Format: LEC
ACE: ACE 8 Civic/Ethics/Stewardship

SCIL 109 Water in Society
Crosslisted with: AECN 109, NRES 109, ENVR 109, GEOG 109
Description: Introduction to the scientific, social, and economic dimensions of historical and contemporary water systems. Students will develop an understanding of hydrologic systems and analyze and engage in decision-making about complex challenges associated with water resource use.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: LEC
Offered: FALL
ACE: ACE 8 Civic/Ethics/Stewardship ACE 4 Science

SCIL 300 Experiential Learning in Food, Energy and Water Systems I
Prerequisites: 9 hours of coursework towards the Food, Energy and Water in Society Minor
Description: First-hand discovery of knowledge through active learning experiences that are designed to complement the students’ in-class learning. Students will be placed in a relevant educational environment (K-12, formal, informal, public, etc.) under the supervision of an experienced educator. This experience focuses on application of knowledge and skills learned in previous courses associated with the minor to support others’ lifelong learning about the interconnectedness of food, energy, and/or water systems.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: FLD

SCIL 400 Experiential Learning in Food, Energy and Water Systems II
Crosslisted with: SCIL 800
Prerequisites: 15 hours of coursework towards the Food, Energy, and Water in Society Minor including SCIL 300 (at the 400 level) or 12 hours of graduate coursework (at the 800 level).
Description: A multifaceted experience that serves as a culminating academic and intellectual experience for students. Students will complete an internship or a research project in an approved professional or academic setting that will provide them with a challenging and engaging experience. As part of this experience, students will cater knowledge and skills from the minor as appropriate for a professional career, begin to build a network for support and future employment, and clarify individual professional goals and strategies for career development. The experience will culminate in the development of a creative product that illustrates the students’ knowledge and skills relevant to food, energy, and/or water systems.
Credit Hours: 3
Max credits per semester: 3
Max credits per degree: 3
Format: FLD
