BIOLOGICAL SCIENCES

Description
The School of Biological Sciences offers educational opportunities in various areas of biology leading toward either the bachelor of science or the bachelor of arts degree. Study in the biological sciences prepares students for a variety of careers requiring knowledge of biological processes, such as teaching; environmental resource management and assessment; production and sales of biological materials; research in governmental, industrial, and academic laboratories; as well as preparation for careers in medicine, dentistry, and health-related professions.

Program Assessment. To assist the department in evaluating the effectiveness of its program, after significantly completing the coursework, all majors will be required in their senior year to register for BIOS 99 Assessment of the Major and complete selected assessment activities. Results of participation in these assessment activities will in no way affect a student’s GPA or graduation.

Cedar Point Biological Station. Biological sciences majors are strongly urged to attend the Cedar Point Biological Station for at least one summer session. Majors are also encouraged to do a research project with a faculty member.

College Requirements
College Admission
College Admission
The entrance requirements for the College of Arts and Sciences are the same as the UNL General Admission Requirements. Students who are admitted through the Admission by Review process may have certain conditions attached to their enrollment at UNL. These conditions are explained under “Removal of Deficiencies.”

In addition to these requirements, the College of Arts and Sciences strongly recommends a third and fourth year of one foreign language. Four years of high school coursework in the same language will fulfill the College of Arts and Sciences’ language requirement. It will also allow students to continue language study at a more advanced level at UNL, and provide more opportunity to study abroad.

Transfer Students
To be considered for admission as a transfer student, Nebraska resident or nonresident, students must have an accumulated average of C (2.0 on a 4.0 scale) and a minimum C average in the last semester of attendance at another college. Transfer students who graduated from high school January 1997 and after must also meet the UNL General Admission Requirements. Those transfer students who graduated before January 1997 must have completed in high school 3 years of English, 2 years of the same foreign language, 2 years of algebra, and 1 year of geometry. Transfer students who have completed less than 12 credit hours of college study must also submit either their ACT or SAT scores.

Ordinarily, hours earned at a similarly accredited college or university are applicable to the UNL degree. The College, however, will evaluate all hours submitted on an application for transfer, and reserves the right to accept or reject any of them, based upon its exclusion and restriction policies. Sixty is the maximum number of hours the University will accept on transfer from a two-year college or international institution. Transfer credit in the major or minor must be approved by the departmental advisor on a Request for Substitution Form to meet specific course requirements, group requirements, or course level requirements in the major or minor. At least half of the hours in the major field must be completed at the University regardless of the number of hours transferred.

The College of Arts and Sciences will accept no more than 15 semester hours of C- and D grades from other schools. The C- and D grades cannot be applied toward requirements for a major or minor. This policy does not apply to the transfer of grades from UNO or UNK to UNL. All D grades may be transferred from UNO or UNK, but they are not applicable to a major or minor.

Readmitted Students
UNL students who choose not to take courses for more than 2 consecutive terms, must reapply to UNL. Students readmitted to the College of Arts and Sciences will follow the requirements stated in the catalog for the academic year of readmission and re-enrollment as a degree-seeking student in Arts and Sciences. In consultation with advisors, a student may choose to follow a catalog for any academic year in which they are admitted to and enrolled as a degree-seeking student at UNL in the College of Arts and Sciences. Students must complete all degree requirements from a single catalog year. Beginning in 1990-1991, the catalog which a student follows for degree requirements may not be more than 10 years old at the time of graduation.

Admission Deficiencies/Removal of Deficiencies
Students must remove entrance deficiencies in geometry and foreign language as soon as possible, and before graduating from the College of Arts and Sciences. For questions and more information, students should consult a college advisor in the Academic and Career Advising Center in 107 Oldfather Hall.

Removing Foreign Language Deficiencies
Students must complete the second semester of a first year language sequence to clear the deficiency and the second semester of the second year language sequence to complete the college graduation requirement in language.

Removing Geometry Deficiencies
A deficiency of one year of geometry can be removed by taking high school geometry courses through an approved independent study program, or by completing a geometry course from an accredited community college or a four-year institution. Neither of these options will count for college credit.

College Degree Requirements
College Distribution Requirements
Bachelor of Arts or Bachelor of Science (16 hours + Language)
The College of Arts and Sciences distribution requirements are designed to further the purposes of liberal education by encouraging study in several different areas within the College. All requirements are in addition to University ACE requirements. A student may not use a single course to satisfy more than one of the following five distribution requirements. A student cannot use a single course to satisfy both an ACE outcome and a College distribution requirement. A student cannot use a course from their primary major to satisfy the Breadth Requirement (F), but may apply an ancillary requirement of the primary major or a course from their second major toward this requirement. Independent study or reading courses and internships cannot be used to satisfy distribution requirements. To see a complete list of excluded courses, run a degree audit through MyRED.
Courses from interdisciplinary programs will count in the same area as courses from the home/cross-listed department(s).

</table>

Credit Hours Subtotal: 16-32

1. See degree audit or a College of Arts and Sciences advisor for approved geography and anthropology courses that apply as natural science.
2. Language courses numbered 210 or below apply only for the foreign language requirement.
3. See degree audit or College of Arts and Sciences advisor for list of natural/physical science courses in anthropology, geography, and psychology that do not apply as social science.

**Scientific Base**

**Bachelor of Science Only (60 hours)**
The bachelor of science degree requires students to complete 60 hours in mathematical, physical and natural sciences. Approved courses for scientific base credit come from the following College of Arts and Sciences disciplines: actuarial science, anthropology (selected courses), astronomy, biochemistry (excluding BIOC 101), biological sciences (excluding BIOS 203), chemistry (excluding CHEM 101), computer science (excluding CSCE 10), geography (selected courses), geology, life sciences, mathematics (excluding courses below MATH 104), meteorology, microbiology, physics and statistics.

See your degree audit or a College of Arts and Sciences advisor for a complete list including individual classes that fall outside of the disciplines listed above. Up to 12 hours of scientific and technical courses offered by other colleges may be accepted toward this requirement with approval of a college advisor.

**Foreign Languages/Language Requirement**

**Languages Exemption Policy**
UNL and the College of Arts and Sciences will exempt or waive students from the UNL entrance requirement of two years of the same foreign language or from the College’s language distribution requirement based on documentation only. The following are the options and procedures for documentation:

**High School Transcripts**
For the University entrance requirement, students must show an official high school transcript with two or more years of the same foreign language.

For the College of Arts and Sciences College Distribution Requirement E-Language, students must show an official high school transcript with four or more years of the same foreign language in high school, or show evidence of graduation from a non-English-speaking foreign high school. Students whose native language is not English must show English as a Second Language study on an official high school transcript. Four years of ESL at the high school level (9th, 10th, 11th and 12th grades) will be the basis for a waiver of the CDR E Language requirement.

**Proficiency Examination at UNL**
For the University entrance requirement, students who do not have transcript documentation can request to take a proficiency exam in the language. (This is not the same test as the Modern Languages Placement Exam.) However, UNL will provide testing only in the languages it teaches. Currently, these languages are: Arabic, French, German, Russian, Czech, Japanese, Chinese.

For the College of Arts and Sciences College Distribution Requirement E-Language, the Department of Modern Languages will oversee the test at the 202 level. If the student passes the test, the department will sign the College Request for Waiver form and indicate the level of proficiency. The form is then forwarded to the Arts and Sciences Advising Center for approval.

The Department of Modern Languages will oversee the test and provide written documentation to the Arts and Sciences Advising Center the level of proficiency passed.

**Distance Education**
For the University entrance requirement, students without transcript documentation who claim proficiency in a language not taught at UNL, have the option of seeking out a distance education program in languages. If the student completes the equivalent of 102 from an approved distance education program, the student will meet the UNL entrance requirement. The student must have the course work approved before he/she takes/completes the course as equivalent to 102 by a College advisor. The student then completes the course and has the distance education program send the transcript to the Admissions Office.

For the College of Arts and Sciences College Distribution Requirement E-Language, the student can seek out a distance education program and complete the equivalent of the 202-level course. The student must submit the request on the College Request for Substitution form and have the
course work approved by a College advisor. The student then completes
the course and has the distance education program send the transcript to
the Admissions Office.

Third Language Option
If a student demonstrates knowledge of two foreign languages at
the 102 level, the College of Arts and Sciences may consider waiving
two semesters of the four semester College Distribution Requirement
E-Languages requirement. If this waiver were granted, the student
would then be required to complete 101 and 102 in another, 3rd foreign
language at UNL.

Minimum Hours Required for Graduation
A minimum of 120 semester hours of credit is required for graduation
from the College of Arts and Sciences. A total grade point average of at
least 2.0 is required.

Grade Rules
Restrictions on C- and D Grades
The College will accept no more than 15 semester hours of C- and D
grades from other schools except for UNO and UNK. No transfer C- and
D grades can be applied toward requirements in a major or a
minor.

Pass/No Pass Privilege
University regulations for the Pass/No Pass (P/N) privilege state:

• The Pass/No Pass option is designed for your use by seeking to
  expand your intellectual horizons by taking courses in areas where
  you may have had minimal preparation.
• Neither the P nor the N grade contribute to your GPA.
• P is interpreted to mean C or above.
• A change to or from a Pass/No Pass may be made until mid-term (see
  academic calendar for specific dates per term).
• The Pass/No Pass or grade registration cannot conflict with the
  policy of the professor, department, college, or University governing
  the grading option.
• Changing to or from Pass/No Pass requires using the MyRED system
to change the grading option or filing a Drop/Add form with the Office
of the University Registrar, 107 Canfield Administration Building. After
mid-term of the course, a student registered for Pass/No Pass cannot
change to a grade registration unless the Pass/No Pass registration
is in conflict with the policy of the professor, department, college, or
University governing Pass/No Pass.
• The Pass/No Pass grading option cannot be used for the removal of
C- or D or F grades.

Pass/No Pass privileges in the College of Arts and Sciences are extended
to students according to the following additional regulations:

• Pass/No Pass hours can count toward fulfillment of University ACE
  requirements and college distribution requirements up to the 24-hour
  maximum.
• Most Arts and Sciences departments and programs do not allow
courses graded Pass/No Pass to apply to the major or minor.
  Students should refer to the department’s or program’s section of the
  catalog for clarification. By college rule, departments can allow up to
  6 hours of Pass/No Pass in the major or minor.
• Departments may specify that certain courses of theirs can be taken
  only on a P/N basis.

The college will permit no more than a total of 24 semester hours
of P/N grades to be applied toward degree requirements. This total
includes all Pass grades earned at UNL and other U.S. schools. NOTE:
This 24-hour limit is more restrictive than the University regulation.

Grading Appeals
A student who feels that he/she has been unfairly graded must ordinarily
take the following sequential steps in a timely manner, usually by
initiating the appeal in the semester following the awarding of the grade:

1. Talk with the instructor concerned. Most problems are resolved at
   this point.
2. Talk to the instructor’s department chairperson.
3. Take the case to the Grading Appeal Committee of the department
   concerned. The Committee should be contacted through the
   department chairperson.
4. Take the case to the College Grading Appeals Committee by
   contacting the Dean’s Office, 1223 Oldfather Hall.

Course Level Requirements
Courses Numbered above 299
Thirty of the 120 semester hours of credit must be in courses numbered
above 299. Of the 30 hours above 299, 15 hours (1/2) must be completed
in residence at UNL.

Graduate Courses
Seniors in the University who have obtained in advance the approval
of the dean for Graduate Studies may receive up to 12 hours credit for
graduate courses taken in addition to the courses necessary to complete
their undergraduate work, provided that such credits are earned within
the calendar year prior to receipt of the baccalaureate. For procedures,
inquire at the Office of Graduate Studies.

Course work taken prior to receipt of the baccalaureate may not always
be accepted for transfer to other institutions as graduate work.

Residency
Residency Requirement and Open Enrollment and Summer
Independent Study Courses
Students must complete at least 30 of the 120 total hours for their
degree at UNL. Students must complete at least 1/2 of their major
course work including 6 hours above 299 in their major, and 15 of the 30
hours required above 299 in residence. Credit earned during education
abroad may be used toward the residency requirement if students
register through UNL and participate in prior-approved education abroad
programs. UNL open enrollment and summer independent study courses
count toward residence.

ACE Requirements
Consistent with the mission and values of the University, ACE is based
on a shared set of four institutional objectives and ten student learning
outcomes. The ACE program was approved by faculty in all eight
undergraduate colleges and endorsed by the Faculty Senate, the student
government, and the Academic Planning Committee in January 2008
for implementation in the fall 2009. ACE aligns with current national
initiatives in general education.

Key characteristics of ACE demonstrate the benefits of the program to
students:
• Students receive a broad education with exposure to multiple disciplines, critical life skills and important reasoning, inquiry, and civic capacities.

• ACE is simple and transparent for students, faculty and advisors. Students complete the equivalent of 3 credit hours for each of the ten student learning outcomes.

• Students connect and integrate their ACE experiences with their selected major.

• Students can transfer all ACE certified courses across colleges within the institution to meet the ACE requirement and any course from outside the institution that is directly equivalent to a UNL ACE-certified course. Courses from outside institutions without direct equivalents may be considered with appropriate documentation for ACE credit (see academic advisor).

ACE allows faculty to assess and improve their effectiveness and facilitate students’ learning.

ACE Institutional Objectives and Student Learning Outcomes
To meet the ACE Program requirement, a student will complete a minimum of 3 credit hours for each of the ten ACE Student Learning Outcomes (a total of 30 ACE credit hours). See the ACE website at: http://ace.unl.edu for the most current information and the most recently certified courses.

Catalog Rule
Students must fulfill the requirements stated in the catalog for the academic year in which they are first admitted to and enrolled as a degree-seeking student at UNL. In consultation with advisors, a student may choose to follow a subsequent catalog for any academic year in which they are admitted to and enrolled as a degree-seeking student at UNL in the College of Arts and Sciences. Students must complete all degree requirements from a single catalog year. Beginning in 1990-1991 the catalog which a student follows for degree requirements may not be more than 10 years old at the time of graduation.

Learning Outcomes
Majors in biological sciences will be able to:

1. Demonstrate mastery of the concepts, principles and knowledge for following subdisciplines: cell biology, organismal biology, genetics, ecology and evolution.

2. Use scientific methods and knowledge of the natural and physical world to address biological problems through inquiry, experimentation, interpretation, analysis, and the making of inferences from data, to determine whether conclusions or solutions are reasonable.

3. Acquire a more in depth knowledge of in a subdiscipline area by generating a scholarly product that requires broad knowledge, appropriate technical proficiency, information collection, synthesis, interpretation, presentation, and reflection, and is representative of a typical scholarly product for the subdiscipline.

Total Credit Hours 18

Grade Rules

C- and D Grades
A grade of C or above is required for all courses in the 18 hours for the minor (and 36 hours for the major).

Pass/No Pass
Except for BIOS 310 School of Biological Sciences Seminar, no course taken Pass/No Pass can be counted toward the 18 hours for the minor (and 36 hours for the major).

BIOS 101 General Biology
Prerequisites: Must Enroll in both BIOS 101 (lecture) and BIOS 101L (lab)
Notes: This course does not count towards the biology major. High school chemistry or equivalent strongly recommended. Not intended for most Life Sciences majors; such students should take LIFE 120-LIFE 120L and LIFE 121-LIFE 121L instead.
Description: Analysis of the structure, functions, and interactions of organisms from the molecular to the ecosystem levels. BIOS 101 provides the foundation for tomorrow's citizens to critically think about and evaluate issues in biology.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
Prerequisite for: ASCI 240; BIOC 321; BIOS 213; BIOS 213L; ENTO 308; FDST 401, FDST 801; PSYC 370
ACE: ACE 4 Science

BIOS 101L General Biology Laboratory
Prerequisites: Must enroll in both BIOS 101 (lecture) and BIOS 101L (lab)
Description: Laboratory exercises and experiments that complement material covered in BIOS 101.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Format: LAB
Prerequisite for: BIOC 321; BIOS 213; BIOS 213L; ENTO 308; PSYC 370

BIOS 109 General Botany
Prerequisites: BIOS 101 and 101L or equivalent.
Description: Introduction to the plant kingdom and to plants as biological organisms; structure and function of cells, tissues, and organs with emphasis on seed plants; the important processes and concepts of classification, inheritance, evolution, and ecology.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC
Prerequisite for: AGRO 227, HORT 227, PGAM 227, TLMT 227; AGRO 228, HORT 228, TLMT 228; AGRO 240, RNGE 240

BIOS 110 Human Biology
Prerequisites: Parallel registration in BIOS 110L.
Notes: High school chemistry or equivalent strongly recommended. Credit toward the degree cannot be earned in both BIOS 101 and BIOS 110. BIOS 110 does not count in the Biological Sciences major.
Description: Introduction to biology with a focus on organization of molecules and cells to the level of human body systems; basic structure (anatomy) and function (physiology) of human tissues, organs and organ systems; reproduction, genetics; DNA technology and genetic engineering.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
Offered: FALL/SPR
Prerequisite for: BIOS 110L

BIOS 110L Human Biology Laboratory
Prerequisites: Parallel registration in BIOS 110.
Notes: High school chemistry or equivalent strongly recommended. Credit toward the degree cannot be earned in both BIOS 101L and BIOS 110L. BIOS 110L does not count in the Biological Sciences major.
Description: Hands-on lab exercises to understand biological concepts of human organization from molecules to cells to the body systems, basic structure and function of human tissues, organs, organ systems, reproduction, genetics, as well as DNA technology and genetic engineering.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Format: LAB
Offered: FALL/SPR
Prerequisite for: BIOS 110

BIOS 110 General Biology Laboratory
Prerequisites: Must Enroll in both BIOS 101 (lecture) and BIOS 101L (lab)
Description: Laboratory exercises and experiments that complement material covered in BIOS 101.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Format: LAB
Prerequisite for: BIOC 321; BIOS 213; BIOS 213L; ENTO 308; PSYC 370

BIOS 109 General Botany
Prerequisites: BIOS 101 and 101L or equivalent.
Description: Introduction to the plant kingdom and to plants as biological organisms; structure and function of cells, tissues, and organs with emphasis on seed plants; the important processes and concepts of classification, inheritance, evolution, and ecology.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC
Prerequisite for: AGRO 227, HORT 227, PGAM 227, TLMT 227; AGRO 228, HORT 228, TLMT 228; AGRO 240, RNGE 240

BIOS 110 Human Biology
Prerequisites: Parallel registration in BIOS 110L.
Notes: High school chemistry or equivalent strongly recommended. Credit toward the degree cannot be earned in both BIOS 101 and BIOS 110. BIOS 110 does not count in the Biological Sciences major.
Description: Introduction to biology with a focus on organization of molecules and cells to the level of human body systems; basic structure (anatomy) and function (physiology) of human tissues, organs and organ systems; reproduction, genetics; DNA technology and genetic engineering.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
Offered: FALL/SPR
Prerequisite for: BIOS 110L

BIOS 110L Human Biology Laboratory
Prerequisites: Parallel registration in BIOS 110.
Notes: High school chemistry or equivalent strongly recommended. Credit toward the degree cannot be earned in both BIOS 101L and BIOS 110L. BIOS 110L does not count in the Biological Sciences major.
Description: Hands-on lab exercises to understand biological concepts of human organization from molecules to cells to the body systems, basic structure and function of human tissues, organs, organ systems, reproduction, genetics, as well as DNA technology and genetic engineering.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Format: LAB
Offered: FALL/SPR
Prerequisite for: BIOS 110
BIOS 111 The Biology of Microorganisms
Prerequisites: BIOS 101 and 101L, or equivalent.
Description: Comparative study of microorganisms, principles and applications.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC

BIOS 112 Introduction to Zoology
Prerequisites: BIOS 101 and 101L, or equivalent.
Notes: Parallel registration in BIOS 112L required.
Description: Survey of the animal kingdom with emphasis on the evolution, ecology, and behavior of major animal groups.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 112L Introduction to Zoology Lab
Prerequisites: BIOS 101 and 101L, or equivalent.
Notes: Parallel registration in BIOS 112 required.
Description: Laboratory exercises and experiments that complement material covered in BIOS 112.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Format: LAB

BIOS 115 Insect Biology
Crosslisted with: ENTO 115
Description: Fundamental insect biology (anatomy, development, physiology, behavior, ecology and diversity). Economic and medical importance of insects and principles of insect pest management.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
Prerequisite for: ENTO 200; ENTO 400; FORS 411
ACE: ACE 4 Science

BIOS 116 Insect Identification
Crosslisted with: ENTO 116
Description: Identification of representative orders and families of insects by their anatomy, metamorphosis, habits and habitats. Sight recognition emphasized but dichotomous keys also used. Interrelation of insect and habitats stressed.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Format: LAB
Prerequisite for: FORS 411

BIOS 117 Life in the Universe
Crosslisted with: ASTR 117, GEOL 117
Description: Survey of what modern science tells us about the possibilities of life elsewhere in the universe. Topics include how the Earth formed and became suitable for life, how life arose on the Earth, the conditions under which life can thrive, places in the solar system that might support life, the existence of other solar systems that might provide suitable habitats, and attempts to find evidence of life on other planets.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
ACE: ACE 4 Science

BIOS 136 Discovery Research: Virus Hunting
Prerequisites: By permission
Description: Perform original research by using the scientific method to isolate a virus that infects a harmless bacterium (bacteriophage) from local soil samples. Lab skills acquired include pipetting, aseptic technique, and serial dilutions; use basic DNA and electron microscopy analyses to characterize the phage.
Credit Hours: 2
Max credits per semester: 2
Max credits per degree: 2
Format: LAB
Offered: FALL
Prerequisite for: BIOS 137

BIOS 137 Discovery Research: Virus Genome Analyses
Prerequisites: BIOS 136 and by permission.
Description: Build on an original project involving isolation of a virus that infects a harmless bacterium (bacteriophage) using bioinformatic tools to analyze and annotate the sequenced bacteriophage genome.
Credit Hours: 2
Max credits per semester: 2
Max credits per degree: 2
Format: LAB
Offered: SPRING

BIOS 160 Introduction to Clinical Laboratory Science
Description: Introduces the pre-clinical laboratory scientist/medical technologist to the profession of clinical laboratory science. Includes lessons in ethics, organization of the medical team, professionalism, automation, medical terminology, hematology, blood bank, clinical chemistry, and medical microbiology. For students interested in a career in clinical laboratory science/medical technology. BIOS 160 will not count toward a major in biological sciences.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Format: LEC

BIOS 189H University Honors Seminar
Prerequisites: Good standing in the University Honors Program or by invitation.
Notes: University Honors Seminar 189H is required of all students in the University Honors Program.
Description: Topic varies.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
ACE: ACE 4 Science
BIOS 191 Biological Sciences Learning Community Freshman Seminar
Prerequisites: Open to Biological Sciences Learning Community students only
Description: An exploration of biological sciences for undergraduates in the Biological Sciences Learning Community. Topics vary.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Format: LEC

BIOS 203 Bioethics
Prerequisites: Sophomore standing; BIOS 101 and 101L
Description: Relevance of biological science to society and its environment examined through readings, guest lecturers, and discussion.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 205 Genetics, Molecular and Cellular Biology Laboratory
Prerequisites: BIOS 206 or parallel
Description: Series of lab exercises to introduce principles of genetic, molecular and cellular biology. Experiments done using model systems to identify, map and clone genes; analyze gene products and expression; and fractionate cell components.
Credit Hours: 2
Max credits per semester: 2
Max credits per degree: 2
Format: LEC
Prerequisite for: BIOS 302; FORS 401

BIOS 206 General Genetics
Prerequisites: LIFE 120 & LIFE 120L and LIFE 121 & LIFE 121L
Description: Inheritance and regulation of genes in organisms and populations. Fundamentals of genomics and bioinformatics.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC
Prerequisite for: ASCI 330; BIOS 302; BIOS 303; BIOS 315; BIOS 326; BIOS 420, BIOS 820, VBMS 820, MBIO 420; BIOS 421, BIOS 821, MBIO 421; BIOS 443, BIOS 843, VBMS 843, MBIO 443; BIOS 802, BIOS 402; FORS 401

BIOS 207 Ecology and Evolution
Prerequisites: LIFE 120 & LIFE 120L and LIFE 121 & LIFE 121L
Description: Introduction to the principles and processes of ecology and evolution. Structure and dynamics of populations and communities; biotic and abiotic interactions; mechanisms of evolutionary change; natural selection; adaptation; and speciation.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC
Prerequisite for: BIOS 472

BIOS 213 Human Physiology
Prerequisites: BIOS 101 & BIOS 101L or LIFE 120 & LIFE 120L or equivalent; parallel BIOS 213L
Description: Elementary survey of the basic functional systems of the human body: the muscular, nervous, receptor; circulatory, respiratory, digestive, excretory, endocrine, and reproductive systems.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
Prerequisite for: ASCI 341; NUTR 355; VBMS 303; VBMS 403; VBMS 410

BIOS 213L Human Physiology
Prerequisites: BIOS 101 & BIOS 101L or LIFE 120 & LIFE 120L or equivalent; parallel BIOS 213
Description: Laboratory exercises and experiments that complement material covered in BIOS 213.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Format: LAB
Prerequisite for: VBMS 303; VBMS 403

BIOS 214 Human Anatomy
Prerequisites: Sophomore standing.
Notes: Cadaver prossections are studied in the lab. Letter Grade Only.
Description: Introduction to the major organ systems of the human body including skeletal, major muscle, nervous, digestive, circulatory, excretory, and reproductive systems. Anatomical structures as they pertain to clinical anatomy.
Credit Hours: 5
Max credits per semester: 5
Max credits per degree: 5
Format: LEC
Prerequisite for: NUTR 384

BIOS 216 Plant Breeding Principles and Practice
Crosslisted with: AGRO 216, HORT 216
Prerequisites: High school biology and chemistry. BIOS 101 and 101L, or 102 or equivalent recommended.
Description: Plant breeding theory and technique. Application of genetic principles to plant improvement. Experience with breeding agronomic and horticultural plant species to illustrate plant mating systems and breeding principles.
Credit Hours: 2
Max credits per semester: 2
Max credits per degree: 2
Format: LEC

BIOS 220 Principles of Ecology
Crosslisted with: NRES 220
Prerequisites: 4 hrs biological sciences, and MATH 101 or 103.
Notes: BIOS 220 is not open to students who have completed BIOS 207. BIOS 220 will not count toward a major in BIOS.
Description: Ecology as a quantitative discipline that integrates the life and earth sciences to understand the dynamics of natural and managed ecosystems.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
Prerequisite for: NRES 311; NRES 862, NRES 462

</table>
BIOS 312 Microbiology
Prerequisites: LIFE 120 and LIFE 121, one year general chemistry, and one semester organic chemistry or one semester biochemistry.
Notes: BIOS 206 recommended. Parallel registration in BIOS 313 or 314 recommended.
Description: Microbial cell structure, genetics, metabolic and biosynthetic activity, diversity, ecology and evolution including host-microbe interactions.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
Prerequisite for: BIOS 421, BIOS 821, Mbio 421; BIOS 440, BIOS 840, VBMS 840, Mbio 440; VBMS 403

BIOS 313 Molecular Microbiology Laboratory
Prerequisites: LIFE 120 and LIFE 121, one year general chemistry; one semester organic chemistry or one semester biochemistry
Notes: Credit towards the degree may not be earned in both BIOS 313 and 314. BIOS 206 recommended. Parallel registration in BIOS 312 recommended.
Description: Microbiology techniques which include recombinant DNA methods used in industry, medicine and research.
Credit Hours: 2
Max credits per semester: 2
Max credits per degree: 2
Format: LAB
Prerequisite for: BIOS 440, BIOS 840, VBMS 840, Mbio 440

BIOS 314 Microbiology Laboratory
Prerequisites: LIFE 120 and LIFE 121, one year general chemistry; one semester organic chemistry or one semester biochemistry
Notes: Credit towards the degree may not be earned in both BIOS 313 and 314. BIOS 206 recommended. Parallel registration in BIOS 312 recommended.
Description: Traditional microbiology techniques without recombinant DNA methods.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Format: LAB
Prerequisite for: BIOS 440, BIOS 840, VBMS 840, Mbio 440

BIOS 315 Vertebrate Embryology
Prerequisites: BIOS 206
Description: Gametogenesis, fertilization, cleavage, early development of a number of vertebrates, and the development of specific organ systems. Includes a three-hour lab in which the morphological aspects of development are illustrated on slides and in which some modern techniques used in experimental mammalian development are introduced.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC

BIOS 316 Case Studies in Theoretical Ecology
Crosslisted with: MATH 316, NRES 316
Prerequisites: Permission.
Notes: Case studies are structured around preparation for subsequent independent research (BIOS 498 or MATH 496).
Description: Introduction to biological literature, applied mathematics, computer programming, and/or statistical techniques relevant to particular questions in ecology, evolution, and behavior. Typical mathematical topics include discrete dynamics, systems of differential equations, matrix algebra, or statistical inference and probability.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
Groups: Advanced Mathematics Courses

BIOS 317 The Biology of Plants
Prerequisites: LIFE 120 and LIFE 121
Notes: Field trips are required and may occur outside of scheduled class time.
Description: Introduction to the basic principles and concepts of the biology of plants. Adaptive variation and biodiversity of plants considering the relationships of plant structure to function integrating across succeeding levels of organization: molecule, cell, tissue, organism, organism, population, community, and ecosystem.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC

BIOS 326 Biology of Viruses
Prerequisites: BIOS 206; one year general chemistry and one semester organic chemistry
Description: Fundamental concepts in virology including basic features of structure, evolution, diseases, replication cycles and virus-host interactions.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 369 Introductory Plant Pathology
Crosslisted with: PLPT 369
Prerequisites: BIOS 101 and 101L, or 109.
Description: Introduction to the study of plant diseases including relation of plant disease to crop production, environment, and man. Examples and demonstrations emphasize horticultural and agronomic crops of Nebraska.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 381 Invertebrate Zoology
Prerequisites: LIFE 121 & LIFE 121L
Description: Comparative study of the morphology and natural history of invertebrate animals; emphasis on phylogenetic relationships.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC
BIOS 385 Parasitology
Prerequisites: LIFE 121 & LIFE 121L
Description: Emphasis on parasitic diseases of humans. Impact of parasitism on societies considered in addition to the clinical consequences for infected individuals. Means of transmission, diagnosis, and treatment considered in respect to recent technological advances in production of monoclonal antibodies and genetic engineering. Nature and biological significance of parasitism are viewed in terms of prospects for control.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC

BIOS 386 Vertebrate Zoology
Crosslisted with: NRES 386
Prerequisites: LIFE 121 & LIFE 121L
Description: Evolutionary origin and relationships, natural history, and ecological adaptations of vertebrates. Comparative form and function, particularly of bone and muscle systems among and the diversity within vertebrate groups.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC

BIOS 388 Comparative Anatomy of the Vertebrates
Prerequisites: LIFE 121 & LIFE 121L
Description: Evolutionary development and comparative structure of the chordate organ systems, including dissections of the dogfish, salamander, and cat.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC

BIOS 389 Anatomy and/or Physiology Internship
Description: A combination of academic work and instruction in the anatomy or physiology laboratories in biological sciences: cadaver dissection or work with physiological equipment; assist in the instruction of anatomical and physiological concepts. Open only to students who expect to become teaching assistants in anatomy or physiology.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Format: LEC

BIOS 390 Internship
Description: Combination of work outside the University and academic work in biological sciences arranged through the Career Services Office. Specifics of requirements to be arranged with supervising faculty member. BIOS 395 will not count toward a major in BIOS.
Credit Hours: 1-3
Min credits per semester: 1
Max credits per semester: 3
Max credits per degree: 3
Format: IND

BIOS 395 Internship
Description: Enrollment in the biological sciences honors program.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Format: LEC

BIOS 398H Honors Seminar
Prerequisites: Enrollment in the biological sciences honors program
Description: Special topics in biology.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Format: LEC

BIOS 399H Honors Research
Prerequisites: Open to candidates for degrees with distinction or enrollment in the biological sciences honors program.
Description: Independent research leading to an honors thesis and exam in accordance with the College's degrees with distinction procedure.
Credit Hours: 1-4
Min credits per semester: 1
Max credits per semester: 4
Max credits per degree: 4
Format: IND

BIOS 402 Cancer Biology
Crosslisted with: BIOS 802
Prerequisites: BIOS 206 and Senior standing
Description: Principles of cancer genetics, cancer prevention, and new methods for diagnosis and therapy. Fundamentals of the cell and molecular events that lead to human cancer.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
ACE: ACE 10 Integrated Product

BIOS 406 Insect Ecology
Crosslisted with: BIOS 806, ENTO 406, ENTO 806
Prerequisites: BIOS/NRES 220 and 222
Description: Biotic and abiotic factors as they influence insect development, behavior, distribution, and abundance.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 407 Biology of Cells and Organelles
Crosslisted with: BIOS 807
Prerequisites: BIOS 206
Description: Regulation and timing of macromolecular synthesis during the cell cycle; the genetic autonomy of mitochondria and chloroplasts.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
BIOS 408 Functional Histology
Crosslisted with: BIOS 808, VBMS 408, VBMS 808
Prerequisites: BIOS 101 and 101L or LIFE 120 and 120L or BIOS 112; BIOS 213 or ASCI 240. BIOS 315 recommended.
Description: Comprehensive survey of comparative physiology with emphasis on the diversity of adaptations in basic physiological systems and the effects of environmental parameters upon such systems. Comparative physiology of osmoregulation, temperature regulation, and the effects of environmental parameters upon such systems.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 412 Human Genetics
Crosslisted with: BIOS 812
Prerequisites: BIOS 206 and Senior standing
Description: Genetic basis of human variation, with emphasis on methods of applying genetic principles to humankind. Genetic ratios in pooled data; population and quantitative genetics; consanguinity; polygenic inheritance; blood types; sex linkage; linkage and crossing over; sex determination; visible chromosome variation; mutation; heredity and environment; eugenics; anthropological genetics; molecular genetics and molecular basis of disease; human genome project.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

ACE: ACE 10 Integrated Product

BIOS 415 Developmental Biology
Crosslisted with: BIOS 815
Prerequisites: BIOS 206
Description: Survey of topics in developmental biology, both animal and plant development.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 416 Biodiversity Conservation
Crosslisted with: BIOS 816
Prerequisites: BIOS 207 or BIOS 220/NRES 220 and BIOS 222/NRES 222
Description: Basic conservation science theory and conservation decision making tools which are essential for making effective decisions for biodiversity conservation. Topics include systematic conservation planning, population viability analysis, risk assessment, and applying those tools to real conservation problems.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 418 Advanced Genetics
Crosslisted with: BIOS 818
Prerequisites: BIOS 206 and Senior standing
Description: In-depth study of the principles and methodology of genetics, with emphasis on Drosophila: multiple alleles and complex loci, linkage and recombination, chromosome rearrangements, fine structure analysis, sex determination, recombinant DNA, and gene function in development.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
ACE: ACE 10 Integrated Product

BIOS 419 Behavioral Neuroscience
Crosslisted with: BIOS 819, PSYC 465, PSYC 865
Prerequisites: PSYC 273 or PSYC 373 or BIOS 373.
Description: Relationship of physiological variables to behavior, an introduction to laboratory techniques in neuropsychology.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 420 Molecular Genetics
Crosslisted with: BIOS 820, VBMS 820, MBIO 420
Prerequisites: BIOS 206 and Senior standing
Description: Molecular basis of genetics. Gene structure and regulation, transposable elements, chromosome structure, DNA replication, and repair mechanisms and recombination.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
Prerequisite for: FDST 908B
ACE: ACE 10 Integrated Product

BIOS 421 Microbial Diversity
Crosslisted with: BIOS 821, MBIO 421
Prerequisites: BIOS 206 and BIOS 312 and Senior Standing.
Description: Diversity of microbial cell composition, structure, and function enabling movement, metabolism, symbiosis, and adaptation using bacterial, fungal, algal, and viral examples. A physiological, biochemical and molecular approach used throughout.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
ACE: ACE 10 Integrated Product

BIOS 422 Comparative Physiology
Crosslisted with: BIOS 822
Prerequisites: BIOS 213
Description: Comprehensive survey of comparative physiology with emphasis on the diversity of adaptations in basic physiological systems and the effects of environmental parameters upon such systems. Comparative physiology of osmoregulation, temperature regulation, metabolism, muscle, central nervous function, and sensory function.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
ACE: ACE 10 Integrated Product
BIOS 422L Comparative Physiology Laboratory
Prerequisites: Co-enrollment with BIOS 422
Notes: Letter grade only.
Description: Physiological adaptations in ecological and evolutionary context.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Format: LAB

BIOS 425 Plant Biotechnology
Crosslisted with: BIOS 825
Prerequisites: BIOS 206
Description: Introduction to the use of plants for basic and applied purposes by deliberate manipulation of their genomes; techniques in plant genetic engineering; manipulations of plant development and metabolism; engineering pest, disease, and stress resistance; plants as bioreactors; and environmental and social impacts of plant biotechnology.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 426 Systems Biology
Crosslisted with: BIOS 826
Prerequisites: LIFE 120 and LIFE 121, or BIOS 101 or equivalent; STAT 218 or equivalent.
Description: Fundamentals of the analysis of high throughput experiments to understand complex biological systems. Principles and methods such as next generation sequencing, protein-protein interaction networks, regulatory networks, and biological data mining and integration. Emerging research in new biotechnology and data analysis in biomedical and life sciences.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 427 Practical Bioinformatics Laboratory
Crosslisted with: BIOS 827
Prerequisites: BIOS 206 or equivalent.
Description: Basic knowledge and skills needed for general bioinformatics, genomics and proteomics analyses. Various computational analyses including database search, sequence alignment, phylogenetic reconstruction, gene prediction/mining, microarray data analyses and protein structure analyses.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 428 Perl Programming for Biological Applications
Crosslisted with: BIOS 828
Prerequisites: LIFE 120 and LIFE 121
Description: Computer programming, using Perl, as applied to biological sciences, bioinformatics, computational biology, and genomics.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 429 Phylogenetic Biology
Crosslisted with: BIOS 829
Prerequisites: BIOS 207 and Senior standing
Description: Principles of phylogenetic inference and emphasis on the application of phylogenetic hypotheses in biology and the biomedical sciences. How inferences derived from phylogenetic trees can be applied in different areas of biological investigation including systematics, biogeography, conservation biology, molecular evolution, genome structure, epidemiology, population biology, ecology, character evolution, behavior, and macroevolution.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC
ACE: ACE 10 Integrated Product

BIOS 431 Structure and Metabolism
Crosslisted with: BIOC 431/831.
Prerequisite for: VBMS 410
Prerequisites: CHEM 252 or CHEM 262 with a grade of C or better. LIFE 120 and BIOS 206 are recommended
Notes: First course of a two-semester, comprehensive biochemistry course sequence.
Description: Structure and function of proteins, nucleic acids, carbohydrates and lipids; nature of enzymes; major metabolic pathways of catabolism; and biochemical energy production.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 432 Metabolism and Biological Information
Crosslisted with: BIOC 432/832.
Prerequisite for: VBMS 410
Prerequisites: BIOC 431/831 with a grade of C or better, BIOS 206 or AGRO 215.
Notes: Continuation of BIOC 431/831.
Description: Major metabolic pathways of anabolism, structural and biochemical aspects of biological information flow and use in biotechnology.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 433 Biochemistry Laboratory
Crosslisted with: BIOC 433/833.
Prerequisites: BIOS 383 or concurrent enrollment in BIOC 433/833.
Description: Introduction to techniques used in biochemical and biotechnology research, including measurement of pH, spectroscopy, analysis of enzymes, chromatography, fractionation of macromolecules, electrophoresis, and centrifugation.
Credit Hours: 2
Max credits per semester: 2
Max credits per degree: 2
Format: LEC
BIOS 434 Plant Biochemistry
Crosslisted with: AGRO 434, BIOC 434, CHEM 434, AGRO 834, BIOC 834, BIOS 834, CHEM 834
Prerequisites: BIOC/BIOS/CHEM 431/831.
Description: Biochemical metabolism unique to plants. Relationships of topics previously acquired in general biochemistry to biochemical processes unique to plants. Biochemical mechanisms behind physiological processes discussed in plant or crop physiology.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 436 Quaternary Paleoclimatology and Paleoecology
Crosslisted with: BIOS 836, GEOL 423, GEOL 823
Prerequisites: 12 hrs GEOL or BIOS.
Description: Analysis and interpretation of the Quaternary period's paleoclimatological data. Patterns of long-term climate variation. Distribution patterns and responses of organisms and ecosystems to Quaternary environmental change.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 437 Research Techniques in Biochemistry
Crosslisted with: BIOC 437, BIOC 837, BIOS 837
Prerequisites: BIOC/BIOS/CHEM 433/833, or permission
Description: Methods approach to systems biology analysis. Molecular identification and quantification employing techniques such as mass spectrometry, chromatography, electrophoretic fractionation, transcriptomics, proteomics and metabolomics. Data and pathway analysis with computational methods.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC

BIOS 438 Biogeochemical Cycles
Crosslisted with: BIOS 838, GEOL 424, GEOL 824
Prerequisites: CHEM 109 or 113; 12 hrs geology or biological sciences.
Description: Chemical cycling at or near the earth's surface, emphasizing interactions among the atmosphere, biosphere, geosphere and hydrosphere. Modern processes, the geological record, and human impacts on elemental cycles.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 439 Dynamics of Biochemical and Biological Networks
Crosslisted with: BIOC 439, BIOC 839, BIOS 839
Prerequisites: BIOS 206, BIOC 321 or BIOC 431 (or equivalent)
Description: To introduce and integrate, students in biochemistry and other life sciences, to the field of computational modeling of biochemical and biological network systems into a seamless curriculum.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 440 Microbial Physiology
Crosslisted with: BIOS 840, VBMS 840, Mbio 440
Prerequisites: BIOS 312 and either 313 or 314, or permission
Description: Molecular approaches to the study of prokaryotic cell structure and physiology, including growth, cell division, metabolism, and alternative microbial life styles.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 441 Pathogenic Microbiology
Crosslisted with: BIOS 841, VBMS 441, VBMS 441H, VBMS 841
Prerequisites: BIOS 312 and either 313 or 314, or permission.
Description: Fundamental principles involved in host-microorganism interrelationships. Identification of pathogens, isolation, propagation, mode of transmission, pathogenicity, symptoms, treatment, prevention of disease, epidemiology, and methods of control.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 442 Endocrinology
Crosslisted with: ASCI 442, ASCI 842, BIOS 842, VBMS 842
Prerequisites: A course in vertebrate physiology and/or biochemistry.
Description: Mammalian endocrine glands from the standpoint of their structure, their physiological function in relation to the organism, the chemical nature and mechanisms of action of their secretory products, and the nature of anomalies manifested with their dysfunction.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 443 Immunology
Crosslisted with: BIOS 843, VBMS 843, Mbio 443
Prerequisites: BIOS 206 and one semester organic chemistry
Description: Fundamental consideration of cellular and humoral mechanisms of immunity, the structure and function of immunoglobulins, antigen-antibody interactions; hypersensitivity; transplantation and tumor immunity; immune and autoimmune disorders.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

Prerequisite for: VBMS 910

BIOS 444 Geomicrobiology
Crosslisted with: BIOS 844, GEOL 444, GEOL 844
Prerequisites: 3 hours biological sciences and 3 hours chemistry.
Description: Lectures and discussions of primary literature regarding microorganisms and their role transforming Earth through geologic time.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

<tbody>
<tr>
<td>BIOS 445</td>
<td>Food Microbiology</td>
<td>BIOS 845, FDST 405, FDST 805</td>
<td>BIOS 312; CHEM 251; BIOC 321.</td>
<td>Nature, physiology, and interactions of microorganisms in foods. Introduction to food-borne diseases, the effect of food processing systems on the microflora of foods, principles of food preservation, food spoilage, and foods produced by microorganisms. Food plant sanitation and criteria for establishing microbial standards for food products.</td>
<td>3</td>
</tr>
<tr>
<td>BIOS 446</td>
<td>Food Microbiology Laboratory</td>
<td>BIOS 846, FDST 406, FDST 806</td>
<td>Parallel in FDST 405/805/BIOS 446/846.</td>
<td>The microorganisms in foods and the methods used to study them.</td>
<td>2</td>
</tr>
<tr>
<td>BIOS 447</td>
<td>Soil Microbiology</td>
<td>AGRO 460, NRES 460, SOIL 460, AGRO 860, BIOS 847, NRES 860</td>
<td>One semester microbiology; one semester biochemistry or organic chemistry.</td>
<td>Soil from a microbe's perspective-growth, activity and survival strategies; principles governing methods to study microorganisms and biochemical processes in soil; mechanisms controlling organic matter cycling and stabilization with reference to C, N, S, and P; microbial interactions with plants and animals; and agronomic and environmental applications of soil microorganisms.</td>
<td>3</td>
</tr>
<tr>
<td>BIOS 448</td>
<td>Human Growth and Development</td>
<td>ANTH 448, ANTH 848, BIOS 848</td>
<td>ANTH 242 and 242L, or BIOS 101 and 101L.</td>
<td>Biological diversity from an evolutionary perspective. The history of the study of human physical growth and biological principles of growth. Genetic, epigenetic and hormonal effects on human and other mammal growth patterns, and environmental factors that influence growth. Effects of nutrition, disease, socio-economic status, pollution, etc. Unique features of human growth in its various stages. How anthropologists interpret variation in growth patterns among human populations and the possible adaptive significance of this variation.</td>
<td>3</td>
</tr>
<tr>
<td>BIOS 450</td>
<td>Biology of Wildlife Populations</td>
<td>BIOS 850, NRES 450, NRES 850</td>
<td>NRES 311; MATH 104 or above; STAT 218 or equivalent</td>
<td>Principles of population dynamics. Management strategies (for consumptive and nonconsumptive fish and wildlife species) presented utilizing principles developed.</td>
<td>4</td>
</tr>
<tr>
<td>BIOS 452</td>
<td>Field Epidemiology</td>
<td>BIOS 852</td>
<td>LIFE 120 and LIFE 121 and one additional 200-level life science course; or permission</td>
<td>Principles of epidemiology and the role in modern medicine. Combination of theory and practice with living populations.</td>
<td>4</td>
</tr>
<tr>
<td>BIOS 454</td>
<td>Ecological Interactions</td>
<td>BIOS 854, NRES 454, NRES 854</td>
<td>LIFE 121 &amp; 121L, BIOS 207 or BIOS 220 and Senior standing</td>
<td>Nature and characteristics of populations and communities. Interactions within and between populations in community structure and dynamics. Direct and indirect interactions and ecological processes, competition, predation, parasitism, herbivory, and pollination. Structure, functioning and persistence of natural communities, foodweb dynamics, succession, and biodiversity.</td>
<td>3</td>
</tr>
<tr>
<td>BIOS 455</td>
<td>Great Plains Flora</td>
<td>BIOS 855</td>
<td>LIFE 120 and LIFE 121</td>
<td>Plant identification. Field study of the flora in various habitats. Field trips include grassland and woodland vegetation of this region.</td>
<td>4</td>
</tr>
</tbody>
</table>

**Groups:** Biological Anthropology
BIOS 456 Mathematical Models in Biology  
Crosslisted with: BIOS 856, NRES 456  
Prerequisites: Junior standing; major in the biological sciences; MATH 106 or 107.  
Description: Biological systems, from molecules to ecosystems, are analyzed using mathematical techniques. Strengths and weaknesses of mathematical approaches to biological questions. Brief review of college level math; introduction to modeling; oscillating systems in biology; randomness in biology; review of historically important and currently popular models in biology.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Format: LEC

BIOS 457 Ecosystem Ecology  
Crosslisted with: BIOS 857, GEO 457, EOL 857  
Prerequisites: BIOS 207 and CHEM 110 and Senior standing  
Description: Processes controlling the cycling of energy and elements in ecosystems and how both plant and animal species influence them. Human-influenced global and local changes that alter these cycles and ecosystem functioning.  
Credit Hours: 4  
Max credits per semester: 4  
Max credits per degree: 4  
Format: LEC  
ACE: ACE 10 Integrated Product

BIOS 458 Wetlands  
Crosslisted with: NRES 468, NRES 868, WATS 468  
Prerequisites: 12 hrs biological sciences; BIOS 220; CHEM 109 and 110.  
Description: Physical, chemical and biological processes that occur in wetlands; the hydrology and soils of wetland systems; organisms occurring in wetlands and their ecology; wetland creation, delineation, management and ecotoxicology.  
Credit Hours: 4  
Max credits per semester: 4  
Max credits per degree: 4  
Format: LEC

BIOS 459 Limnology  
Crosslisted with: BIOS 859, NRES 459, NRES 859, WATS 459  
Prerequisites: 12 hrs BIOS, including BIOS/NRES 220/BIOS220x; two semesters CHEM.  
Description: Physical, chemical, and biological processes that occur in fresh water. Organisms occurring in fresh water and their ecology; biological productivity of water and its causative factors; eutrophication and its effects.  
Credit Hours: 4  
Max credits per semester: 4  
Max credits per degree: 4  
Format: LEC  
ACE: ACE 10 Integrated Product

BIOS 462 Animal Behavior  
Crosslisted with: BIOS 862  
Prerequisites: BIOS 206, 207 and Senior Standing  
Description: Introduction to animal behavior stressing the ethological approach. Anatomical and physiological bases of behavior, ontogenetic and phylogenetic observations, and the relations of animal behavior studies to genetics, ecology, taxonomy, and evolution.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Format: LEC  
ACE: ACE 10 Integrated Product

BIOS 464 Fisheries Biology  
Crosslisted with: BIOS 864, NRES 464, NRES 864  
Prerequisites: BIOS/NRES 489/889 or equivalent.  
Description: Biology of fishes. Factors that affect fishes in the natural environment. Techniques used in the analysis and management of fish populations.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Format: LEC

BIOS 468 Field Animal Behavior  
Crosslisted with: BIOS 868  
Prerequisites: LIFE 120 and LIFE 121  
Notes: BIOS 207 or BIOS 220 recommended. Offered summers only at Cedar Point Biological Station.  
Description: Behavior of animals. Stresses methods for testing evolutionary hypotheses under field conditions with emphasis on foraging behavior, animal communication, and animal social systems.  
Credit Hours: 4  
Max credits per semester: 4  
Max credits per degree: 4  
Format: LEC  
ACE: ACE 10 Integrated Product

BIOS 470 Prairie Ecology  
Crosslisted with: BIOS 870  
Prerequisites: BIOS 207 or equivalent.  
Description: Structure, function, and distribution of communities. Interaction of different species with their biotic and abiotic environments.  
Credit Hours: 4  
Max credits per semester: 4  
Max credits per degree: 4  
Format: LEC

BIOS 471 Plant Systematics  
Crosslisted with: BIOS 871  
Prerequisites: LIFE 121 and LIFE 121L  
Description: Overview of the diversity of plants and algae, with emphasis on phylogenetic relationships, the evolution of important physical and genomic characteristics, principles of plant classification and identification, and modern methods of plant molecular systematics. Lab work on taxonomic analysis and plant identification.  
Credit Hours: 4  
Max credits per semester: 4  
Max credits per degree: 4  
Format: LEC
BIOS 472 Evolution
Prerequisites: BIOS 207 and Senior standing
Description: The principles and processes of micro- and macroevolution. Mechanisms behind evolutionary change and examples of these processes in a wide variety of organisms.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
ACE: ACE 10 Integrated Product

BIOS 474 Herpetology
Crosslisted with: BIOS 874, NRES 474, NRES 874
Prerequisites: BIOS/NRES 386 and permission. BIOS 388 recommended.
Description: Fossil and living amphibians and reptiles. Anatomy, classification, ecology and evolution.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC

BIOS 475 Avian Biology
Crosslisted with: BIOS 875
Prerequisites: LIFE 121 & LIFE 121L
Notes: May also be offered at Cedar Point Biological Station.
Description: Biology of birds emphasizing the behavior and ecology of this group. Topics include avian diversity, systematics & evolutionary history, flight, foraging, migration, communication, reproductive biology, population ecology and conservation biology.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 475L Avian Biology Laboratory
Crosslisted with: BIOS 875L
Prerequisites: Parallel BIOS 475/875 and permission
Notes: An immersive field biology experience at Cedar Point Biological Station.
Description: Avian field identification in diverse prairie, riparian, and montane habitats. Individual studies of foraging behavior, territoriality, anti-predator behavior, mating systems, or nesting ecology.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Format: LAB

BIOS 476 Mammalogy
Crosslisted with: BIOS 876, NRES 476, NRES 876
Prerequisites: 8 hrs BIOS; BIOS/NRES 386 or NRES 311.
Notes: May also be offered at Cedar Point Biological Station. Field trips are required and may occur outside of scheduled class time. Lab and field time emphasize diversity of mammalian families and species identification of Nebraska mammals.
Description: Evolution, natural history, ecology, and functional morphology of planetary mammals and mammals of the Northern Great Plains.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC

BIOS 477 Bioinformatics and Molecular Evolution
Crosslisted with: BIOS 877
Prerequisites: BIOS 206 or parallel and CHEM 251 or equivalent
Description: Pairwise and multiple alignments, sequence similarity and domain search, distance estimation, phylogenetic methods, gene mining, protein classification and structure. Algorithms used in bioinformatics as well as fundamental concepts of molecular evolution that underlie various bioinformatics methods.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

BIOS 478 Plant Anatomy
Crosslisted with: BIOS 878
Prerequisites: 8 hrs biological sciences, BIOS 109 recommended.
Description: Development, structure, and function of tissues and organs of the higher plants. Relationships of structure to physiology and ecology of plants.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC

BIOS 480 Ecology and Evolution of Arachnids
Crosslisted with: BIOS 880
Prerequisites: BIOS 207 or BIOS 220
Description: Ecology and evolutionary biology of living arachnids.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC

BIOS 481 Stream and River Ecology
Crosslisted with: WATS 481, WATS 881, NRES 481
Prerequisites: NRES 222 or equivalent
Description: Fundamental physical drivers operating in stream and river ecosystems and how those vary in space and time. Major classes of organisms associated with stream ecosystems and their functional roles. Fundamental controls on biotic diversity in stream and river ecosystems and its variance. Major aspects of stream ecosystem function including energy flow and nutrient cycling. Ecosystem services provided by stream and river ecosystems and causes and consequences of human impacts on streams and rivers. Underlying principles of bioassessment and current methods of stream restoration.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC

BIOS 482 Field Entomology
Crosslisted with: BIOS 882, ENTO 411, ENTO 811
Prerequisites: 12 hrs biological sciences.
Description: Field course in insect taxonomy and biology emphasizing field collection, specimen preparation, classification, and insect natural history.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC

**PLEASE NOTE**

This document represents a sample 4-year plan for degree completion with this major. Actual course selection and sequence may vary and should be discussed individually with your college or department academic advisor. Advisors also can help you plan other experiences to enrich your undergraduate education such as internships, education abroad, undergraduate research, learning communities, and service learning and community-based learning.

### Biological Sciences (B.S.)

#### 15 HR TERM 1

**Calculus**

complete MATH 106

5hr

MATH 106 will fulfill the ACE 3 requirement.

**General Chemistry**

complete CHEM 109

4hr
CHEM 109 will fulfill the ACE 4 requirement.

ACE 1 Written Texts
complete 1 from ACE1

3hr

CDR E: Language
recommend 1 or more courses

3hr

If not complete, choose a language course according to your placement and proficiency. CDR E is met after 4th level (202) of most languages.

14 HR TERM 2

General Chemistry
complete CHEM 110

4hr

CHEM 110 will fulfill the CDR F requirement.

Life Science
complete LIFE 120, LIFE 120L

4hr

LIFE 120 and 120L become critical to your success in the major if not completed by the second term of enrollment. These courses will fulfill the CDR B and CDR BL requirements.

CDR A: Writing
complete 1 from ACE1

3hr

Complete an additional course approved as ACE 1.

CDR E: Language
recommend 1 or more courses

3hr

If not complete, choose a language course according to your placement and proficiency. CDR E is met after 4th level (202) of most languages.

15 HR TERM 3

Life Science
complete LIFE 121, LIFE 121L

4hr
In consultation with your advisor, select elective courses or courses that meet a 2nd major, minor, sci-base or upper level requirement.

**15 HR TERM 5**

**Biological Science Course**

complete 1 from Any Biological Science Course at the 100 Level, Any Biological Science Course at the 200 Level, Any Biological Science Course at the 300 Level, Any Biological Science Course at the 400 Level

Complete an approved BIOS course at any level.

**General Physics**

complete either PHYS 141 or PHYS 211

**ACE 8 Ethical Principles**

complete 1 from ACE8

**Electives**

complete Any Course

In consultation with your advisor, select elective courses or courses that meet a 2nd major, minor, sci-base or upper level requirement.

**16 HR TERM 6**

**Biological Sciences Core**

complete BIOS 207

**Biochemistry Course**

complete BIOC 321

**General Physics**

complete either PHYS 142 or PHYS 212

**CDR D: Social Sciences**

complete 1 from Any Anthropology Course, Any Communications Course, Any Geography Course, Any National Securities Studies Course, Any Political Science Course, Any Psychology Course, Any Sociology Course

Complete an approved course from a Social Science discipline: ANTH, COMM, GEGE, NSST, POLS, PSYC, SOCI.

**15 HR TERM 7**

**Biol Science Upper Level**

complete either Any Biological Science Course at the 300 Level or Any Biological Science Course at the 400 Level

**Biol Science 400 Level**

complete Any Biological Science Course at the 400 Level

**CDR C: Humanities**

complete 1 from Any Arabic Course at the 300 Level, Any Classics Course, Any Czech Course at the 300 Level, Any Czech Course at the 400 Level, Any English Course, FREN 282, Any French Course at the 300 Level, Any French Course at the 400 Level, GERM 282, Any German Course at the 300 Level, Any German Course at the 400 Level, Any Greek Course at the 300 Level, Any Greek Course at the 400 Level, Any Hebrew Course at the 300 Level, Any History Course, Any Japanese Course at the 300 Level, Any Latin Course at the 300 Level, Any Latin Course at the 400 Level, Any Philosophy Course, Any Religious Studies Course at any Level, Any Russian Course at the 300 Level, Any Russian Course at the 400 Level, SPAN 264, SPAN 265, Any Spanish Course at the 300 Level, Any Spanish Course at the 400 Level

Complete an approved course from a Humanities discipline: ARAB, CLAS, CZEK, ENG, FREN, FRNC, GERM, DEUT, GREE, HEBR, HIST, JAPN, LATN, PHIL, RELS, RUSN, SPAN, SPAN.

**Electives**

complete Any Course
In consultation with your advisor, select elective courses or courses that meet a 2nd major, minor, sci-base or upper level requirement.

16 HR TERM 8

Biol Science 400 Level

complete Any Biological Science Course at the 400 Level

3hr
C

Complete an approved BIOS 400 level course that will meet the ACE 10 requirement.

Biological Science Course

complete 1 from Any Biological Science Course at the 100 Level, Any Biological Science Course at the 200 Level, Any Biological Science Course at the 300 Level, Any Biological Science Course at the 400 Level

4hr
C

Complete an approved BIOS course at any level.

Assessment Course

complete BIOS99#

0hr
C

ACE 7 Arts

complete 1 from ACE7

3hr

ACE 9 Global/Human Divers

complete 1 from ACE9

3hr

Electives

complete Any Course

3hr

In consultation with your advisor, select elective courses or courses that meet a 2nd major, minor, sci-base or upper level requirement.

Career Information

The following represents a sample of the internships, jobs and graduate school programs that current students and recent graduates have reported.

Transferable Skills

- Comprehend and critically evaluate complex information
- Use quantitative analytical computational techniques
- Make predictions using mathematical, statistical, and scientific modeling methods
- Understand and use proper laboratory and technical skills and instruments
- Define problems and identifying causes
- Support and communicate claims using clear evidence
- Simplify complex information and present it to others
- Apply mathematical and scientific skills to solve real-world problems
- Document and replicate processes and procedures
- Design and implement research experiments

Jobs of Recent Graduates

- Clinical Assistant, Bryan Health - Lincoln NE
- Mental Health Technician, TouchStone - Lincoln NE
- Physical Therapy Technician, Lincoln Physical Therapy Associates - Lincoln NE
- DNA Lab Tech, GeneSeek - Lincoln NE
- Veterinary Assistant, Animal Care Clinic - Lincoln NE
- Zookeeper, Omaha Henry Doorly Zoo - Omaha NE
- Forestry Aid, United States Forest Service - Ogden UT
- Hospital Generalist, Pathology Medical Services - Lincoln NE
- Hematology Technician I, Streck - La Vista NE
- Clinical Data Quality Specialist, Celerion Inc. - Lincoln NE

Internships

- Beckman Research Scholar, UNL College of Arts Sciences Beckman Scholars - Lincoln NE
- Optician, Shopko Optical - Lincoln NE
- Anatomy Intern, UNL School of Biological Sciences - Lincoln NE
- Dental Intern, UNMC Dental College - Lincoln NE
- Intern, Southwestern -
- Intern, NE Dept of Health Human Services - Lincoln NE
- Intern, Pregnancy Center - Lincoln NE
- Advisor, Vector Marketing - Denver CO
- Campaign Intern, Clark for Legislature - Lincoln NE
- Biological Intern, UNL Biology Department - Lincoln NE

Grad Schools

- MD, University of Nebraska Medical School - Omaha NE
- Veterinary Medicine, Iowa State University - Ames IA
- College of Pharmacy, University of Nebraska Medical Center - Omaha NE
- Physical Therapy, Briar Cliff University - Iowa NE
- Clinical Laboratory Science, St. Luke’s - Kansas City MO
- Master of Public Health, University of Nebraska Medical Center - Omaha NE
- Optometry, Southern College of Optometry - Memphis TN
• Masters-Food Science, University of Nebraska-Lincoln - Lincoln NE
• Masters of Business Administration, Bellevue University - Bellevue NE
• Physician Assistant, University of Nebraska Medical Center - Omaha NE
