ecology of weedy and invasive plants. Principles of invasive plant management by preventative, cultural, biological, mechanical and chemical means using an adaptive management framework. Herbicide terminology and classification, plant-herbicide and soil-herbicide interactions, equipment calibration and dosage calculations.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Grading Option: Graded with Option  
Offered: SPRING

PLAS 427 Turfgrass Systems Management  
Crosslisted with: AGRO 827, HORT 827, TLMT 827  
Prerequisites: PLAS 227 and PLAS 327  
Description: Critical evaluation of turfgrass settings to create economical and environmentally friendly management systems for professionally managed turf areas.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Grading Option: Graded with Option  
ACE: ACE 10 Integrated Product  
Course and Laboratory Fee: $50

PLAS 429 Plant Biotechnology Applications  
Crosslisted with: AGRO 829  
Prerequisites: Faculty Permission  
Description: Application of plant biotechnology to answer biological questions. Development of writing and thinking skills with a working knowledge of plant biology and biotechnology. Learning in a lab focused setting to solidify skills used in molecular biology, biochemistry, cell biology, and computational biology.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Grading Option: Graded  
Offered: SPRING

</table>
PLAS 439 Organic Farming and Food Systems
Crosslisted with: AGRO 839, HORT 839
**Prerequisites:** 12 credits of agricultural or biological science, economics, or natural resources
**Description:** History of organic farming and horticultural systems, organic certification, nutrient and pest management in organic systems, planning organic enterprises including production and marketing, resilience of organic systems in ecological, economic, and social terms; future issues and potentials of organic food systems.
**Credit Hours:** 3
**Max credits per semester:** 3
**Max credits per degree:** 3
**Grading Option:** Graded with Option

PLAS 440 Great Plains Ecosystem
Crosslisted with: AGRO 840, NRES 840, RNGE 440, NRES 440, GRAS 440
**Prerequisites:** Junior standing.
**Description:** Characteristics of Great Plains ecosystems, interrelationships of ecological factors and processes, and their application in the management of grasslands. Interactions of fire, vegetation, grazing animals and wildlife.
**Credit Hours:** 3
**Max credits per semester:** 3
**Max credits per degree:** 3
**Grading Option:** Graded with Option
**Offered:** SPRING

PLAS 441 Perennial Plant Function, Growth, and Development
Crosslisted with: AGRO 841, HORT 841, RNGE 441, GRAS 441
**Prerequisites:** PLAS 325 or equivalent.
**Description:** Principles of crop physiology and developmental morphology in relation to function, growth, development, and survival of perennial forage, range, and turf plants. The relationship of physiology and morphological development on plant use and management.
**Credit Hours:** 3
**Max credits per semester:** 3
**Max credits per degree:** 3
**Grading Option:** Graded with Option
**Offered:** SPRING

PLAS 442 Wildland Plants
Crosslisted with: AGRO 842, NRES 842, RNGE 442, NRES 442, GRAS 442
**Prerequisites:** PLAS 131 or LIFE 121 and 121L or equivalent recommended
**Notes:** PLAS 131 or LIFE 121 and 121L or equivalent recommended
**Description:** Wildland plants that are important to grassland and shrubland ecosystem management and production. Distribution, utilization, classification, identification (including identification by vegetative parts), uses by Native Americans, and recognition of grasses, forbs, shrubs, exotic and wetland plants.
**Credit Hours:** 3
**Max credits per semester:** 3
**Max credits per degree:** 3
**Grading Option:** Graded with Option
**Offered:** FALL

PLAS 444 Ecosystem Monitoring and Assessment
Crosslisted with: AGRO 844, NRES 844, RNGE 444, NRES 444, GRAS 444
**Prerequisites:** Junior standing.
**Notes:** NRES 220 or equivalent, recommended.
**Description:** Measurement and monitoring of the important vegetation and environmental factors used to develop management guidelines in grasslands, savannas, woodlands, and wetlands. Emphasis on using ecosystem monitoring protocols for assessment of wildlife habitat, fuels management for wild-land fire, livestock production, and watershed function. Requires field sampling and travel to local field sites.
**Credit Hours:** 3
**Max credits per semester:** 3
**Max credits per degree:** 3
**Grading Option:** Graded with Option
**Offered:** FALL

PLAS 445 Livestock Management on Range and Pasture
Crosslisted with: AGRO 845, ASCI 451, ASCI 851, RNGE 445, GRAS 445
**Prerequisites:** ASCI 250 and PLAS 240 or PLAS 340, AECN 201 recommended.
**Notes:** AECN 201 recommended. Capstone course. All students required to participate in a one-week field trip in central or western Nebraska prior to beginning of fall semester. Therefore, students must notify instructor at time of early registration (Dates are given in class schedule.)
**Description:** Analyzing the plant and animal resources and economic aspects of pasture. Management of pasture and range for continued high production emphasized.
**Credit Hours:** 3
**Max credits per semester:** 3
**Max credits per degree:** 3
**Grading Option:** Graded with Option
**Offered:** FALL

ACE: ACE 10 Integrated Product

Course and Laboratory Fee: $200

PLAS 450 Climate and Society
Crosslisted with: GEOG 450, METR 450, NRES 452, AGRO 850, GEOG 850, METR 850, NRES 852
**Prerequisites:** Junior standing or above.
**Notes:** Offered spring semester of even-numbered calendar years.
**Description:** Impact of climate and extreme climatic events on society and societal responses to those events. Global in scope and interdisciplinary.
**Credit Hours:** 3
**Max credits per semester:** 3
**Max credits per degree:** 3
**Grading Option:** Graded with Option
**Offered:** SPRING
PLAS 452 Irrigation Systems Management  
**Crosslisted with:** MSYM 452, MSYM 852, WATS 452  
**Prerequisites:** MSYM 109 or PHYS 141 or PHYS 151 or PHYS 211  
**Notes:** PLAS/SOIL 153 recommended.  
**Description:** Irrigation management and the selection, evaluation, and improvement of irrigation systems. Includes soil-water measurement, crop water use, irrigation scheduling, irrigation efficiency, measurement of water flow, irrigation systems, groundwater and wells, pumping systems, applying chemicals with irrigation systems, and environmental and water resource considerations.  
**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Grading Option:** Graded with Option  
**Offered:** FALL  
**Prerequisite for:** NRES 457, NRES 857  
**Crosslisted with:** MSYM 452, MSYM 852, WATS 452  

PLAS 453 Urban Soil Properties and Management  
**Crosslisted with:** LARC 453, SOIL 453  
**Prerequisites:** PLAS/SOIL 153  
**Description:** Characteristics of soils in urban settings. Evaluation of soils intended for intensive human uses and strategies for their use. Identification of specific issues related to urban soils. Manipulation or remediation of soils subject to construction and other stresses.  
**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Grading Option:** Graded with Option  
**Offered:** SPRING  

PLAS 455 Soil Chemistry and Mineralogy  
**Crosslisted with:** AGRO 855, NRES 455, NRES 855, SOIL 455  
**Prerequisites:** PLAS/SOIL 153 or GEO 101; CHEM 109A/L and 110A/L; CHEM 221 or CHEM 221A & CHEM 221L or 251.  
**Description:** Chemical and mineralogical properties of soil components. Inorganic colloidal fraction. Structures of soil minerals as a means of understanding properties, such as ion exchange and equilibria; release and supply of nutrient and toxic materials; and soil acidity and alkalinity. Forms and functions of organic matter in soil.  
**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Grading Option:** Graded with Option  
**Offered:** SPRING  

PLAS 457 Green Space and Urban Forestry Management  
**Crosslisted with:** NRES 457, NRES 857  
**Prerequisites:** Junior or senior standing. Graduate student or permission  
**Description:** A focus on the management of trees, parks, and green infrastructure in rural and urban communities. Perspectives from community planning, landscape architecture, urban forestry, natural resources, horticulture, and environmental policy. Development and implementation of green space and forest management plans encompassing societal needs and biological limitations in rural and urban communities.  
**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Grading Option:** Graded with Option  
**Offered:** SPRING  
**ACE:** ACE 10 Integrated Product  

PLAS 458 Soil Physical Determinations  
**Crosslisted with:** AGRO 858, NRES 458, NRES 858, SOIL 458  
**Prerequisites:** SOIL/PLAS/GEOL/WATS 361; PHYS 141 or equivalent; MATH 102 or 103.  
**Description:** Survey of measurement techniques and principles used in characterizing the physical properties of soils. Includes analysis of experimental design and sources of experimental error. Techniques include: particle size analysis, soil water content, pore size analysis, field sampling techniques, soil strength, and saturated hydraulic conductivity.  
**Credit Hours:** 2  
**Max credits per semester:** 2  
**Max credits per degree:** 2  
**Grading Option:** Graded with Option  

PLAS 460 Soil Microbial Ecology  
**Crosslisted with:** AGRO 858, NRES 458, SOIL 460, AGRO 860, BIOS 860, NRES 860  
**Prerequisites:** Senior standing.  
**Notes:** Recommend having a strong science background, including courses from the agronomic, environmental, microbiology, engineering or medicine disciplines.  
**Description:** Soil from a microbe's perspective-growth, activity and survival strategies; principles governing methods to study microorganisms and biochemical processes in soil; mechanisms controlling organic matter cycling and stabilization with reference to C, N, S, and P; microbial interactions with plants and animals; and agronomic and environmental applications of soil microorganisms.  
**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Grading Option:** Graded with Option  
**Crosslisted with:** NRES 457, NRES 458, SOIL 458, NRES 857  
**Offered:** SPRING  

PLAS 461 Soil Physics  
**Crosslisted with:** AGRO 861, NRES 461, SOIL 461, WATS 461, AGRO 861, GEO 861, NRES 861  
**Prerequisites:** PLAS/SOIL 153; PHYS 141 or equivalent, one semester of calculus.  
**Description:** Principles of soil physics. Movement of water, air, heat, and solutes in soils. Water retention and movement, including infiltration and field water regime. Movement of chemicals in soils.  
**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Grading Option:** Graded with Option  
**Prerequisite for:** AGRO 955, AGRO 956, CIVE 955, GEO 985  
**Crosslisted with:** GEOL 461, NRES 461, SOIL 461, WATS 461, AGRO 861, GEO 861, NRES 861  

PLAS 462 Cannabis Growth, Production and Breeding Basics  
**Crosslisted with:** AGRO 862, HORT 862  
**Prerequisites:** PLAS 131 or LIFE 121; PLAS 215 or BIOS 206  
**Notes:** PLAS 221 recommended  
**Description:** History, breeding and production of cannabis for medicinal marijuana and hemp for fiber use when grown using a growth room, greenhouse, high tunnel and/or field. Clarification between scientific evidence and casual information.  
**Credit Hours:** 2  
**Max credits per semester:** 2  
**Max credits per degree:** 2  
**Grading Option:** Graded  
**Offered:** FALL/SPRING  
**ACE:** ACE 10 Integrated Product
PLAS 467 Planting Design
Crosslisted with: ARCH 467, ARCH 567, ARCH 867, LARC 467
Description: Processes, principles, and elements using plant materials as a key component of landscapes designed for human intent. Focus is on a systems approach, combining environmental attributes with functional needs to create aesthetic, functional, and sustainable landscapes for parks, commercial property, and residences using a combination of site visits and online resources.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Grading Option: Graded with Option
Offered: FALL
Course and Laboratory Fee: $25

PLAS 469 Ecological Landscape Design
Crosslisted with: ARCH 469
Prerequisites: Permission
Description: Integration of ecological and environmental assessment, design process and management considerations to create detailed landscape plans for public, private, and commercial clients. Includes dream landscape project. Individuals and collaborative teams will develop concepts and details, conduct client meetings and studio critiques, and communicate graphically and verbally through presentations.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Grading Option: Graded with Option
Offered: SPRING
ACE: ACE 10 Integrated Product
Course and Laboratory Fee: $25

PLAS 470 Critical Thinking in Landscape Management
Prerequisites: PLAS 228
Description: Use processes and strategies to develop complete landscape management plans for public and/or private clients. Use data to evaluate and compare issues; make practical, science-based recommendations; and prepare cost estimates. Develop and present a complete landscape management plan for a public client.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option
Offered: SPRING
ACE: ACE 10 Integrated Product
Course and Laboratory Fee: $25

PLAS 471 Vines, Wines and You
Crosslisted with: HORT 871, NUTR 471, NUTR 871, HRTM 471, HRTM 871
Prerequisites: 6 hrs science or equivalent experience; 21 years of age or older
Notes: Proof of age is required.
Description: Origin, botany, historical and cultural significance of the grapevine and related species. Principles and practices of vineyard establishment, management and processing of grape products, importance and/or scope of grape and wine industry; global and local significance. Culinary applications, health, environmental and safety-related issues, business and industry relations and experience.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option
Course and Laboratory Fee: $95

PLAS 472 Applied Soil Physics
Crosslisted with: AGRO 872, NRES 472, NRES 872, SOIL 472, WATS 472
Prerequisites: PLAS/SOIL 153; MATH 102 or MATH 104 or MATH 106.
Description: Emphasis on applied soil physics. Discussion of theoretical principles followed by field and laboratory exercises and applications. Fluxes of water, solutes, air, and heat through the soil. Emphasis on water infiltration, water retention, other soil hydraulic properties. Components of soil water balance. Management of soil water.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option
Offered: FALL

PLAS 475 Water Quality Strategy
Crosslisted with: NRES 475, NRES 875, SOCI 475, SOCI 875, SOIL 475, WATS 475, AGRO 875, CIVE 475, CIVE 875, CRPL 475, CRPL 875, GEOL 475, GEOL 875, MSYM 475, MSYM 875, POLS 475, POLS 875
Prerequisites: PLAS/SOIL 153.
Description: Holistic approach to the selection and analysis of planning strategies for protecting water quality from nonpoint sources of contamination. Introduction to the use of methods of analyzing the impact of strategies on whole systems and subsystems; for selecting strategies; and for evaluating present strategies.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option
ACE: ACE 10 Integrated Product

PLAS 477 Great Plains Field Pedology
Crosslisted with: GEOG 467, NRES 477, SOIL 477, GEOG 867, NRES 877
Prerequisites: PLAS/SOIL 153.
Description: Spatial relationship of soil properties on various parts of landscape typical of the Plains, causal factors, and predictions of such relationships on other landscapes. Grouping these properties into classes, naming the classes, and the taxonomy that results from this grouping. Application of a taxonomy to a real situation through making a field soil survey in a region representative of the Plains border, predicting land use response of various mapped units as it affects the ecosystem, and evaluating the effectiveness of the taxonomic system used in the region surveyed.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Grading Option: Graded with Option

PLAS 478 Plant Anatomy
Crosslisted with: BIOS 478, BIOS 878, AGRO 878, HORT 878
Prerequisites: 8 hrs biological sciences
Notes: BIOS 109 recommended.
Description: Development, structure, and function of tissues and organs of the higher plants. Relationships of structure to physiology and ecology of plants.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Grading Option: Graded with Option
Prerequisite for: BIOS 879
PLAS 480 Modified Root Zones
Crosslisted with: TLMT 880, AGRO 880, HORT 880
Prerequisites: PLAS 153/SOIL 153
Notes: Recommend CHEM 105A/CHEM 105L or CHEM 109A/CHEM 109L, PLAS 131, PLAS 227, and PLAS 453 or PLAS 472
Description: Modified root zones and their applications in the turfgrass and landscape management industry. Correct applications and construction techniques.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Grading Option: Graded with Option
Offered: SPRING

PLAS 484 Water Resources Seminar
Crosslisted with: GEOG 484, GEOL 484, NRES 484, WATS 484, NRES 884, AGRO 884, GEOG 884, GEOL 884, WATS 884
Prerequisites: Junior or above standing
Description: Seminar on current water resources research and issues in Nebraska and the region.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Grading Option: Graded with Option

PLAS 488 Entrepreneurship and Enterprise Development
Crosslisted with: HORT 888, EAEP 488, ENTR 888, AGRO 888, ENTR 888, ABUS 488
Prerequisites: Junior standing
Description: The process of starting your own enterprise. Competitive environment, risk management, finance for business startups, funding, and business plan writing.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option
Offered: FALL/SPR
ACE: ACE 10 Integrated Product

PLAS 489 Urbanization of Rural Landscapes
Crosslisted with: AGRO 889, CRPL 489, HORT 889, CRPL 889
Prerequisites: Senior standing or graduate standing.
Description: Development converts rural landscapes into housing, roads, malls, parks, and commercial uses. This process fragments landscapes and changes ecosystem functions, drives up land prices, and pushes agriculture into more marginal areas. This multi-disciplinary, experiential course guides students in learning about the urbanization process, the impacts on landscapes, people, and the community, and the choices that are available to informed citizens.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option

PLAS 495 Grasslands Seminar
Crosslisted with: ENTO 495, GRAS 495, NRES 495, RNGE 495, SOIL 495
Prerequisites: Junior standing.
Description: Topic varies and deals with different aspects of forage and/or range and/or livestock, turf and/or landscape grasses, natural habitats, and wetlands.
Credit Hours: 1-2
Min credits per semester: 1
Max credits per semester: 2
Max credits per degree: 4
Grading Option: Graded with Option

PLAS 496 Independent Study
Crosslisted with: AGRO 896, RNGE 496, SOIL 496
Credit Hours: 1-6
Min credits per semester: 1
Max credits per semester: 6
Max credits per degree: 12
Grading Option: Graded with Option
Course and Laboratory Fee: $50

PLAS 498 Senior Project
Crosslisted with: SOIL 498
Prerequisites: Senior standing.
Notes: A two-semester sequence. Students should select one credit hour the first semester and three credits the second semester. The first semester will be used for planning, topic selection, and identifying a project adviser. The second semester will be used to carry out the research project, prepare a written report, and possibly an oral presentation.
Description: Carry out and report on a research project.
Credit Hours: 1-3
Min credits per semester: 1
Max credits per semester: 3
Max credits per degree: 3
Grading Option: Graded with Option

PLAS 499H Honors Thesis
Crosslisted with: RNGE 499H, SOIL 499H
Prerequisites: Aggie 299H recommended.
Description: Conduct a scholarly research project and write a University Honors Program or undergraduate thesis.
Credit Hours: 3-6
Min credits per semester: 3
Max credits per semester: 6
Max credits per degree: 6
Grading Option: Graded
