GEOLOGY

Description
The Department of Earth and Atmospheric Sciences offers both the bachelor of science and the bachelor of arts degrees in geology. The bachelor of science program is designed for those who expect to continue in graduate work and become professional geoscientists. Undergraduate training in geology is also beneficial in many other fields such as teaching at the precollege level, urban planning, law, civil engineering, environmental studies, and museum work. Students preparing for these or similar areas are advised to take the bachelor of arts program, which is strong in fundamental geology but does not emphasize the ancillary courses required for admission to many graduate programs.

Field Trips. Many of the geology courses require field trips that typically include camping and primitive conditions. The number of trips and their duration are a function of the requirements of the particular course. Students seeking information or accommodation should contact the course instructor.

Program Assessment. In order to assist the department in evaluating the effectiveness of its programs, majors will be required to maintain and submit a portfolio of material produced for the required Summer Field Course, GEOL 460 Summer Field Course (for BS students), or for the required Depositional Environments course, GEOL 310 Depositional Environments (for BA students). Course instructors will inform students of the required contents, deadlines and procedures. Results of participation in this assessment activity will in no way affect a student’s GPA or graduation.

College Requirements

College Admission

College Admission
The entrance requirements for the College of Arts and Sciences are the same as the UNL General Admission Requirements. Students who are admitted through the Admission by Review process may have certain conditions attached to their enrollment at UNL. These conditions are explained under “Removal of Deficiencies.”

In addition to these requirements, the College of Arts and Sciences strongly recommends a third and fourth year of languages. Four years of high school language will exempt students from the College of Arts and Sciences' language requirement. It will also allow students to continue language study at a more advanced level, and give more opportunity to study abroad.

Transfer Students
To be considered for admission as a transfer student, Nebraska resident or nonresident, students must have an accumulated average of C (2.0 on a 4.0 scale) and a minimum C average in the last semester of attendance at another college. Transfer students who graduated from high school January 1997 and after must also meet the UNL General Admissions Requirements. Those transfer students who graduated before January 1997 must have completed in high school 3 years of English, 2 years of the same foreign language, 2 years of algebra, and 1 year of geometry. Transfer students who have completed less than 12 credit hours of college study must submit either the ACT or SAT scores.

Ordinarily, hours earned at an accredited college are accepted by the University. The College, however, will evaluate all hours submitted on an application for transfer and reserves the right to accept or reject any of them. Sixty is the maximum number of hours the University will accept on transfer from a two-year college or international institution. Transfer credit in the major or minor must be approved by the departmental advisor on a Request for Substitution Form to meet specific course requirements, group requirements, or course level requirements in the major or minor. At least half of the hours in the major field must be completed at the University regardless of the number of hours transferred.

The College of Arts and Sciences will accept no more than 15 semester hours of C- and D grades from other schools. The C- and D grades cannot be applied toward requirements for a major or minor. This policy does not apply to the transfer of grades from UNO or UNK to UNL. All D grades may be transferred from UNO or UNK, but they are not applicable to a major or minor.

Readmitted Students
Students readmitted to the College of Arts and Sciences will follow the requirements stated in the bulletin for the academic year of readmission and reenrollment as a degree-seeking student in Arts and Sciences. In consultation with advisors, a student may choose to follow a bulletin for any academic year in which they are admitted to and enrolled as a degree-seeking student at UNL in the College of Arts and Sciences. Students must complete all degree requirements from a single bulletin year. Beginning in 1990-1991, the bulletin which a student follows for degree requirements may not be more than 10 years old at the time of graduation.

Admission Deficiencies/Removal of Deficiencies
Students must remove entrance deficiencies in geometry and foreign language before graduating from the College of Arts and Sciences and should consult a college advisor in the Academic and Career Advising Center in 107 Oldfather Hall for questions about admission deficiencies.

Removing Foreign Language Deficiencies
A deficiency of one year of geometry can be removed by taking two high school geometry courses by Independent Study or by completing a geometry course from an accredited community college or a four-year institution. Neither of these options count for college credit.

Removing Geometry Deficiencies
A deficiency of one year of geometry can be removed by taking two high school geometry courses by Independent Study or by completing a geometry course from an accredited community college or a four-year institution. Neither of these options count for college credit.

College Degree Requirements

College General Education Requirements
The College of Arts and Sciences distribution requirements are designed to further the purposes of liberal education by encouraging study in several different areas. Courses satisfying these requirements may impart specialized knowledge or broadly connect the subject matter to other areas of knowledge.

All requirements are in addition to University ACE requirements. A student may not use a single course to satisfy more than one of the following five distribution requirements. A student cannot use a single course to satisfy both an ACE outcome and a College distribution requirement. A student cannot use a course from their major to satisfy the Breadth Requirement (F), but may apply an ancillary requirement of the primary major or a course from their second major toward this requirement. Independent study or reading courses and internships
cannot be used to satisfy distribution requirements. To see a complete list of excluded courses, run a degree audit through MyRED.

Courses from interdisciplinary programs will count in the same area as courses from the home/cross-listed department(s).

Bachelor of Arts or Bachelor of Science (16 credits + Language)

A. Written Communication: 3 hours
   To be selected from courses approved for ACE outcome 1.

B. Natural, Physical and Mathematical Sciences: 4 hours
   Select from biochemistry, biological sciences, chemistry, computer science, geology, meteorology, mathematics, physics and statistics. Must include one lab in the natural or physical sciences. Lab courses may be selected from biochemistry, biological sciences, chemistry, geology, meteorology and physics. Select courses from geography\(^1\) and anthropology\(^*\) may also be used to satisfy the lab requirement.

C. Humanities: 3 hours
   Select from: classics\(^2\), English, history, modern languages and literatures\(^2\), philosophy, and religious studies\(^2\).

D. Social Sciences: 3 hours
   Select from: anthropology\(^3\), communication studies, geography\(^3\), political science, psychology\(^3\), or sociology.

E. Languages Classical and Modern: 0-6 hours
   Fulfilled by the completion of the 6-credit-hour second-year sequence in a single foreign language in one of the following departments: Classics and religious studies, modern languages and literatures, or anthropology. Instruction is currently available in Arabic, Chinese, Czech, French, German, Greek, Japanese, Latin, Omaha, Russian, and Spanish. A student who has completed the fourth-year level of one foreign language in high school is exempt from the languages requirement.

F. Additional Breadth Requirement (may not be used toward the primary major; may apply toward ancillary requirements and second majors): 3 hours
   Select from: natural, physical and mathematical sciences (Area B), humanities (Area C), or social sciences (Area D).

\(^1\) See your degree audit or a College of Arts and Sciences advisor for approved geography and anthropology courses that apply as natural science.

\(^2\) Language courses numbered 210 or below apply only for the foreign language requirement.

\(^3\) See degree audit or College of Arts and Sciences advisor for list of natural/physical science courses in anthropology, geography, and psychology that do not apply as social science.

Scientific Base
The bachelor of science degree requires students to complete 60 hours in mathematical, physical and natural sciences. Approved courses for scientific base credit come from the following College of Arts and Sciences disciplines: actuarial science, anthropology (selected courses), astronomy, biochemistry (excluding BIOC 101 Career Opportunities in Biochemistry), biological sciences (excluding CASC 160 Introduction to Dentistry and Dental Hygiene, BIOS 160 Introduction to Clinical Laboratory Science, BIOS 203 Bioethics), chemistry (excluding CHEM 101 Career Opportunities in Chemistry), computer science (excluding CSCE 10 Introduction to CSE), geography (selected courses), geology, life sciences, mathematics (excluding courses below MATH 104 Applied Calculus), meteorology, physics and statistics.

See your degree audit or a College of Arts and Sciences advisor for a complete list including individual classes that fall outside of the disciplines listed above. Up to 12 hours of scientific and technical courses offered by other colleges may be accepted toward this requirement with approval of a college advisor.

Foreign Languages/Language Requirement
Languages Exemption Policy
UNL and the College of Arts and Sciences will exempt or waive students from the UNL entrance requirement of two years of the same foreign language or from the College’s language distribution requirement based on documentation only. The following are the options and procedures for documentation:

High School Transcripts
1. For the University entrance requirements, students must show an official high school transcript with two or more years of the same foreign language in high school.
2. For the College of Arts and Sciences College Distribution Requirement E-Language, students must show an official high school transcript with four or more years of the same foreign language in high school, or show evidence of graduation from a non-English-speaking foreign high school.
3. For the College of Arts and Sciences College Distribution Requirement E-Language, students whose native language is not English must show English as a Second Language study on an official high school transcript. Four years of ESL at the high school level (9th, 10th, 11th and 12th grades) will be the basis for a waiver of the CDR E Language requirement.

Proficiency Examination at UNL
1. For the University entrance requirement, students who do not have transcript documentation can request to take a proficiency exam in the language. (This is not the same test as the Modern Languages Placement Exam.) However, UNL will provide testing only in the languages it teaches. Currently, these languages are:
   - Arabic
   - French
   - German
   - Spanish
   - Russian
   - Czech
   - Japanese
   - Chinese

The Department of Modern Languages will oversee the test and provide written documentation to the Arts and Sciences Advising Center that the student has passed the proficiency test at the 102 level.

2. For the College of Arts and Sciences College Distribution Requirement E-Language, the Department of Modern Languages will oversee the test at the 202 level. If the student passes the test, the department will sign the College Request for Waiver form and indicate the level of proficiency. The form is then forwarded to the Arts and Sciences Advising Center for approval.

Distance Education
1. For the University entrance requirement, students without transcript documentation who claim proficiency in a language not taught at UNL, have the option of seeking out a distance education program in languages. If the student completes the equivalent of 102 from an approved distance education program, the student will meet the UNL entrance requirement. The student must have the course work approved before he/she takes/completes the course as equivalent
to 102 by a College advisor. The student then completes the course and has the distance education program send the transcript to the Admissions Office.

2. For the College of Arts and Sciences College Distribution Requirement E-Language, the student can seek out a distance education program and complete the equivalent of the 202-level course. The student must submit the request on the College Request for Substitution form and have the course work approved by a College advisor. The student then completes the course and has the distance education program send the transcript to the Admissions Office.

Third Language Option
If a student demonstrates knowledge of two foreign languages at the 102 level, the College of Arts and Sciences may consider waiving two semesters of the four semester College Distribution Requirements E-Languages requirement. If this waiver were granted, the student would then be required to complete 101 and 102 in another (3rd language) at UNL.

Minimum Hours Required for Graduation
A minimum of 120 semester hours of credit is required for graduation from the College of Arts and Sciences. A total grade point average of at least 2.0 is required.

Grade Rules
Restrictions on C- and D Grades
The College will accept no more than 15 semester hours of C- and D grades from other schools except for UNO and UNK. No transfer C- and D grades can be applied toward requirements in a major or a minor. No UNL C- and D grades can be applied toward requirements in a major or a minor.

Pass/No Pass Privilege
University regulations for the Pass/No Pass (P/N) privilege state:

- The Pass/No Pass option is designed for your use by seeking to expand your intellectual horizons by taking courses in areas where you may have had minimal preparation.

For students in Arts and Sciences, the University regulations for Pass/No Pass apply as follows:

- Neither the P nor the N grade contribute to your GPA.
- P is interpreted to mean C or above.
- A change to or from a Pass/No Pass may be made until mid-term (1/2 of the course).
- The Pass/No Pass or grade registration cannot conflict with the policy of the professor, department, college, or University governing the grading option.
- Changing to or from Pass/No Pass requires using the MyRED system to change the grading option or filing a Drop/Add form with the Office of the University Registrar, 107 Canfield Administration Building. After mid-term of the course, a student registered for Pass/No Pass cannot change to a grade registration unless the Pass/No Pass registration is in conflict with the policy of the professor, department, college, or University governing Pass/No Pass.
- The Pass/No Pass grading option cannot be used for the removal of C- or D or F grades.

Pass/No Pass privileges in the College of Arts and Sciences are extended to students according to the following additional regulations:

- Pass/No Pass hours can count toward fulfillment of University ACE requirements and college distribution requirements up to the 24-hour maximum.
- Many Arts and Sciences departments and programs do not allow courses in the major or minor to be taken Pass/No Pass; students should refer to the department’s or program’s section of the bulletin for clarification. By college rule, departments can allow up to 6 hours of Pass/No Pass in the major or minor.
- Departments may specify that certain courses of theirs can be taken only on a P/N basis.
- The college will permit no more than a total of 24 semester hours of P/N grades to be applied toward degree requirements. This total includes all Pass grades earned at UNL and other U.S. schools. NOTE: This 24-hour limit is more restrictive than the University regulation.

Students who wish to apply P/N hours to their major and minor(s) must obtain approval on a form that is available in the Arts and Sciences Advising Center, 107 Oldfather Hall.

Grading Appeals
A student who feels that he/she has been unfairly graded must ordinarily take the following sequential steps in a timely manner, usually by initiating the appeal in the semester following the awarding of the grade:

1. Talk with the instructor concerned. Most problems are resolved at this point.
2. Talk to the instructor’s department chairperson.
3. Take the case to the Grading Appeal Committee of the department concerned. The Committee should be contacted through the department chairperson.
4. Take the case to the College Grading Appeals Committee by contacting the Dean’s Office, 1223 Oldfather Hall.

Course Level Requirements
Courses Numbered above 299
Thirty of the 120 semester hours of credit must be in courses numbered above 299. Of the 30 hours above 299, 15 hours (1/2) must be completed in residence at UNL. NOTE: ALEC 397E and ALEC 397K do not count toward these 30 hours.

Graduate Courses
Seniors in the University who have obtained in advance the approval of the dean for Graduate Studies may receive up to 12 hours credit for graduate courses taken in addition to the courses necessary to complete their undergraduate work, provided that such credits are earned within the calendar year prior to receipt of the baccalaureate. For procedures, inquire at the Office of Graduate Studies.

Course work taken prior to receipt of the baccalaureate may not always be accepted for transfer to other institutions as graduate work.

Residency
Residency Requirement and Open Enrollment and Summer Independent Study Courses
Students must complete at least 30 of the 120 total hours for their degree at UNL. Students must complete at least 1/2 of their major course work including 6 hours above 299 in their major, and 15 of the 30 hours required above 299 in residence. Credit earned during education abroad may be used toward the residency requirement if students register through UNL and participate in prior-approved education abroad programs. UNL open enrollment and summer independent study courses count toward residence.
ACE Requirements
Consistent with the mission and values of the University, ACE is based on a shared set of four institutional objectives and 10 student learning outcomes. The ACE program was approved by faculty in all eight undergraduate colleges and endorsed by the Faculty Senate, the student government, and the Academic Planning Committee in January 2008 for implementation in the fall 2009. ACE aligns with current national initiatives in general education.

Key characteristics of ACE demonstrate the benefits of the program to students:

- Students receive a broad education with exposure to multiple disciplines, critical life skills and important reasoning, inquiry, and civic capacities.
- ACE is simple and transparent for students, faculty and advisors. Students complete the equivalent of 3 credit hours for each of the ten student learning outcomes.
- Students connect and integrate their ACE experiences with their selected major.
- Students can transfer all ACE certified courses across colleges within the institution to meet the ACE requirement and any course from outside the institution that is directly equivalent to a UNL ACE-certified course. Courses from outside institutions without direct equivalents may be considered with appropriate documentation for ACE credit (see academic advisor).

ACE allows faculty to assess and improve their effectiveness and facilitate students’ learning.

ACE Institutional Objectives and Student Learning Outcomes
To meet the ACE Program requirement, a student will complete a minimum of 3 credit hours for each of the ten ACE Student Learning Outcomes (a total of 30 ACE credit hours). See the ACE website at: http://ace.unl.edu for the most current information and the most recently certified courses.

Bulletin Rule
Students must fulfill the requirements stated in the bulletin for the academic year in which they are first admitted to and enrolled as a degree-seeking student at UNL. In consultation with advisors, a student may choose to follow a subsequent bulletin for any academic year in which they are admitted to and enrolled as a degree-seeking student at UNL in the College of Arts and Sciences. Students must complete all degree requirements from a single bulletin year. Beginning in 1990-1991 the bulletin which a student follows for degree requirements may not be more than 10 years old at the time of graduation.

Learning Outcomes
Majors in geology will be able to:

1. Be able to understand basic physical geology, historical geology, stratigraphy, and petrology and their roles in building earth materials.
2. Be able to understand structural geology and geomorphology and their roles in landscape evolution.
3. Be able to make accurate field observations from a variety of landscapes.
4. Be able to present geological data and results as coherent written and oral reports.

Major Requirements
Bachelor of Science
The BS is recommended as a minimum program for the pre-professional geologist. All candidates for this degree are required to attend a field camp.

## Bachelor of Arts

Thirty (30) hours of geology courses plus required chemistry and math.

### Core Requirements

| GEOL 101 | Dynamic Earth | 4 |
| GEOL 103 | Evolution of the Earth | 4 |
| GEOL 210 | Earth Materials: Rocks and Minerals | 4 |
| GEOL 211 | Sedimentology and Stratigraphy | 3 |
| GEOL 310 | Depositional Environments | 3 |
| GEOL 400 | Structural Geology | 3 |

Total Credit Hours: 21

### Specific Major Requirements

**Additional Geology Courses**

Select 9 hours of additional GEOL courses, with no more than 4 hours at the 100 level.

Credit Hours Subtotal: 9

Total Credit Hours: 9

### Recommended Courses for Specific Interests

- Professional Geologist: GEOL 372, GEOL 450, GEOL 470, GEOL 485, GEOL 488
- Sedimentology: GEOL 421, GEOL 450, GEOL 485
- Paleontology and Earth Systems: GEOL 417, GEOL 423, GEOL 424, GEOL 430, GEOL 431, GEOL 435
- Hydrological Sciences: GEOL 372, GEOL 417, GEOL 418, GEOL 450, GEOL 465, GEOL 470, GEOL 488

### Ancillary Requirements

**Chemistry**

| CHEM 109 | General Chemistry I | 4 |
| or CHEM 113 | Fundamental Chemistry I | 4 |

Credit Hours Subtotal: 4

**MATHEMATICS**

One MATH course from the following or higher.

| MATH 102 | Trigonometry | 2-5 |
| or MATH 10: College Algebra and Trigonometry | 2-5 |

Credit Hours Subtotal: 2-5

Total Credit Hours: 6-9

### ADDITIONAL MAJOR REQUIREMENTS

**Grade Rules**

**C- and D Grades**

A grade of C or above is required for all courses in the major and minor.

**Pass/No Pass**

No course taken Pass/No Pass will be counted toward the major or the minor.

### Requirements for Minor Offered by Department

Twenty-two (22) hours of geology courses with no more than 8 hours at the 100 level.

**Grade Rules**

**C- and D Grades**

A grade of C or above is required for all courses in the major and minor.

**Pass/No Pass**

No course taken Pass/No Pass will be counted toward the major or the minor.

**GEOL 100 Introduction to Geology**

**Crosslisted with:** GEOL 100H

**Description:** Background in physical geology for non-majors. Topics include rocks and minerals, surficial processes, plate tectonics, and applied geology. GEOL 100 does not fulfill the prerequisite requirement for any course in geology. Credit toward the degree may be earned in only one of GEOL 100 or GEOL 101 or GEOL 101H

**Credit Hours:** 3

Max credits per semester: 3

Max credits per degree: 3

**Format:** LEC

**ACE:** ACE 4 Science

**GEOL 100H Introduction to Geology**

**Crosslisted with:** GEOL 100

**Description:** Background in physical geology for non-majors. Topics include rocks and minerals, surficial processes, plate tectonics, and applied geology. GEOL 100 does not fulfill the prerequisite requirement for any course in geology. Credit toward the degree may be earned in only one of GEOL 100 or GEOL 101 or GEOL 101H

**Credit Hours:** 3

Max credits per semester: 3

Max credits per degree: 3

**Format:** LEC

**ACE:** ACE 4 Science
GEOL 101 Dynamic Earth
Notes: Lab includes field trips. Credit toward the degree may be earned in only one of GEOL 100 or GEOL 101 or GEOL 101H.
Description: Minerals, rocks, and ores; the surface features and internal character of the earth and the forces that are constantly changing it. Examination of minerals and rocks and investigation of geological processes and their products.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC
Prerequisite for: AGRO 455, AGRO 855, NRES 455, NRES 855, SOIL 455; CNST 241, CNST 241H; GEOL 200; GEOL 372
ACE: ACE 4 Science

GEOL 101H Honors: Physical Geology
Description: Processes that formed the earth and continue to alter it today, from interior forces driving plate tectonics, earthquakes, volcanoes, and mountain building, to surface processes driving the atmosphere, oceans, rivers, glaciers, and landscape formation. Natural resources and their origin. One afternoon field trip and one overnight field trip required. Credit toward the degree may be earned in only one of: GEOL 100 or 101 or 101H.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC
Prerequisite for: CNST 241, CNST 241H; GEOL 200

GEOL 103 Evolution of the Earth
Prerequisites: GEOL 101
Description: Physical and biological evolution of the earth. Lab work includes examination of ancient geological terrains through maps and fossils.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC
ACE: ACE 4 Science

GEOL 103H Honors: Historical Geology
Description: Physical and biological evolution of the earth. Lab work includes examination of ancient geological terrains through maps and fossils.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC
ACE: ACE 4 Science

GEOL 105 Dinosaurs and the History of Life
Crosslisted with: GEOL 105H
Description: Introduction to the history of life based on the fossil record, using dinosaurs as models for understanding evolutionary patterns and processes. Lecture examinations and self-paced laboratory assignments using the exhibits in the Nebraska State Museum of Natural History at Morrill Hall.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC
ACE: ACE 4 Science

GEOL 105H Dinosaurs and the History of Life
Crosslisted with: GEOL 105
Description: Introduction to the history of life based on the fossil record, using dinosaurs as models for understanding evolutionary patterns and processes. Lecture examinations and self-paced laboratory assignments using the exhibits in the Nebraska State Museum of Natural History at Morrill Hall.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC
ACE: ACE 4 Science

GEOL 106 Environmental Geology
Crosslisted with: GEOL 106H
Description: Survey of geologic materials and processes with emphasis on those that influence modern societies' adjustment to our environment.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
Prerequisite for: GEOL 372
ACE: ACE 4 Science

GEOL 106H Environmental Geology
Crosslisted with: GEOL 106
Description: Survey of geologic materials and processes with emphasis on those that influence modern societies' adjustment to our environment.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
Prerequisite for: GEOL 372
ACE: ACE 4 Science

GEOL 107 Frontiers of Earth Science
Description: Series of three five-week sessions, each dealing with a geologic topic of current interest and concern. Topics vary from term to term and are listed in the Schedule of Classes.
Credit Hours: 1-6
Min credits per semester: 1
Max credits per semester: 6
Max credits per degree: 6
Format: LEC

GEOL 109 Oceanography
Description: Introduction to physical oceanography, the geologic aspects of biologic oceanography, and human impact on the oceans.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
ACE: ACE 4 Science

GEOL 110 Deadly Planet
Crosslisted with: GEOL 110H
Description: Major geological natural hazards that affect human society and the geological processes that are responsible for them, such as earthquakes, tsunamis, volcanoes, landslides, floods, and meteorite impacts.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
ACE: ACE 4 Science
GEOL 110H Deadly Planet
Crosslisted with: GEOL 110
Description: Major geological natural hazards that affect human society and the geological processes that are responsible for them, such as earthquakes, tsunamis, volcanoes, landslides, floods, and meteorite impacts.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
ACE: ACE 4 Science

GEOL 115 The Earth's Energy Resources
Description: The geological controls on the occurrence and distribution of important and potentially important energy resources. The environment and economic implications of energy resources exploration, development, and production.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
ACE: ACE 4 Science

GEOL 117 Life in the Universe
Crosslisted with: ASTR 117, BIOS 117
Description: Survey of what modern science tells us about the possibilities of life elsewhere in the universe. Topics include how the Earth formed and became suitable for life, how life arose on the Earth, the conditions under which life can thrive, places in the solar system that might support life, the existence of other solar systems that might provide suitable habitats, and attempts to find evidence of life on other planets.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
ACE: ACE 4 Science

GEOL 120 Geology of National Parks and Monuments
Crosslisted with: GEOL 120H
Description: Physical and historical geology of selected United States parklands. Geological and geophysical processes that produced the unique features of the parks. Interpretation of fossils, archaeology and geologic history. Environmental park policy issues involving geosciences.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
ACE: ACE 4 Science

GEOL 120H Geology of National Parks and Monuments
Crosslisted with: GEOL 120
Description: Physical and historical geology of selected United States parklands. Geological and geophysical processes that produced the unique features of the parks. Interpretation of fossils, archaeology and geologic history. Environmental park policy issues involving geosciences.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
ACE: ACE 4 Science

GEOL 125 Frontiers in Antarctic Geosciences
Description: Scientific exploration of the modern environment and geological and climate history of the Antarctic continent and Southern Ocean.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
ACE: ACE 4 Science ACE 9 Global/Diversity

GEOL 130 The Solar System
Description: Geological survey of the Earth's solar system and evolution of planetary systems.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

GEOL 160 Geoscience Fundamentals in the Field
Crosslisted with: GEOL 160H
Description: Scientific principles and practices illustrated through geological field work in Nebraska and Wyoming for science educators.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: FLD

GEOL 160H Geoscience Fundamentals in the Field
Crosslisted with: GEOL 160
Description: Scientific principles and practices illustrated through geological field work in Nebraska and Wyoming for science educators.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: FLD

GEOL 200 Mineralogy
Prerequisites: GEOL 101
Description: Crystallography and mineral optics, mineral classes, crystal chemistry, and mineral identification methods. Includes microscope techniques and field methods.
Credit Hours: 2
Max credits per semester: 2
Max credits per degree: 2
Format: LEC
Prerequisite for: GEOL 201 GEOL 201

GEOL 201 Igneous and Metamorphic Petrology
Prerequisites: GEOL 200
Description: Introduction to the petrology of common igneous and metamorphic rocks and their identification, occurrence, and formation. Includes microscope techniques, analytical methods, and phase diagrams.
Credit Hours: 2
Max credits per semester: 2
Max credits per degree: 2
Format: LEC
GEOL 210 Earth Materials: Rocks and Minerals
Crosslisted with: GEOL 210H
Prerequisites: CHEM 109 or 113, or parallel; GEOL 101
Description: Crystallography and mineral optics, mineral classes, crystal chemistry, and mineral identification methods. Introduction to the petrology of common igneous and metamorphic rocks and their identification, occurrence, and formation. Includes microscope techniques, field methods, and phase diagrams.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC

GEOL 210H Earth Materials: Rocks and Minerals
Crosslisted with: GEOL 210
Description: Crystallography and mineral optics, mineral classes, crystal chemistry, and mineral identification methods. Introduction to the petrology of common igneous and metamorphic rocks and their identification, occurrence, and formation. Includes microscope techniques, field methods, and phase diagrams.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC

GEOL 211 Sedimentology and Stratigraphy
Description: Sedimentary rocks and processes, their descriptive parameters, occurrence, origin, and significance in earth history. Stratified rocks in time and space, and methods of correlating geologic units from different localities.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

GEOL 299 Independent Study in Geology
Credit Hours: 1-3
Min credits per semester: 1
Max credits per semester: 3
Max credits per degree: 3
Format: IND

GEOL 308 Biogeography
Crosslisted with: GEOG 308, GEOG 308H, GEOL 308H, NRES 308, NRES 308H
Description: Introduction to the basic concepts of biogeography, the study of distributions of plants and animals, both past and present. Biogeography is a highly interdisciplinary science, relying heavily on ecology, geological science, and climatology. It is global in scope and offers the latest knowledge in understanding organism distributions, and the factors that determine those distributions.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
Groups: Physical Geography

GEOL 308H Biogeography
Crosslisted with: GEOG 308, GEOG 308H, GEOL 308, NRES 308, NRES 308H
Description: Introduction to the basic concepts of biogeography, the study of distributions of plants and animals, both past and present. Biogeography is a highly interdisciplinary science, relying heavily on ecology, geological science, and climatology. It is global in scope and offers the latest knowledge in understanding organism distributions, and the factors that determine those distributions.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
Groups: Physical Geography

GEOL 310 Depositional Environments
Description: Sedimentological facies analysis and recognition of clastic, carbonate, and evaporite depositional systems in the rock record.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
Prerequisite for: GEOL 460

GEOL 344 Introduction to Geophysics
Prerequisites: PHYS 142 or PHYS 212
Description: Geophysical techniques to study the Earth: seismology, gravity, magnetics and heat flow.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3

GEOL 361 Soils, Environment and Water Quality
Crosslisted with: AGRO 361, NRES 361, SOIL 361, WATS 361, NRES 361H, AGRO 361H, GEOL 361H, SOIL 361H, WATS 361H
Prerequisites: AGRO/HORT/SOIL 153; MATH 102 or 103; two semesters chemistry (CHEM 105, 106 or CHEM 109,110) and WATS/GEOG/NRES 281
Description: Chemical and physical processes that influence the fate and transport of contaminants (inorganic, microbial) in soil-water environments. Extent, fate, mitigation, and impact of various sources of pollution. Remedial technologies used for environmental restoration of contaminated environments.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

GEOL 361H Soils, Environment and Water Quality
Crosslisted with: AGRO 361, GEOL 361, NRES 361, SOIL 361, WATS 361, NRES 361H, AGRO 361H, SOIL 361H, WATS 361H
Prerequisites: AGRO/HORT/SOIL 153; MATH 102 or 103; two semesters chemistry (CHEM 105, 106 or CHEM 109,110) and WATS/GEOG/NRES 281
Description: Chemical and physical processes that influence the fate and transport of contaminants (inorganic, microbial) in soil-water environments. Extent, fate, mitigation, and impact of various sources of pollution. Remedial technologies used for environmental restoration of contaminated environments.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
GEOL 372 Water & Earth Connections  
**Prerequisites:** GEOL 101, or GEOL 106, or METR 100, and MATH 106, or instructor permission  
**Description:** Quantitative understanding of water-related processes in the earth sciences.  
**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Format:** LEC

GEOL 400 Structural Geology  
**Prerequisites:** GEOL 201 and 211; MATH 102 or equivalent; PHYS 141 or 141H or 211 or 211H, or parallel.  
**Description:** Folding and faulting of rocks, types of texture and rock structure, cleavage, joints, dikes, and unconformities; structural interpretation of geologic maps; plate tectonics, mountain belts, and regional structures.  
**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Format:** LEC  
**Offered:** FALL  
**Prerequisite for:** GEOL 460

GEOL 410 Geochemistry  
**Description:** Age of the Earth. Origin of the elements, solar system, oceans, atmosphere, and global geochemical cycles. Radioactive isotope geochemistry, stable isotope geochemistry, and equilibrium relationships.  
**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Format:** LEC

GEOL 412 Volcanology and Igneous Petrology  
**Crosslisted with:** GEOL 812  
**Prerequisites:** GEOL 210; CHEM 113  
**Description:** The study of igneous systems, including an investigation of volcanic processes, mineral equilibria, petrography, and the geochemistry of magmas and minerals.  
**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Format:** LEC

GEOL 417 Organic Geochemistry  
**Crosslisted with:** GEOL 817  
**Description:** Origin, preservation and transport of organic compounds found in the rock record. Applications of organic geochemistry to paleoclimatic and paleoenvironmental interpretations as well as discerning the origins of coal, oil and natural gas.  
**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Format:** LEC

GEOL 418 Chemistry of Natural Waters  
**Crosslisted with:** GEOL 818, NRES 419, NRES 819, WATS 418  
**Description:** Principles of water chemistry and their use in precipitation, surface water, and groundwater studies. Groundwater applications used to determine the time and source of groundwater recharge, estimate groundwater residence time, identify aquifer mineralogy, examine the degree of mixing between waters of various sources and evaluate what types of biological and chemical processes have occurred during the water’s journey through the aquifer system.  
**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Format:** LEC

GEOL 418L Chemistry of Natural Waters Laboratory  
**Crosslisted with:** GEOL 818L, NRES 419L, NRES 819L, WATS 418L  
**Description:** Basic laboratory techniques used to perform water analysis including various wet chemical techniques, instrument use (AA, IC, UV-Visible) and computer modeling. Techniques for sample collection and preservation, parameter estimation and chemical analysis.  
**Credit Hours:** 1  
**Max credits per semester:** 1  
**Max credits per degree:** 1  
**Format:** LAB

GEOL 419 Applications of Remote Sensing in Agriculture and Natural Resources  
**Crosslisted with:** AGRO 419, GEOG 419, NRES 420  
**Prerequisites:** GEOG/NRES 418.  
**Description:** Introduction to the practical uses of remote electromagnetic sensing in dealing with agricultural and water-resources issues.  
**Credit Hours:** 4  
**Max credits per semester:** 4  
**Max credits per degree:** 4  
**Format:** LEC  
**Groups:** Techniques Techniques

GEOL 421 Carbonate Petrology  
**Crosslisted with:** GEOL 421H, GEOL 821  
**Description:** Depositional settings and processes, petrography, geochemistry, diagenesis and geological significance of modern and ancient carbonate rocks and sediments. Lab focuses on field, petrographic and geochemical methods.  
**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Format:** LEC

GEOL 421H Carbonate Petrology  
**Crosslisted with:** GEOL 421, GEOL 821  
**Description:** Depositional settings and processes, petrography, geochemistry, diagenesis and geological significance of modern and ancient carbonate rocks and sediments. Lab focuses on field, petrographic and geochemical methods.  
**Credit Hours:** 3  
**Max credits per semester:** 3  
**Max credits per degree:** 3  
**Format:** LEC
GEOL 423 Quaternary Paleoclimatology and Paleocology  
Crosslisted with: BIOS 436, BIOS 836, GEOL 823  
Description: Analysis and interpretation of the Quaternary period's paleoclimatic data. Patterns of long-term climate variation. Distribution patterns and responses of organisms and ecosystems to Quaternary environmental change.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Format: LEC

GEOL 424 Biogeochemical Cycles  
Crosslisted with: BIOS 438, BIOS 838, GEOL 824  
Description: Chemical cycling at or near the earth's surface, emphasizing interactions among the atmosphere, biosphere, geosphere and hydrosphere. Modern processes, the geological record, and human impacts on elemental cycles.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Format: LEC

GEOL 430 Quantitative Methods in Paleontology  
Crosslisted with: GEOL 830  
Description: Numerical and statistical analysis of paleontological data including biometry, syn-ecology, and quantitative biostratigraphy.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Format: LEC

GEOL 431 Micro-paleontology  
Crosslisted with: GEOL 831  
Description: Morphology, classification, ecology and geological application of common fossil and extant marine, brackish, and freshwater microfossils.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Format: LEC

GEOL 435 Vertebrate Paleontology  
Crosslisted with: GEOL 435H, GEOL 835  
Description: Survey of the evolution of the vertebrates, including the geological and biological factors that influence the pattern of evolution, and laboratory study of fossil materials of the major vertebrate groups.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Format: LEC

GEOL 435H Vertebrate Paleontology  
Crosslisted with: GEOL 435, GEOL 835  
Description: Survey of the evolution of the vertebrates, including the geological and biological factors that influence the pattern of evolution, and laboratory study of fossil materials of the major vertebrate groups.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Format: LEC

GEOL 436 Evolution of Cenozoic Mammals  
Crosslisted with: GEOL 836, NRES 436, NRES 836  
Prerequisites: GEOL 103  
Description: Survey of mammalian evolution with emphasis on the origin, radiation, and phylogenetic relationships of Cenozoic fossil mammals. Overview of climatic and ecological changes affecting mammalian adaptations and hands on experience with specimens.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Format: LEC

GEOL 440 Tectonics  
Crosslisted with: GEOL 840  
Prerequisites: GEOL 400 or permission  
Description: Theory of plate tectonics; tectonic controls on rock assemblages; interpretation of regional structure and tectonic history; origin and tectonic evolution of terrestrial planets.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Format: LEC

GEOL 442 Environmental Geophysics I  
Crosslisted with: GEOL 842  
Description: Introduction to the principles of seismic, ground-penetrating radar, and bore-hole geophysical methods and their application to groundwater, engineering, environmental, and archaeological investigations.  
Credit Hours: 4  
Max credits per semester: 4  
Max credits per degree: 4  
Format: LEC

GEOL 443 Environmental Geophysics II  
Crosslisted with: GEOL 843  
Description: Introduction to principles of magnetic, electromagnetic, resistivity, and gravity methods and their application to ground water, engineering, environmental, and archaeological investigations.  
Credit Hours: 4  
Max credits per semester: 4  
Max credits per degree: 4  
Format: LEC

GEOL 444 Geomicrobiology  
Crosslisted with: BIOS 444, BIOS 844, GEOL 844  
Prerequisites: 3 hours biological sciences and 3 hours chemistry.  
Description: Lectures and discussions of primary literature regarding microorganisms and their role transforming Earth through geologic time.  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Format: LEC

GEOL 445 Advanced Geophysics  
Crosslisted with: GEOL 845  
Prerequisites: GEOL 344  
Description: Integrative analysis of geophysical data (gravity, magnetics, seismic) with geological information (well logs, tectonic history, etc.)  
Credit Hours: 3  
Max credits per semester: 3  
Max credits per degree: 3  
Format: LEC
GEOL 450 Surficial Processes and Landscape Evolution
Crosslisted with: GEOL 850
Description: Fluvial, glacial, eolian, and coastal processes and landforms. Roles of tectonics, climate, and climate change in landscape evolution. Lab stresses description and interpretation of landforms from remotely-sensed, cartographic, and field data.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

GEOL 457 Ecosystem Ecology
Crosslisted with: BIOS 457, BIOS 857, GEOL 857
Prerequisites: BIOS 207 and CHEM 110
Description: Processes controlling the cycling of energy and elements in ecosystems and how both plant and animal species influence them. Human-influenced global and local changes that alter these cycles and ecosystem functioning.
Credit Hours: 4
Max credits per semester: 4
Max credits per degree: 4
Format: LEC
ACE: ACE 10 Integrated Product

GEOL 460 Summer Field Course
Prerequisites: GEOL310 and GEOL340
Description: Six weeks advanced study of selected field problems. Conducted in a geologically classic area where all major rock types are found in a variety of geologic situations.
Credit Hours: 6
Max credits per semester: 6
Max credits per degree: 6
Format: FLD
ACE: ACE 10 Integrated Product

GEOL 461 Soil Physics
Crosslisted with: AGRO 461, NRES 461, SOIL 461, WATS 461
Prerequisites: AGRO/SOIL 153, PHYS 141 or equivalent, one semester of calculus.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

GEOL 465 Soil Geomorphology and Paleopedology
Crosslisted with: GEOL 865, NRES 465, NRES 865
Description: Soils and paleosols as evidence in reconstruction landscape evolution and paleoenvironments. Role of paleosols in stratigraphy.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

GEOL 470 Field Techniques in Hydrogeology
Crosslisted with: GEOL 870
Description: Basic techniques, field procedures, instruments, and software for data interpretation, and characterization of groundwater flow and contaminant transport.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

GEOL 472 Water in Geosciences
Crosslisted with: GEOL 872
Description: Quantitative approach to water in geological media, earth surface and atmosphere. Understanding and analysis of physical processes involved in groundwater-surface-atmosphere interactions.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

GEOL 475 Water Quality Strategy
Crosslisted with: NRES 475, NRES 875, SOCI 475, SOCI 875, SOIL 475, WATS 475, AGRO 475, AGRO 875, CIVE 475, CIVE 875, CRPL 475, CRPL 875, GEOL 875, MSYM 475, MSYM 875, POLS 475, POLS 875
Prerequisites: Senior standing or permission
Description: Holistic approach to the selection and analysis of planning strategies for protecting water quality from non-point sources of contamination. Introduction to the use of methods of analyzing the impact of strategies on whole systems and subsystems; for selecting strategies; and for evaluating present strategies. Capstone course.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
ACE: ACE 10 Integrated Product
Groups: American Government & Public Policy

GEOL 480 Economic Geology of the Metals
Crosslisted with: GEOL 880
Prerequisites: 12 hrs geology including GEOL 210, 400; CHEM 114, 116.
Description: Occurrence and utilization of the metallic ores. Elementary theory of ore genesis.
Credit Hours: 2
Max credits per semester: 2
Max credits per degree: 2
Format: LEC

GEOL 484 Water Resources Seminar
Crosslisted with: AGRO 484, GEOG 484, NRES 484, WATS 484, NRES 884, AGRO 884, GEOG 884, GEOL 884, WATS 884
Prerequisites: Junior or above standing, or permission
Description: Seminar on current water resources research and issues in Nebraska and the region.
Credit Hours: 1
Max credits per semester: 1
Max credits per degree: 1
Format: LEC

GEOL 485 Fossil Fuel Geology and Exploration
Crosslisted with: GEOL 885
Description: Geology of coal, oil and gas, and methods of exploration.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC

GEOL 488 Groundwater Geology
Crosslisted with: GEOL 888, NRES 488, NRES 888
Description: Occurrence, movement, and development of water in the geologic environment.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
GEOL 495 Economic and Exploration Geology
Description: E.F. Schramm Course in Economic Geology. Aspects of fossil fuel geology and exploration.
Credit Hours: 2
Max credits per semester: 2
Max credits per degree: 2
Format: LEC

GEOL 498 Special Topics in Geology
Description: Reviews of specialized subject areas.
Credit Hours: 1-24
Min credits per semester: 1
Max credits per semester: 24
Max credits per degree: 24
Format: LEC

GEOL 499 Independent Study in Geology
Credit Hours: 1-24
Min credits per semester: 1
Max credits per semester: 24
Max credits per degree: 24
Format: IND

GEOL 499H Honors Course
Credit Hours: 1-4
Min credits per semester: 1
Max credits per semester: 4
Max credits per degree: 4
Format: LEC

PLEASE NOTE
This document represents a sample 4-year plan for degree completion with this major. Actual course selection and sequence may vary and should be discussed individually with your college or department academic advisor. Advisors also can help you plan other experiences to enrich your undergraduate education such as internships, education abroad, undergraduate research, learning communities, and service learning and community-based learning.

Career Information
The following represents a sample of the internships, jobs and graduate school programs that current students and recent graduates have reported.

Transferable Skills
• Comprehend and critically evaluate complex information
• Use quantitative analytical computational techniques
• Make predictions using mathematical, statistical, and scientific modeling methods
• Understand and use proper laboratory and technical skills and instruments
• Define problems and identifying causes
• More...
  • Support and communicate claims using clear evidence
  • Simplify complex information and present it to others
  • Apply mathematical and scientific skills to solve real-world problems
  • Document and replicate processes and procedures
  • Design and implement research experiments

Jobs of Recent Graduates
• Geologist, Marathon Oil Company - Houston TX

• Well Site Geologist, Columbine Logging - Denver CO
• Hydrogeologist, United States Geologic Survey - MA
• Geotechnician, Whiting Petroleum Corporation - Denver CO
• Researcher, University of Nebraska-Lincoln - Lincoln NE
• More...
  • Drafter, Booz Allen Hamilton - Omaha NE
  • Quality Assurance Departures Specifications, Epsilon Systems Solutions - Norfolk VA
  • Mud-logger, Selman and Associates - Midland TX
  • Geologist, Fulbright - La Plata BA
  • Library Service Associate, City of Lincoln - Library Department - Lincoln NE

Internships
• Integrated Water Management Specialist Assistant, Nebraska Department of Natural Resources - Lincoln NE
• Student Intern - Hydrology, United States Geological Survey - Lincoln NE
• Geology Intern, Twin Rivers Testing Environmental - North Platte NE

Grad Schools
• MS Geology, University of Nebraska-Lincoln - Lincoln NE
• Masters - Geo Sciences, University of Nebraska-Lincoln - Lincoln NE
• Education, UNL - Lincoln NE
• Geophysics, California Institute of Technology - Pasadena CA
• Hydrogeology, University of Nebraska-Lincoln - Lincoln NE
• More...
  • Masters of Science-Geology, University of Missouri-Columbia - Columbia MO
  • Ph.D., University of Michigan - MI
  • Geology, M.S., University of Kansas - Lawrence KS
